*Managing Openness* Mona Haddad, Ben Shepherd, 2011 The global financial crisis triggered a broad reassessment of economic integration policies in developed and developing countries worldwide. The crisis-induced collapse in trade was the sharpest ever since World War II, affecting all countries and all product categories. A huge shock to the trading system, combined with severe macroeconomic instability, makes it natural for policymakers to call into question the basic underlying assumptions of trade liberalization and openness. In particular, outward-oriented or export-led growth strategies are being reassessed as openness is increasingly associated with greater volatility. However, it is crucial not to lose sight of the dynamic benefits that openness can offer. Examples include technology transfer, increased competitive pressure that reduces markups and improves efficiency, and economies of scale. The real question is how to manage outward-oriented strategies so as to maximize the benefits of openness while minimizing risks. This book aims to contribute to this important and ongoing policy debate, bringing together recent empirical work on the trade collapse, its causes and consequences, and the broader trade policy agenda in the post-crisis environment. It addresses critical policy issues revolving around the topic of outward-oriented growth strategy, including policy instruments that help manage risks associated with outward-orientation, lessons learned from the crisis for particular countries and regions, and how emerging trade policy issues such as climate change, commodities, global production networking, and migration affect the prospects for recovery and outward-oriented growth.

*Developing Library and Information Center Collections* G. Edward Evans, 1987  
Assets, Livelihoods, and Social Policy Anis A. Dani, Caroline Moser, 2008-05-14 Given the lack of adequate universal social welfare for those unable to find jobs in the salaried formal sector, the livelihoods and well-being of most poor people depends heavily on their asset base. This includes their ability to access and accumulate assets, obtain decent returns from these assets, and use their asset base to manage risks. 'Assets, Livelihoods, and Social Policy' discusses the diverse strategies adopted by people in different contexts to accumulate assets through migration, housing investments, natural resources management, and informal businesses. An asset-based social policy can strengthen asset accumulation strategies as well as help the poor overcome the constraints of unfavorable institutional environments. To a considerable extent, asset accumulation strategies depend on the agency exercised by people themselves through individual or collective action. At the same time, the status of policies and institutions can enable or hinder these strategies and affect livelihood outcomes. In synthesis, the case studies lead to the differentiation among three different types of policies: - policies that affect outcomes by directly influencing access to assets by the poor such as land, housing, natural resources, or credit. -

policies and public investments that change the nature of returns on assets such as investments in rural roads, agricultural inputs, and market development. - policies that transform the value of assets held by the poor by virtue of administrative decisions that increase or reduce value such as re-classification of land from arable or pasture to protected lands, land use regulations affecting resource use, or modification in regulations governing labor rights or migration. The chapters, originally commissioned to re-examine major gaps in knowledge and development practice ten years after the Copenhagen Summit on Social Development, are authored by leading scholars from economics, anthropology, sociology, geography, and development studies. This book is part of a new series, New Frontiers in Social Policy, which examines issues and approaches to extend the boundaries of social policy beyond conventional social services toward policies and institutions that improve equality of opportunity and social justice in developing countries. Other titles in the series include Inclusive States: Social Policy and Structural Inequalities, and Institutional Pathways to Equity: Addressing Inequality Traps.

Information Economy Report 2010 United Nations Conference on Trade and Development (UNCTAD), 2010-11-02 The Information Economy Report 2010: ICT, Enterprises and Poverty Alleviation is the fifth in the flagship series published by the United Nations Conference on Trade and Development (UNCTAD). As one of few annual reports that monitor global trends related to information and communication technologies (ICTs) from a development perspective, the Report is a valuable reference source for policymakers in developing countries. In the 2010 edition, special attention is given to the potential impact of ICTs in enterprises for reducing poverty and improving livelihoods. The evidence presented in this Report suggests that more attention should be given by policymakers and other stakeholders to opportunities in this area.

*Cultural and Linguistic Minorities in the Russian Federation and the European Union* Heiko F. Marten, Michael Rießler, Janne Saarikivi, Reetta Toivanen, 2015-01-06 This is the first comprehensive volume to compare the sociolinguistic situations of minorities in Russia and in Western Europe. As such, it provides insight into language policies, the ethnolinguistic vitality and the struggle for reversal of language shift, language revitalization and empowerment of minorities in Russia and the European Union. The volume shows that, even though largely unknown to a broader English-reading audience, the linguistic composition of Russia is by no means less diverse than multilingualism in the EU. It is therefore a valuable introduction into the historical backgrounds and current linguistic, social and legal affairs with regard to Russia's manifold ethnic and linguistic minorities, mirrored on the discussion of recent issues in a number of well-known Western European minority situations.

**Faith-Rooted Organizing** Rev. Alexia Salvatierra, Peter Heltzel, 2013-12-06 With so many injustices, small and great, across the world and right at our doorstep, what are people of faith to do? Since the 1930s, organizing movements for social justice in the U.S. have largely been built on assumptions that are secular origin—such as reliance on self-interest and having a common enemy as a motivator for change. But what if Christians were to shape their organizing around the implications of the truth that God is real and Jesus is risen? Alexia Salvatierra has developed a model of social action that is rooted in the values and convictions born of faith. Together with theologian Peter Heltzel, this model of faith-rooted organizing offers a path to meaningful social change that takes seriously the command to love God and to love our neighbor as ourself.

**Risky Expertise in Chinese Financialisation** Giulia Dal Maso,2020-11-05 This book focuses on the subjectivities of stock market investors to explore tensions within the Chinese state's engagement in contemporary financial capitalism. It adopts a genealogical method to investigate how the production of foreign-trained financial experts (haigui) and informal experts (sanhu) points to paradoxes in China's efforts to cultivate financial expertise. Chinese financialisation relates to the state's project of financialising human capital in reaction to a contractualised labour market and the vanishing welfare state. Through ethnographic inquiry, Dal Maso shows the Chinese stock markets are crucial to the new redistributive regime where wage labour risks losing its primacy. Here, one can observe how the relationship between money and wages in China is being reworked and witness the development of a new economic order in which the state's legitimacy becomes increasingly dependent on its capacity to jiushi—to rescue the market in times of crisis.
