The Rise of China and India in Africa Fantu Cheru, Cyril Obi, 2010-03-11 In recent years, China and India have become the most important economic partners of Africa and their footprints are growing by leaps and bounds, transforming Africa's international relations in a dramatic way. Although the overall impact of China and India's engagement in Africa has been positive in the short-term, partly as a result of higher returns from commodity exports fuelled by excessive demands from both countries, little research exists on the actual impact of China and India's growing involvement on Africa's economic transformation. This book examines in detail the opportunities and challenges posed by the increasing presence of China and India in Africa, and proposes critical interventions that African governments must undertake in order to negotiate with China and India from a stronger and more informed platform.

Water Resources of Pakistan Muhammad Arif Watto, Michael Mitchell, Safdar Bashir, 2021-03-25 This book presents the first comprehensive assessment of water resources in Pakistan including surface water resources and groundwater resources. It gives a detailed overview of issues and challenges related to water which have not been adequately addressed e.g. water resource

vulnerability to climate change, groundwater depletion and contamination, and water governance etc. It includes a collection and compilation of unpublished and scattered data from the archives and repositories of various national institutions and organization. Given the literature dearth, this book will not only be a comprehensive assessment of water resources in Pakistan but can also can as outstanding textbook on water resource management in Pakistan. It will attract a great range of readership including water specialists, researchers, undergraduate and post graduate students and policy makers from Pakistan as well as from overseas.

Inequality and Development Challenges Maria Clara Couto Soares, Mario Scerri, Rasigan Maharajh, 2018-10-24 This series of books brings together results of an extensive research programme on aspects of the national systems of innovation (NSI) in the five BRICS countries — Brazil, Russia, India, China, and South Africa. It provides a comprehensive and comparative examination of the challenges and opportunities faced by these dynamic and emerging economies. In discussing the impact of innovation with respect to economic, geopolitical, socio-cultural, institutional, and technological systems, it reveals the possibilities of new development paradigms for equitable and sustainable growth. This volume analyses the co-evolution of inequality and NSI across the BRICS economies. It reveals the multi-dimensional character of inequality, in going beyond its income aspect to include assets, access to basic services, infrastructure, knowledge, race, gender, ethnicity and geographic location. In advancing valuable policy recommendations, the book argues that inequalities must be factored in development strategies given that benefits of innovation are not automatically distributed equally. Original and detailed data, together with expert analyses on wide-ranging issues, make this book an invaluable resource for researchers and scholars in economics, development studies and political science, in addition to policy-makers and development practitioners interested in

the BRICS countries.

Fuzzy Logic and Soft Computing Applications Alfredo Petrosino, Vincenzo Loia, Witold Pedrycz, 2017-02-06 This book constitutes the proceedings of the 11th International Workshop on Fuzzy Logic and Applications, WILF 2016, held in Naples, Italy, in December 2016. The 22 revised full papers presented together with 2 invited lectures were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on fuzzy measures and transforms; granularity and multi-logics, clustering and learning; knowledge systems; and soft computing and applications.

Understanding Telehealth Karen Schulder Rheuban, Elizabeth A. Krupinski, 2017-12-22 The first complete guide to the rapidly expanding field of telehealth From email to videoconferencing, telehealth puts real-time healthcare solutions at patients' and clinicians' fingertips. Every year, the field continues to evolve, enhancing access to healthcare, supporting clinicians, and improving the

patient experience. However, since telehealth is in its infancy, no text has offered a comprehensive, definitive survey of this up-and-coming field—until now. Written by past presidents of the American Telemedicine Association, *Understanding Telehealth* explains how clinical applications leveraging telehealth technology are optimizing healthcare delivery. In addition, this timely resource examines the bedrock principles of telehealth and highlights the safety standards involved in the diagnosis and treatment of patients through digital communications. Logically organized and supported by high-yield clinical vignettes, the book begins with essential background information, including a look at telehealth history, definitions and roles, and rural health. It then provides an overview of clinical services for adults, from telestroke to telepsychiatry. The third section addresses pediatric clinical services, encompassing pediatric emergency and critical care, telecardiology, and more. A groundbreaking resource:

- Chapters cover a broad spectrum of technologies, evidence-based guidelines, and application of telehealth across the healthcare continuum
- Ideal for medical staff, public healthcare executives, hospitals, clinics, payors, healthcare advocates, and researchers alike
- Incisive coverage of the legal and regulatory environment underpinning telehealth practice

Modelling and Simulation of Electrical Energy Systems Through a Complex Systems Approach Using Agent-Based Models Enrique Alberto Kremers, 2014-07-31 Complexity science aims to better understand the processes of both natural and man-made systems which are composed of many interacting entities at different scales. A disaggregated approach is proposed for simulating electricity systems, by using agent-based models coupled to continuous ones. The approach can help in acquiring a better understanding of the operation of the system itself, e.g. on emergent phenomena or scale effects; as well as in the improvement and design of future smart grids.

Recent Advances in Learning and Control Vincent D. Blondel, Stephen P. Boyd, Hidenori Kimura, 2008-01-11 This volume is composed of invited papers on learning and control. The contents form the proceedings of a workshop held in January 2008, in Hyderabad that honored the 60th birthday of Doctor Mathukumalli Vidyasagar. The 14 papers, written by international specialists in the field, cover a variety of interests within the broader field of learning and control. The diversity of the research provides a comprehensive overview of a field of great interest to control and system theorists.

Handbook of Cloud Computing Borko Furht, Armando Escalante, 2010-09-11 Cloud computing has become a significant technology trend. Experts believe cloud computing is currently reshaping information technology and the IT marketplace. The advantages of using cloud computing include cost savings, speed to market, access to greater computing resources, high availability, and scalability. Handbook of Cloud Computing includes contributions from world experts in the field of cloud computing from academia, research laboratories and private industry. This book presents the systems, tools, and services of the leading providers of cloud computing; including Google, Yahoo, Amazon, IBM, and Microsoft. The basic concepts of cloud computing and cloud computing applications are also introduced. Current and future technologies applied in cloud computing are also discussed. Case studies, examples, and exercises are provided throughout. Handbook of Cloud Computing is intended for advanced-level students and researchers in computer science and electrical engineering as a reference book. This handbook is also beneficial to computer and system infrastructure designers, developers, business managers, entrepreneurs and investors within the cloud computing related industry.

The MATADOR series of conferences covers the topics of Manufacturing Automation and Systems Technology, Applications, Design, Organisation and Management, and Research. The proceedings of this Conference contain original papers contributed by researchers from many countries on different continents. The papers cover the principles, techniques and applications in aerospace, automotive, biomedical, energy, consumable goods and process industries. The papers in this volume reflect: • the importance of manufacturing to international wealth creation; • the emerging fields of micro- and nano-manufacture; • the increasing trend towards the fabrication of parts using lasers; • the growing demand for precision engineering and part inspection techniques; and • the changing trends in manufacturing within a global environment.

Encyclopedia of Education and Information Technologies Arthur Tatnall, 2020-05-24 This encyclopedia aims to offer researchers an indication of the breadth and importance of information systems in education, including the way IT is being used, and could be used to enable learning and teaching. The encyclopedia covers all aspects of the interaction between education and information technologies, including IT in kindergartens, primary and secondary schools, universities, training colleges, industry training, distance education and further education. It also covers teaching and computing, the use of IT in many different subject areas, the use of IT in educational administration, and national policies of IT and education.

Microfinance India N Srinivasan, 2009-01-06 Microfinance India is a part of a series of annual reports on the microfinance sector in India which seeks to document developments, clarify issues,

publicize studies, stimulate research, identify policy choices, generate understanding and enhance support for the sector. It is a comprehensive one-stop document that provides the latest data and a holistic view of the sector, combines analysis and description and integrates a variety of topics previously treated separately. The book highlights recent developments in Self Help Groups (SHGs) and SHG Bank Linkage Programs (SBLPs), and focuses on microfinance with regard to the investment scenario in India. It also deals with the burgeoning field of urban microfinance, developments in micro-insurance, and the impact of new technologies on the microfinance sector. Additionally, it recognizes the high demands which the state makes on microfinance institutions and discusses the need and relevance of new policy regulations. Complementing these analyses, statistical annexes provide essential data on the sector, strengthening its utility as a reference document. It contains extensive original material, and yet draws widely on the findings of other recent studies and reports, thereby emerging as a complete, detailed analysis of the status and the future of the microfinance sector in India.

Communication for Development and Social Change Jan Servaes, 2008 This book deals with the processes required to facilitate the sharing of knowledge and effect positive developmental change. It is contextual and based on dialogue. The stakeholders' participation also needs to be promoted. This is essential in order to understand of their perceptions, perspectives, values, attitudes and practices so that these can be incorporated into the design and implementation of development initiatives. The book, for the most part, follows the two-way horizontal model of communication, but also makes use of the...
