**Everyman News** Michele Weldon,2008 Examines how newspapers have changed over the past few years, becoming story papers. Comparing 850 stories, story approaches, and unofficial sourcing in twenty American newspapers from 2001 and 2004, Weldon reveals a shift toward features over hard news, along with an increase in anecdotal or humanistic approaches to all stories-- Provided by publisher.

Politically Incorrect Essays by a Concerned Activist Mia A Tréstroke,2021-06-21 Politically Incorrect Essays by a Concerned Activist introduces 9 of the most important reviews and essays by social critic, activist, and essayist Mia A Tréstroke. Addressing the major political, social, religious, and philosophical issues of today, Mia A Tréstroke confronts the topics most people would prefer to ignore or appease: Muslim terrorists, homosexuality, religious hypocrisy, the false promises of science, and the rise of psychopaths and sociopaths in our society. In keeping with the tradition of activism, Mia A Tréstroke refuses to kowtow to political correctness and ploughs headlong into the truths that society has tried to cover up for too long.

**Arguments that Count** Rebecca Slayton,2013-08-16 How differing assessments of risk by physicists and computer scientists have influenced public debate over nuclear defense. In a rapidly changing world, we rely upon experts to assess the promise and risks of new technology. But how do these experts make sense of a highly uncertain future? In Arguments that Count, Rebecca Slayton offers an important new perspective. Drawing on new historical documents and interviews as well as perspectives in science and technology studies, she provides an original account of how scientists came to terms with the unprecedented threat of nuclear-armed intercontinental ballistic missiles (ICBMs). She compares how two different professional communities—physicists and computer scientists—constructed arguments about the risks of missile defense, and how these arguments changed over time. Slayton shows that our understanding of technological risks is shaped by disciplinary repertoires—the codified knowledge and mathematical rules that experts use to frame new challenges. And, significantly, a new repertoire can bring long-neglected risks into clear view. In the 1950s, scientists recognized that high-speed computers would be needed to cope with the unprecedented speed of ICBMs. But the nation's elite science advisors had no way to analyze the risks of computers so used physics to assess what they could: radar and missile performance. Only decades later, after establishing computing as a science, were advisors able to analyze authoritatively the risks associated with complex software—most notably, the risk of a catastrophic failure. As we continue to confront new threats, including that of cyber attack, Slayton offers valuable insight into how different kinds of expertise can limit or expand our capacity to address novel technological risks.

*Physical Chemistry* Paul M. S. Monk,2005-12-13 Understanding Physical Chemistry is a gentle introduction to the principles and applications of physical chemistry. The book aims to introduce the concepts and theories in a structured manner through a wide range of carefully chosen examples and case studies drawn from everyday life. These real-life examples and applications are presented first, with any necessary chemical and mathematical theory discussed afterwards. This makes the book extremely accessible and directly relevant to the reader. Aimed at undergraduate students taking a first course in physical chemistry, this book offers an accessible applications/examples led approach to enhance understanding and encourage and inspire the reader to learn more about the subject. A comprehensive introduction to physical chemistry starting from first principles. Carefully structured into short, self-contained chapters. Introduces examples and applications first, followed by the necessary chemical theory.

*China's Grand Strategy* Andrew Scobell,Edmund J. Burke,Cortez A. Cooper III,Sale Lilly,Chad J. R. Ohlandt,Eric Warner,J.D. Williams,2020-07-27 To explore what extended competition between the United States and China might entail out to 2050, the authors of this report identified and characterized China's grand strategy, analyzed its component national strategies (diplomacy, economics, science and technology, and military affairs), and assessed how successful China might be at implementing these over the next three decades.

**Breaking News** Alan Rusbridger,2018-11-27 An urgent account of the revolution that has upended the news business, written by one of the most accomplished journalists of our time Technology has radically altered the news landscape. Once-powerful newspapers have lost their clout or been purchased by owners with particular agendas. Algorithms select which stories we see. The Internet allows consequential revelations, closely guarded secrets, and dangerous misinformation to spread at the speed of a click. In Breaking News, Alan Rusbridger demonstrates how these decisive shifts have occurred, and what they mean for the future of democracy. In the twenty years he spent editing The Guardian, Rusbridger managed the transformation of the progressive British daily into the most visited serious English-language newspaper site in the world. He oversaw an extraordinary run of world-shaking scoops, including the exposure of phone hacking by London tabloids, the Wikileaks release of U.S.diplomatic cables, and later the revelation of Edward Snowden's National Security Agency files. At the same time, Rusbridger helped The Guardian become a pioneer in Internet journalism, stressing free access and robust interactions with readers. Here, Rusbridger vividly observes the media's transformation from close range while also offering a vital assessment of the risks and rewards of practicing journalism in a high-impact, high-stress time.

**Ethics in Palliative Care** Robert C. Macauley MD,2018-03-01 No specialty faces more diverse and challenging ethical dilemmas than palliative medicine. What is the best way to plan ahead for the end of life? How should physicians respond when patients refuse treatments likely to be beneficial, or demand treatments not likely to be? Who makes medical decisions for patients who are too ill to decide for themselves? Do patients have the right to die (and, if so, what exactly does that mean)? In this volume noted palliative care physician and bioethicist Robert C. Macauley addresses a broad range of issues from historical, legal, clinical, and ethical perspectives. Clinically nuanced and philosophically rigorous, Ethics in Palliative Care analyzes hot-button subjects like physician assisted dying and euthanasia, as well as often overlooked topics such as pediatric palliative care, organ donation, palliative care research, and moral distress. Drawing on real cases yet written in non-technical language, this complete guide will appeal to both medical professionals and lay readers.

*Iran Unveiled* Ali Alfoneh,2013-04-18 Iran is currently experiencing the most important change in its history since the revolution of 1979 and the establishment of the Islamic Republic: The regime in Tehran, traditionally ruled by the Shia clergy, is transforming into a military dictatorship dominated by the officers of the Islamic Revolutionary Guards Corps (IRGC; Sepah-e Pasdaran-e Enqelab-e Eslami). This transformation is changing not only the economy and society in Iran, but also the Islamic Republic's relations with the United States and its allies.

The Transcendent Brain Alan Lightman,2023-03-14 From the acclaimed author of Einstein's Dreams comes a rich, fascinating answer to the question, Can the scientifically inclined still hold space for spirituality? "Lightman...belongs to a noble tradition of science writers, including Oliver Sacks and Lewis Thomas, who can poke endlessly into a subject and...stir up fresh embers of wonder." —The Wall Street Journal Gazing at the stars, falling in love, or listening to music, we sometimes feel a transcendent connection with a cosmic unity and things larger than ourselves. But these experiences are not easily understood by science, which holds that all things can be explained in terms of atoms and molecules. Is there space in our scientific worldview for these spiritual experiences? According to acclaimed physicist and novelist Alan Lightman, there may be. Drawing on intellectual history and conversations with contemporary scientists, philosophers, and

psychologists, Lightman asks a series of thought-provoking questions that illuminate our strange place between the world of particles and forces and the world of complex human experience. Can strict materialism explain our appreciation of beauty? Or our feelings of connection to nature and to other people? Is there a physical basis for consciousness, the most slippery of all scientific problems? Lightman weaves these investigations together to propose what he calls “spiritual materialism”— the belief that we can embrace spiritual experiences without letting go of our scientific worldview. In his view, the breadth of the human condition is not only rooted in material atoms and molecules but can also be explained in terms of Darwinian evolution. What is revealed in this lyrical, enlightening book is that spirituality may not only be compatible with science, it also ought to remain at the core of what it means to be human.

**General Principles of Law - The Role of the Judiciary** Laura Pineschi,2015-06-22 This book examines the role played by domestic and international judges in the “flexibilization” of legal systems through general principles. It features revised papers that were presented at the Annual Conference of the European-American Consortium for Legal Education, held at the University of Parma, Italy, May 2014. This volume is organized in four sections, where the topic is mainly explored from a comparative perspective, and includes case studies. The first section covers theoretical issues. It offers an analysis of principles in shaping Dworkin’s theories about international law, a reflection on the role of procedural principles in defining the role of the judiciary, a view on the role of general principles in transnational judicial communication, a study on the recognition of international law from formal criteria to substantive principles, and an inquiry from the viewpoint of neo-constitutionalism. The second section contains studies on the role of general principles in selected legal systems, including International Law, European Union Law as well as Common Law systems. The third section features an analysis of select legal principles in a comparative perspective, with a particular focus on the comparison between European and American experiences. The fourth and last section explores selected principles in given areas of law, including the misuse of the *lex specialis* principle in the relationship between international human rights law and international humanitarian law, the role of the judiciary in Poland as regards discrimination for sexual orientation, and the impact of the ECtHR case law on Italian criminal law with regard to the principle of legality. Overall, the book offers readers a thoughtful reflection on how the interpretation, application, and development of general principles of law by the judiciary contribute to the evolution of legal systems at both the domestic and international levels as well as further their reciprocal interactions.

**Bloom's How to Write about Nathaniel Hawthorne** Laurie A. Sterling,2009 Nathaniel Hawthorne's fiction has left a lasting impression on writers, scholars, and readers around the world.

**Advanced Analytics and Learning on Temporal Data** Thomas Guyet,Georgiana Ifrim,Simon Malinowski,Anthony Bagnall,Patrick Shafer,Vincent Lemaire,2023-03-20 This book constitutes the refereed proceedings of the 7th ECML PKDD Workshop, AALTD 2022, held in Grenoble, France, during September 19-23, 2022. The 12 full papers included in this book were carefully reviewed and selected from 21 submissions. They were organized in topical sections as follows: Oral presentation and poster presentation.

**The Dialectics of Urban and Architectural Boundaries in the Middle East and the Mediterranean** Suzan Girginkaya Akdağ,Mine Dinçer,Meltem Vatan,Ümran Topçu,İrem Maro Kırış,2021-06-01 This edited volume informs readers about changing norms and meanings of borders and underlines recent scenarios that shape these borders. It focuses mainly on the Mediterranean and Middle East regions through the following questions: What are the social, cultural, philosophical, political, economic and aesthetic reasons for spatial segregation within contemporary territories and cities? In the world of globalization and networks, what are the new limitations of space? What are the alienating differences between interior and exterior, private and public, urban and rural, local and global, and real and virtual? Are spatial definitions and divisions more likely to be weakened (if not totally erased) by effects of globalization and mobility, similar to the dissolution of borders between countries? Or are local practices and measures likely to become more apparent with emerging trends such as sustainability and identity? Authored by international scholars, all chapters are arranged under four main parts: Urban and Rural, Global and Local, Physical and Sensual, Real and Virtual. Hence, different concepts and definitions of borders along with varying methods and tools for questioning their essence in architectural and urban spaces will be introduced. For example, in the rural and urban context, environments, settlements-housing, landscape, transformation, conservation and development; in the global and local context, styles, identity, universal design, sustainability, globalization and networks, mobility and migration; in the physical and sensual context, design studies and methodologies, environmental psychology, aesthetic reasoning, sense of place and well-being, and in the real and virtual context, realities, tools and communities are the main themes of the chapters. This book will be an essential source for professionals, scholars, and students of architecture and urban design with a view to understanding multidisciplinary perspectives in designing borders as well as the dialectical relationship between borders and space.

**Putting Social Media and Networking Data in Practice for Education, Planning, Prediction and Recommendation** Mehmet Kaya,Şuayip Birinci,Jalal Kawash,Reda Alhaji,2019-12-27 This book focusses on recommendation, behavior, and anomaly, among of social media analysis. First, recommendation is vital for a variety of applications to narrow down the search space and to better guide people towards educated and personalized alternatives. In this context, the book covers supporting students, food venue, friend and paper recommendation to demonstrate the power of social media data analysis. Secondly, this book treats behavior analysis and understanding as important for a variety of applications, including inspiring behavior from discussion platforms, determining user choices, detecting following patterns, crowd behavior modeling for emergency evacuation, tracking community structure, etc. Third, fraud and anomaly detection have been well tackled based on social media analysis. This has is illustrated in this book by identifying anomalous nodes in a network, chasing undetected fraud processes, discovering hidden knowledge, detecting clickbait, etc. With this wide coverage, the book forms a good source for practitioners and researchers, including instructors and students.

**Rethinking Anti-Discriminatory and Anti-Oppressive Theories for Social Work Practice** Christine Cocker,Trish Hafford-Letchfield,2014-07-23 For years anti-discriminatory and anti-oppressive practice have been embedded in the social work landscape. Thinking beyond the mainstream approaches, this book critically examines some of the core concepts and issues in social work, providing fresh perspectives and opportunities for educators, students and practitioners of social work.

**To Define and Inform** Saihong Li Rasmussen,2010-05-11 To Inform and Define: An Analysis of Information Provided in Dictionaries Used by Learners of English in China and Denmark presents a masterly synthesis of lexicographical theory in relation to bilingual and learner's dictionaries and advances a radical argument about how such dictionaries are used and how they should be improved for the convenience of students. By tracing the history of the terms 'semantic' and 'pragmatic' in linguistics and philosophy, Saihong Li shows the weakness of any conceptual distinction between them. She goes on to demonstrate how inappropriate these terms are for thinking about the ways in which words are defined and explained in dictionaries. The theoretical argument is supported by detailed and comparative empirical research: learners of English as a second language in both China and Denmark were interviewed about their experiences as users of standard learner's dictionaries. The results are presented in tabular form and their interpretation is statistically informed. This is a path-breaking study. Saihong Li makes an important contribution to lexicographical theory, and advances a sophisticated methodology for the comparative study of English-language learning on an international scale and in the global marketplace of learner's dictionaries. Her work will be of great value for language teachers, lexicographers, and students of interpretation, translation and language pedagogies. To Inform and Define should also attract

serious attention from editors and publishers of learner's dictionaries.

**Private Lawyers and the Public Interest** Robert Granfield,Lynn Mather,2009-11-04 This collection of original essays by leading and emerging scholars in the field examines the history, conditions, organization, and strategies of pro bono lawyering. Private Lawyers and the Public Interest: The Evolving Role of Pro Bono in the Legal Profession traces the rise and impact of the American Bar Association's campaign to hold lawyers accountable for a commitment to public service and to encourage public service within law schools. Combining empirical legal research with reflections by practitioners and theorists about the meaning and practice of pro bono legal work, this collection of essays interrogates the public service ideals that are inscribed within the legal profession and places these ideals within a broader social, economic, ideological, and normative context. Particular attention is paid to the factors that explain why lawyers engage in pro bono work and the ways in which their views of pro bono are mediated by the institutional context of their legal practice. The book also explores the concept of public in public service and compares pro bono as a means of delivering legal services with other mechanisms such as state funding. Collectively, these essays investigate the evolving role of pro bono in the legal profession and in law schools, the relationship between pro bono ideals and pro bono in practice, the way that pro bono is shaped by external forces beyond the individual practitioner, and the multi-faceted nature of legal professionalism as expressed through pro bono practice.
