The Rate and Direction of Inventive Activity

Revisited Josh Lerner, Scott Stern, 2012-03-02 While the importance of innovation to economic development is widely understood, the conditions conducive to it remain the focus of much attention. This volume offers new theoretical and empirical contributions to fundamental questions relating to the economics of innovation and technological change while revisiting the findings of a classic book. Central to the development of new technologies are institutional environments, and among the topics discussed here are the roles played by universities and other nonprofit research institutions and the ways in which the allocation of funds between the public and private sectors affects innovation. Other essays examine the practice of open research and how the diffusion of information technology influences the economics of knowledge accumulation. Analytically sophisticated and broad in scope, this book addresses a key topic at a time when economic growth is all the more topical.

Negotiating Sovereignty and Human Rights

Michaelene Cox, 2016-04-22 Providing an overview of institutional developments and innovations in human rights politics, this volume discusses some of the most important current and emerging human rights issues. It takes stock of the initiatives, policy responses and innovations of past years to identify some of the challenges that will likely require bold and innovative solutions. The contributors focus on actors and/or issues that are outside the mainstream of international human rights politics; the chapters address issues that have only emerged as an important part of the international human rights agenda and generated much advocacy, diplomacy and negotiations since the end of the Cold War. These issues include: the International Criminal Court, the norm of

Responsibility to Protect (R2P), the proliferation of small arms and light weapons and its human rights impact, truth commissions, and the rights of persons with disabilities. The contributions offer a direct challenge to entrenched notions of state sovereignty and represent a departure from established ways of policy making.

Modern American Drama: Playwriting in the 1950s

Susan C. W. Abbotson, 2019-11-14 The Decades of Modern American Drama series provides a comprehensive survey and study of the theatre produced in each decade from the 1930s to 2009 in eight volumes. Each volume equips readers with a detailed understanding of the context from which work emerged: an introduction considers life in the decade with a focus on domestic life and conditions, social changes, culture, media, technology, industry and political events; while a chapter on the theatre of the decade offers a wide-ranging and thorough survey of theatres, companies, dramatists, new movements and developments in response to the economic and political conditions of the day. The work of the four most prominent playwrights from the decade receives in-depth analysis and re-evaluation by a team of experts, together with commentary on their subsequent work and legacy. A final section brings together original documents such as interviews with the playwrights and with directors, drafts of play scenes, and other previously unpublished material. The major writers and their works to receive in-depth coverage in this volume include: * William Inge: Picnic (1953), Bus Stop (1955) and The Dark at the Top of the Stairs (1957); * Stephen Sondheim, Arthur Laurents and Jerome Robbins: West Side Story (1957) and Gypsy (1959); * Alice Childress: Just a Little Simple (1950), Gold Through the Trees (1952) and Trouble in Mind (1955); * Jerome Lawrence and Robert Lee: Inherit

the Wind (1955), Auntie Mame (1956) and The Gang's All Here (1959).

Federal Drug Control Jonathon Erlen, Joseph F Spillane, Rebecca Carroll, William Mcallister, Dennis B Worthen, 2004-06-03 A comprehensive look at the beginnings of the current drug problems in the United States Federal Drug Control: The Evolution of Policy and Practice presents an overview of the key issues and key individuals responsible for the creation of the federal government's efforts to control illegal drugs in the United States, from 1875-2001. The book focuses special attention on federal legislation that constructed the federal drug regulatory machinery and the Supreme Court cases that interpreted these laws and their implementation. An esteemed panel of scholars, including co-editor Joseph Spillane, author of Cocaine: From Medical Marvel to Modern Menace, and William B. McAllister, author of Drug Diplomacy in the Twentieth Century: An International History, traces the internal tensions between factions favoring medicalization and criminalization throughout the 20th century, examining the difficult choices that continue to be made in this ongoing debate. The central question in the government's response to the crisis of illicit drugs in the United States has remained the same for more than 125 years: Should the government rely on educational and treatment programs or turn to the criminal justice system for answers? Federal Drug Control examines the historic turning points of the debate, including the 19th Century origins of the controversy, legislation and subsequent Supreme Court decisions in the 20th Century, international attempts at drug control agreements, and the emergence of new illicit drugs. The book also looks at the influential figures of the debate, including Levi Nutt, Lawrence Kolb, Richard Pearson Hobson, A.G. DuMez, and Harry J. Anslinger who ran the Federal Bureau

of Narcotics (FBN) for more than 30 years. Federal Drug Control examines: the history of cocaine use in the 20th Century the history of marijuana use in the 20th Century the advent of psychotropic drugs in the 1960s the origins of the Harrison Narcotic Act the federal government's efforts to limit the pharmacy profession's control over prescription drugs and much more! Federal Drug Control: The Evolution of Policy and Practice is an essential resource for criminologists, historians, social historians, sociologists, anthropologists, public policymakers, academics, and anyone interested in the broad issues involved in how the federal government deals with the problem of illicit drugs in the United States.

Soil and Water Conservation Advances in the United States Teddy Michael Zobeck, 2010 Have agricultural management efforts begun in the desperation of the Dust Bowl brought us to where we need to be tomorrow? Questions about the environmental footprint of farming make this book required reading. Approximately 62% of the total U.S. land area is used for agriculture, and this land also provides critical ecosystem functions. Authors from each region of the continental United States describe the progress of soil and water conservation to date and visualize how agricultural production practices must change in future years to address the newest challenges.

The Children's Bureau Legacy Administration on Children, Youth and Families, The Children's Bureau, Administration for Children and Families, U.S. Department of Health and Human Services, 2013-04-01 Comprehensive history of the Children's Bureau from 1912-2012 in eBook form that shares the legacy of this landmark agency that established the first Federal Government programs, research and social reform initiatives aimed to improve the safety, permanency and well-being of children, youth and families. In addition

to bios of agency heads and review of legislation and publications, this important book provides a critical look at the evolution of the Nation and its treatment of children as it covers often inspiring and sometimes heart-wrenching topics such as: child labor; the Orphan Trains, adoption and foster care; infant and maternal mortality and childhood diseases; parenting, infant and child care education; the role of women's clubs and reformers; child welfare standards; Aid to Dependent Children; Depression relief; children of migrants and minorities (African Americans, Hispanics, Native Americans), including Indian Boarding Schools and Indian Adoption Program; disabled children care; children in wartime including support of military families and World War II refugee children; Juvenile delinquency; early childhood education Head Start; family planning; child abuse and neglect; natural disaster recovery; and much more. Child welfare and related professionals, legislators, educators, researchers and advocates, university school of social work faculty and staff, libraries, and others interested in social work related to children, youth and families, particularly topics such as preventing child abuse and neglect, foster care, and adoption will be interested in this comprehensive history of the Children's Bureau that has been funded by the U.S. Federal Government since 1912.

Reverence, Resistance and Politics of Seeing the Indian National Flag Sadan Jha, 2016-01-08 This book studies the politics that make the tricolour flag possibly the most revered of the symbols, icons and markers associated with nation and nationalism in twentieth-century India. The emphasis on the flag as a visual symbol aims to question certain dominant assumptions about visibility. Anchored on Mahatma Gandhi's 'believing eye', this study reveals specificities of visual

experience in the South Asian milieu. The account begins with a survey of the pre-colonial period, focuses on colonial lives of the flag, and then moves ahead to explain the contemporary dynamics of seeing the flag in India. The Flag Satyagraha of Jubblepore and Nagpur in 1922-23, the adoption of the Congress Flag in 1931, the resolution for the future flag in the Constituent Assembly of India in 1947, the history of the colour saffron, and the codes governing the flag, as well as legal cases, are all explored in depth in this book.

UFOs Karl Svozil, 2023-08-01 Unidentified phenomena in space, in the Earth's atmosphere, and in waters are too important to leave their exploration to the military and scientific laypersons. Their proper scientific study is important for a variety of reasons; in particular, scientists and the public at large need to know the basic facts, to be informed about the way evidence is recorded, and to understand the difference between reliable evidence and fiction, as well as between plausible explanations and fantasy. With this objective, the book surveys the history of UFO observations, the variety of recorded phenomena, and recounts the efforts of investigative commissions and their published findings. Although wild rumors are demystified in the process, this is not an exercise in rumor-bashing. An open and at the same time critical mindset is the key. Many narratives and hypothesis appear implausible relative to our present state of knowledge; but this alone should not lead to their outright exclusion. Thus the author also pays attention to UFO sightings that have so far eluded explanation in terms of known physics or meteorology. Here the reader will encounter some of the more speculative but scientifically tenable proposals, for example, relating to sudden zigzag motion without apparent inertia or recognizable propulsion, yet always with a clear guide to their

plausibility. Last but not least, the book outlines plans and suggestions for future research capable of revealing the existence and intentions of extraterrestrial intelligences, outer-space engineers, or technologies so far known only from science fiction.

The 1951 Los Angeles Rams George

Bozeka, 2022-04-25 The 1951 Los Angeles Rams were one of the greatest teams in professional football history. Led by pioneer owner Daniel Reeves, head coach Joe Stydahar, and future Hall of Famers Bob Waterfield, Norm Van Brocklin, Elroy Hirsch, Tom Fears, and Andy Robustelli, the team won the NFL championship of that season. In doing this, they defeated the defending champion Cleveland Browns in a fantastic rematch of the 1950 title game. The Rams were the first team in a major professional sports league to relocate to the West Coast, forever changing the face of the NFL and professional sports in America. Fueled by an exciting and accomplished lineup of veteran star players and impactful rookies, the product of the Rams' innovative scouting system and their reintegration of the NFL in 1946, the Rams successfully married the NFL to the glamorous world of Hollywood. Delve into the story of the '51 Rams, the NFL's First West Coast Champions.

United States Foreign Policy 1945-1968 Michael Wayne Santos, 2020-01-31 Between 1945 and 1968, the possibility of Mutual Assured Destruction led to a host of odd realities, including the creation of an affable cartoon turtle named Bert who taught millions of school children that nuclear war was survivable if they simply learned how to duck and cover. Meanwhile, fear of Communism played out against the backdrop of potential Armageddon to provide justification for a variety of covert operations involving regime change, political assassination, and sometimes bizarre plot twists. *United States Foreign Policy 1945-1968: The Bomb,*

Spies, Stories, and Lies takes a fresh look at this complex, often confusing, and frequently farcical period in American and world history.

History of Computing in Education J.A.N.

Lee, John Impagliazzo, 2006-04-11 This work derives from a conference discussing the history of computing in education. This conference is the first of hopefully a series of conferences that will take place within the International Federation for Information Processing (IFIP) and hence, we describe it as the First Conference on the History of Computing in Education (HCE1). These proceedings represent a collection of works presented at the HCE1 Conference held in association with the IFIP 2004 World Computer Congress held in Toulouse, France. Contributions to this volume range from a wide variety of educational perspectives and represent activities from four continents. The HCE1 conference represents a joint effort of the IFIP Working Group 9.7 on the History of Computing and the IFIP Technical Committee 3 on Education. The HCE1 Conference brings to light a broad spectrum of issues and spans four continents. It illustrates topics in computing education as they occurred in the "early days" of computing whose ramifications or overtones remain with us today. Indeed, many of the early challenges remain part of our educational tapestry; most likely, many will evolve into future challenges. Therefore, this work provides additional value to the reader as it will reflect in part the future development of computing in education to stimulate new ideas and models in educational development.

Migration, Nation States, and International Cooperation Randall Hansen, Jobst Koehler, Jeannette Money, 2011 Against a background of past, limited examples of international cooperation, and ambitious hopes for extensive future efforts, this volume puts two related questions to the empirical

test: under which conditions are states prepared to cooperate over international migration, and what form - bilateral, multilateral, formal, informal - will this cooperation take?

Essays from the Margins Luis N Rivera-Pagan, 2015-04-30 These essays emerge from different crucial and complex conflicts: from the memory of a bishop, Bartolome de las Casas, urging the pope of his time to cleanse the church of complicity with violence, oppression, and slavery; from the lament and defiance of so many Middle Eastern women, victims of male domination and too many wars; from the voices bursting out from the colonial margins that dare to question and transgress the norms and laws imposed by colonizers and conquerors; from the emerging and diverse theological disruptions of traditional orthodoxies and rigid dogmatisms; from the denial of human rights to immigrant communities, living in the shadows of opulent societies; from the use of the sacred Hebrew Scriptures to displace and dispossess the indigenous peoples of Palestine. The essays belong to different intellectual genres and conceptual crossroads and are thus illustrative of the dialogic imagination that the Russian intellectual Mikhail Bakhtin considered basic to any serious intellectual enterprise. They are also the literary sediment of years of sharing lectures, dialogues, and debates in several academic institutions in the United States, Mexico, Argentina, Chile, Costa Rica, Malaysia, Switzerland, Germany, and Palestine.

Foggy Mountain Troubadour Penny Parsons, 2016-05-15 With his trademark mandolin style and unequaled tenor harmonies, Curly Seckler has carved out a seventy-seven-year career in bluegrass and country music. His foundational work in Flatt and Scruggs's Foggy Mountain Boys secured him a place in bluegrass history, while his role in The Nashville Grass made him an essential part

of the music's triumphant 1970s revival. Written in close collaboration with Mr. Seckler and those who know him, Foggy Mountain Troubadour is the first full-length biography of an American original. Penny Parsons follows a journey from North Carolina schoolhouses to the Grand Ole Opry stage and the Bluegrass Hall of Fame, from boarding houses to radio studios and traveling five to a car on two-lane roads to make the next show. Throughout, she captures the warm humor, hard choices, and vivid details of a brilliant artist's life as he crisscrosses a nation and a century making music.

Dean Acheson Robert L. Beisner, 2009-03-06 Dean Acheson was one of the most influential Secretaries of State in U.S. history, presiding over American foreign policy during a pivotal era--the decade after World War II when the American Century slipped into high gear. During his vastly influential career, Acheson spearheaded the greatest foreign policy achievements in modern times, ranging from the Marshall Plan to the establishment of NATO. In this acclaimed biography, Robert L. Beisner paints an indelible portrait of one of the key figures of the last half-century. In a book filled with insight based on research in government archives, memoirs, letters, and diaries, Beisner illuminates Acheson's major triumphs, including the highly underrated achievement of converting West Germany and Japan from mortal enemies to prized allies, and does not shy away from examining his missteps. But underlying all his actions, Beisner shows, was a tough-minded determination to outmatch the strength of the Soviet bloc--indeed, to defeat the Soviet Union at every turn. The book also sheds light on Acheson's friendship with Truman--one, a bourbon-drinking mid-Westerner with a homespun disposition, the other, a mustachioed Connecticut dandy who preferred perfect martinis. Over six

foot tall, with steel blue, merry, searching eyes and a wolfish grin, Dean Acheson was an unforgettable character--intellectually brilliant, always debonair, and tough as tempered steel. This lustrous portrait of an immensely accomplished and colorful life is the epitome of the biographer's art.

My Financial Guide to Success Tim Smith, 2011
This book was created to help people open their eyes and see what problems lay ahead for their future and what can be done about it. It will go over the housing crises and why you will not be able to afford a house now or in the years to come if you make a certain income and what you need to do to change this situation. It will also go over why the advice you have been given by your financial planner/advisor or financial news program(s) many no longer be viable in today's economy. This book will give you an insight into what new technologies mean for your career and what jobs may be eliminated or combined.

Containing America Nathan Abrams, Julie Hughes, 2000-01-01
The postwar period in America witnessed a tremendous consumer boom that introduced thousands of new items into the mass market. The contributors to *Containing America* challenge our conceptions of Cold War culture by examining a range of such products - clothes, food, television, magazines, radio, and other forms of entertainment - in order to shed light on how Cold War discourses actually influenced the practices of ordinary behaviour. Their essays address very different sectors of American society - in terms of race, class, ethnicity, sexuality and gender - thus emphasising the multiplicity, diversity, and differing nature of the voices that emerged in cultural production and consumption during the 1950s. *Containing America* points out directions for further research and provides a fresh approach for scholars, students, and others

interested in the culture of the Cold War of the 1950s.

State Sovereignty and International Criminal Law
Morten Bergsmo, LING Yan, 2012-11-19 'State sovereignty' is often referred to as an obstacle to criminal justice for core international crimes by members of the international criminal justice movement. The exercise of State sovereignty is seen as a shield against effective implementation of such crimes. But it is sovereign States that create and become parties to international criminal law treaties and jurisdictions. They are the principal enforcers of criminal responsibility for international crimes, as reaffirmed by the complementarity principle on which the International Criminal Court (ICC) is based. Criminal justice for atrocities depends entirely on the ability of States to act. This volume revisits the relationship between State sovereignty and international criminal law along three main lines of inquiry. First, it considers the immunity of State officials from the exercise of foreign or international criminal jurisdiction. Secondly, with the closing down of the ad hoc international criminal tribunals, attention shifts to the exercise of national jurisdiction over core international crimes, making the scope of universal jurisdiction more relevant to perceptions of State sovereignty. Thirdly, could the amendments to the ICC Statute on the crime of aggression exacerbate tensions between the interests of State sovereignty and accountability? The book contains contributions by prominent international lawyers including Professor Christian Tomuschat, Judge Erkki Kourula, Judge LIU Daqun, Ambassador WANG Houli, Dr. ZHOU Lulu, Professor Claus Kre, Professor MA Chengyuan, Professor JIA Bingbing, Professor ZHU Lijiang and Mr. GUO Yang.
