China and the Internet Christopher R. Hughes, Gudrun Wacker, 2003-12-08 *China and the Internet: Politics of the Digital Leap Forward* is a comprehensive assessment of the political and economic impact of information and communication technologies (ITCs) on Chinese society. It provides in-depth analyses of topics including economic development, civil and political liberties, bureaucratic politics, international relations and security studies. The book covers the aspirations of Chinese policy-makers using the Internet to achieve a 'digital leapfrog' of economic development. Avoiding technical jargon, the book is accessible to anyone interested in the social impact of the Internet and information and communication technologies, from those in academia to business and public policy-makers.

Our Molecular Future Douglas Mulhall, 2010-01-28 This is a vital book for those who care about the environment, society and deploying new technology to check the destructive power of humankind.- Allan Thornton, President, Environmental Investigation Agency, Washington, DC., and recipient of the Albert Schweitzer Medal This book will shake conventional environmental

wisdom to its roots. ... A landmark work that should be read by environmentalists and businesspersons alike.- Patrick Moore, cofounder, Greenpeace; president, Greenspirit

In *Our Molecular Future* [Mulhall] neatly outlines why our increasing ability to manipulate single atoms and molecules is a concern, and lays out the opportunities and threats this technology presents. And it's surprisingly readable, unlike most of the nanobabble in the science journals. In the end, as Mulhall admits, he poses more questions than he answers. But that's a good place to start.-*New Scientist*

I just finished reading Douglas Mulhall's outstanding new book *Our Molecular Future* . . . and I highly recommend it. Put this one at the top of your list! . . . In an easy to read format, with very few forays into geek-speak, Mulhall presents his well considered and thoroughly researched theories. Overall, an excellent overview for those who wish to understand how disruptive and enabling technologies may save us from ourselves and from mother nature. And along the way you will learn a lot about how nanoscale technologies may enhance our lives, provide abundance for all, and greatly raise the standard of living for everyone. . . . Rating: five stars out of five.- Rocky Rawstern, *Nanotech Now*

What Alvin Toffler's *Future Shock* was to the 20th century, *Our Molecular Future* will be to the 21st century. 'What will happen to our jobs, health care, and investments when the molecular revolution hits? How might artificial intelligence transform our lives? How can molecular technologies help us cope with climate changes, earthquakes, and other extreme natural threats? *Our Molecular Future* explores some intriguing possibilities that answer these questions and many others. Douglas Mulhall describes the exponential changes that are about to be wrought by the nanotechnology and robotic revolutions, which promise to reduce the scale of

computing to the nanometer—a billionth of a meter—while increasing computing power to almost unimaginable levels. The resulting convergence of genetics, robotics, and artificial intelligence may give us hitherto undreamed-of capacities to transform our environment and ourselves. In the not-so-distant future, our world may include machines that scour our arteries to prevent heart disease, cars and clothes that change color at our whim, exotic products built in our own desktop factories, and enhancements to our personal financial security despite greatly accelerated obsolescence. But while technology is making these fantastic leaps, we may also encounter surprises that throw us into disarray: climate changes, earthquakes, or even a seemingly improbable asteroid collision. These extremes are not the nightmare scenarios of sensationalists, Mulhall stresses, nor are many of them human induced. Instead, they may be part of nature's cycle—recurring more often than we've thought possible. The good news is that this convergence of catastrophe and technological transformation may work to our advantage. If we're smart, according to Mulhall, we can use molecular machines to protect ourselves from nature's worst extremes, and harness their potential benefits to usher in an economic renaissance. This visionary link between future technology and past disasters is a valuable guide for every one of us who wants to be prepared for the twenty-first century.

Further Praise for OUR MOLECULAR FUTURE: A provocative and profoundly convincing message from the future. —Graham Hancock, archaeological journalist and author of *Fingerprints of the Gods*

In a breezy, journalistic style, *Our Molecular Future* takes us on a tour through some of the issues that will preoccupy ma

Christmas in the Crosshairs Gerry Bowler, 2016-09-13

An Anglican priest hands out brass knuckles to his congregation, preparing to battle anti-Christmas fanatics. Fascists insist that the Winter Solstice is the real Christmas, while Communists stage atheist musicals outside of churches on Christmas Eve. Activists vandalize shops that start touting the holiday in October and anti-consumerists sing parody carols in shopping malls. Is there a war on Christmas? As Gerry Bowler demonstrates in *Christmas in the Crosshairs*, there is and always has been a war, or several wars, on Christmas. A cherished global phenomenon, Christmas is the biggest single event on the planet. For Christians it is the second-most sacred date on the calendar, but it also engages billions of people who are caught up in its commercialism, music, sentiment, travel, and frenetic busyness. Since its controversial invention in the Roman Empire, Christmas has struggled with paganism, popular culture, and fierce Christian opposition; faced abolition in Scotland and New England; and braved neglect and near-death in the 1700s, only to be miraculously reinvented in the 1800s. The twentieth century saw it banned by Bolsheviks and twisted by Nazis. Since then, special interest groups of every stripe have used the holiday's massive popularity to draw attention to their causes. *Christmas in the Crosshairs* tells the story of the tug-of-war over Christmas, replete with cross-dressing priests, ranting Puritans, and atheist witches. In this eye-opening history of Christmas and its opponents from the

beginning up to the present day, Bowler gives us a shocking, and richly entertaining, new look at the tradition we thought we knew so well.

New World Empire William H. Thornton, 2005 In *New World Empire*, William H. Thornton offers an alternative road map for America's relations with the Islamic world. He cogently argues that neoglobalist policies adopted after 9/11 have pushed much of the Muslim world into the enemy camp. Worse still, the White House has redefined America in stark contrast to this phantom adversary. The resulting new world empire fails to recognize that jihadist militants have their worst enemy in civil Islam. Thornton sets forth a powerful case for salvaging this vital link between America and the world it has lost. Visit our website for sample chapters!

Globalisation and the New Terror David Martin Jones, 2004-01-28 Examines trends in new terror, understood here to be the capacity of sub-state actors to secure religious or politically motivated objectives by

violent means. Argues that while the use of violence to achieve political ends is scarcely original, what distinguishes new terror is its potential for lethality. Australian author.

World poverty Townsend, Peter, Gordon,

David, 2002-09-25 World poverty is an important book offering fresh insights into how to tackle poverty worldwide. With contributions from leading scholars in the field both internationally and in the UK, the book asks whether existing international and national policies are likely to succeed in reducing poverty across the world. It concludes that they are not and that a radically different international strategy is needed. This book is a companion volume to Breadline Europe: The measurement of poverty (The Policy Press, 2001). The focus of World poverty is on anti-poverty policies rather than the scale, causes and measurement of poverty. A wide range of countries is discussed including countries such as China and India, which have rarely been covered elsewhere. The interests of the industrialised and developing world are given equal attention and are analysed together. Policies intended to operate at different levels - international, regional, national and sub-national - ranging from the policies of international agencies like the UN and the World Bank through to national governments, groups of governments and local and city authorities - are examined. Key aspects of social policy, like 'targeting' and means-testing, de-regulation and privatisation, are considered in detail.

World poverty will become a definitive point of reference for anyone working, studying or researching in the poverty field. Studies in poverty, inequality and social exclusion series Series Editor: David Gordon, Director, Townsend Centre for International Poverty Research. Poverty, inequality and social exclusion remain the most fundamental problems that humanity faces in the 21st century. This exciting series, published in association with the Townsend Centre for International Poverty Research at the University of Bristol, aims to make cutting-edge poverty related research more widely available. Russian Civil-Military Relations and the Origins of the Second Chechen War Sz&ászdi, Lajos F.,2008-08-29

This book has relevance for those interested in understanding Russia's course in international relations under the leadership of Vladimir Putin. This book will inform the reader and is especially relevant in light of the events of 2008 in the Caucasus and the war in Georgia, in particular. The author explains the ideology of Neo-Eurasianism, which in turn inspires the policy-thinking of the Kremlin. Also studied is Putin's origins in the KGB, from the previous posts of Secretary of the Security Council and Director of the FSB, and his rise to power in the crucial year of 1999, when he became Russian Prime Minister. The author highlights the continuing trend of appointing high-ranking officers of the Russian intelligence community to senior positions in the government, studying this in the context of Russian civil-military-intelligence relations. The author reached the conclusion, back in 2003, that the members of Russian intelligence hold the reins of power above the civilian and military elements of the Russian government. The author returns to the Kosovo

Crisis of 1999, discussing also the motives that led the Kremlin and Putin to invaded Chechnya for a second time in a decade. Parallels can be drawn to the 2008 Russian invasion of Georgia and the roots of the Neo-Eurasianist ideology that is behind the two invasions are examined. This book will help the reader understand Russia's current and future distribution of power in the Caucasus, the Balkans and the world at large, Moscow's search for a multipolar world, and its opposition to U.S. hegemony.

Suiting Themselves Sharon Beder, 2012-06-25 In this brilliantly researched expos 'communications Rottweiler' Sharon Beder blasts open the backrooms and boardrooms to reveal how the international corporate elite dictate global politics for their own benefit. Beder shows how they created business associations and think tanks in the 1970s to drive public policy, forced the worldwide privatization and deregulation of public services in the 1980s and 1990s (enabling a massive transfer of ownership and control over essential services) and, still not satisfied, have worked relentlessly since the late 1990s to rewrite the very rules of the global economy to funnel wealth and power into their pockets. Want a globalized and homogenized world of conflict, poverty and massive environmental degradation run by a corporate oligarchy that wipes its feet on democracy? Or a democratic world, where poverty is history, companies work for people and clean water is a right, not a privilege you pay for? Beder's message is clear

- it's your world, and it's time to fight for it.

Curriculum, Community, and Urban School

Reform B. Franklin, 2010-03-01 This book asserts that efforts to reform schools, particularly urban schools, are events that engender a host of issues and conflicts that have been interpreted through the conceptual lens of community.

Making Foreign Investment Safe Louis T. Wells, Rafiq Ahmed, 2006-12-21 With real case stories, Wells and Ahmed bring to life both the hopes for and the failures of international guarantees of property rights for investors in the developing world. Their cases focus on infrastructure projects, but the lessons apply equally to many other investments. In the 1990's inexperienced firms from rich countries jumped directly into huge projects in some of the world's least developed countries. Their investments reflected almost unbridled enthusiasm for emerging markets and trust in new international guarantees. Yet within a few years the business pages of the world press were reporting an exploding number of serious disputes between foreign investors and governments. As the expected bonanzas proved elusive and the protections weaker than anticipated, many foreign investors became disenchanted with emerging markets. So bad were the outcomes in some cases that a few notable infrastructure firms came close to bankruptcy; several others hurriedly fled poor countries as projects soured. In this book, Louis Wells and Rafiq Ahmed show why disputes developed, point out how investments and disputes have changed over time, explore why various firms responded differently to crises, and question the basic wisdom of some of the enthusiasm for privatization. The authors tell how firms, countries, and multilateral development organizations can build a conflict-management system that balances the

legitimate economic and social concerns of the host countries and those of investors. Without these changes, multinational corporations will lose profitable opportunities and poor countries will not gain the contributions that foreign investment can make toward alleviating poverty.

The Making of Southeast Asia Amitav

Acharya, 2013-02-15 Developing a framework to study what makes a region, Amitav Acharya investigates the origins and evolution of Southeast Asian regionalism and international relations. He views the Association of Southeast Asian Nations (ASEAN) from the bottom up as not only a U.S.-inspired ally in the Cold War struggle against communism but also an organization that reflects indigenous traditions. Although Acharya deploys the notion of imagined community to examine the changes, especially since the Cold War, in the significance of ASEAN dealings for a regional identity, he insists that imagination is itself not a neutral but rather a culturally variable concept. The regional imagination in Southeast Asia imagines a community of nations different from NAFTA or NATO, the OAU, or the European Union. In this new edition of a book first published as *The Quest for Identity* in 2000, Acharya updates developments in the region through the first decade of the new century: the aftermath of the financial crisis of 1997, security affairs after September 2001, the long-term impact of the 2004 tsunami, and the substantial changes wrought by the rise of China as a regional and global actor. Acharya argues in this important book for the crucial importance of regionalism in a different part of the world.
