Data Mining and Decision Support Dunja Mladenic, Nada Lavrač, Marko Bohanec, Steve Moyle, 2012-12-06 Data mining deals with finding patterns in data that are by user-definition, interesting and valid. It is an interdisciplinary area involving databases, machine learning, pattern recognition, statistics, visualization and others. Decision support focuses on developing systems to help decision-makers solve problems. Decision support provides a selection of data analysis, simulation, visualization and modeling techniques, and software tools such as decision support systems, group decision support and mediation systems, expert systems, databases and data warehouses. Independently, data mining and decision support are well-developed research areas, but until now there has been no systematic attempt to integrate them. Data Mining and Decision Support: Integration and Collaboration, written by leading researchers in the field, presents a conceptual framework, plus the methods and tools for integrating the two disciplines and for applying this technology to business problems in a collaborative setting.

The Fortune at the Bottom of the Pyramid, Revised and Updated 5th Anniversary Edition C.K. Prahalad, 2009-07-15 Drawing on Prahalad's breakthrough insights in *The Fortune at the Bottom of the Pyramid*, great companies worldwide have sought to identify, build, and profit from new markets amongst the world's several billion poorest people, while at the same time helping to alleviate poverty. Five years after its first publication, this book's ideas are no longer theory: they are proven, profitable reality. In the 5th Anniversary Edition, Prahalad thoroughly updates his book to reveal all that's been learned about competing and profiting at the bottom of the pyramid. Prahalad outlines the latest strategies and tactics that companies are utilizing to succeed in the developing world. He interviews several innovative CEOs to discuss what they've learned from their own initiatives, including the Unilever business leader who's built a billion-dollar business in India. You'll find a new case study on Jaipur Rugs' innovative new global supply chain; updates to earlier editions' key cases; and up-to-the-minute information on the evolution of key industries such as wireless, agribusiness, healthcare, consumer goods, and finance. Prahalad also offers an up-to-date assessment of the key questions his ideas raised: Is there truly a market? Is there scale? Is there profit? Is there innovation? Is this a global opportunity? Five years ago, executives could be hopeful that the answers to these questions would be positive. Now, as Prahalad demonstrates, they can be certain of it.

Visions of Turmoil and Eternal Rest Ebenezer A. Belete, Warren A. Shipton, 2011-09-19 One of the most fascinating periods of history must certainly be around the time of Daniel the prophets time (sixth and fifth centuries B.C.).

It was then that many of the philosophies that were to exert a telling influence on Western thought and Christianity arose. This is the period when Buddha, Confucius, Lao-Tzu, Zoroaster and Pythagoras developed their ideas. In this book, we consider the coded messages written by Daniel and later by the apostle John (preserved in the Bible). History offers outstanding confirmation of the accuracy of their predictions. We indicate how past and developing world events fit into the fabric of prophecy.

Cyber Communities in Rural Asia Kavita Karan, 2004 This book focuses on the extent to which the Internet is fast penetrating the semi-urban and rural areas of Asia and the ways in which rural communities are accessing and using the Internet. It examines the infrastructure, use, and impact of the Internet at the grassroots level in seven representative South Asian and Southeast Asian countries: Bangladesh, China, India, Indonesia, Laos, the Philippines, and Sri Lanka. These countries are at various stages of development in their attempts to build epistemic societies, bridge the digital divide, and improve access to services delivered through the Internet for their citizens leading to the gradual development of the cyber communities. The case studies and surveys are supported by secondary data and interviews. The major areas of concern include frequency of access, time spent, and purposes of using the Internet. The problems faced by the citizens, including those of infrastructure, content, and social factors are examined to evaluate how these barriers could be sorted out in the future. The challenges faced by governments in transforming their societies into the epistemic variety and much of the debate

and interventions within these countries have been identified and compared, leading to a better understanding of how the Internet can catalyze development in Asia.--BOOK JACKET.

Participatory Planning in Plan Preparation Shashikant Nishant Sharma,2014-01-16 Delhi is a large city-state with area of 1483 sq km and a population of 16.7 million where more than two third of its area as urban. Rest of the area is fast urbanizing. For a city like this the planning process is challenging and magnitude of problems is enormous. It should be noted that Municipal Corporation of Delhi initiated projects of preparation of 'Local Area Plan' for 36 wards through various planning consultants to address planning issues and problems on identifying the ground realities. Development in Delhi is guided by the Master Plan 2021 and various Zonal Development Plans. The increase in urban population as a whole and increased migration to Delhi has led to a number of planning and development issues as land are a scarce resource in Delhi bounded by other states having their own development controls and guidelines. In order to counter the ill-effects of urban problem diagnosis and rational planning model, the planners and policy makers of Delhi started to engage public in various states of planning and plan implementation in various forms and degrees. The engagement of public in planning has stated long back in 1962 when the first Master Plan for Delhi was prepared. Even after 50 years of planning for people the planners and policy makers thought for evolving planning with people approach in planning and this culminated in Delhi in the form of concept of Local Area Plan. In 2005, pilot project for the preparation of Local Area Plan got initiated and got completed and the result was not satisfactory and again in 2010 pilot project for the preparation of Local Area Plan started and by 2012 it got completed. It should be noted that Delhi is one of the Indian city to have a Master Plan for controlling urban growth and development. The need of the people and demand for the development goes hand in hand and this lead to the participation of the public in the plan making process so as to entertain their grievances and make them partner in the development.

Private Rights and Public Problems Keith Eugene Maskus,2012 Consumers constantly confront intellectual property rights (IPRs) every day, from their morning cup of Starbucks coffee to the Intel chip on their computer at work. Intellectual property rights help protect creative inventions in the form of trademarks, copyrights, and patents.

Despite legal protection, many goods--including music and video files--are easily copied or shared, which affects industries, innovators, and customers. In his follow-up to one of the most popular PIIE titles of all time, Keith Maskus looks at the expansion of private legal rights into international trade markets, not only for technological items but also for international public goods like vaccines and prescription drugs. Private Rights and Public Problems assesses IPR issues for users, producers, and innovators and the difficulty of establishing an international policy regime that governs IPRs in all markets. Post-industrial countries have preferential terms for licensing and selling products, in part because they develop more global brands and products. Maskus observes that in these countries the primacy of private property raises contentious international debate between innovation owners in rich countries and followers and users in emerging and poor countries. Maskus explores if increased privacy regulations limit innovation and pose artificial and real barriers, such as decreased information accessibility and increased cost. This book addresses a fundamental issue: should basic scientific and technological knowledge be commoditized? In this guide to the current global impact of IPRs, the author analyzes the economic contribution of IPRs underlying features: innovation and access to international technologies.
