The American Flag John R. Vile, 2018-10-05 At a time when the U.S. flag is both a source of both pride and controversy, this volume provides the first encyclopedic A-to-Z treatment of the U.S. flag in American history, culture, and law. This title is a comprehensive resource for understanding all aspects of the American flag and its relationship to the American people. The encyclopedia provides a thorough historical examination of key developments in the flag's design as well as laws and court decisions related to the flag and the First

Amendment. In relation to the flag's history, it also discusses evolving public attitudes about its importance as a national symbol. The encyclopedia contains illuminating scholarly essays on presentations of the flag in American politics, the military, and popular culture including art, music, and journalism. Additionally, these essays address important rules of flag etiquette and modern controversies related to them, from flag-burning to refusing to stand during the playing of the U.S. National Anthem.

The Emancipation Circuit Thulani Davis, 2022-04-01 In *The Emancipation Circuit* Thulani Davis provides a sweeping rethinking of Reconstruction by tracing how the four million people newly freed from bondage created political organizations and connections that mobilized communities across the South. Drawing on the practices of community they developed while enslaved, freedpeople built new settlements and created a network of circuits through which they imagined, enacted, and defended freedom. This interdisciplinary history shows that these circuits linked rural and urban organizations, labor struggles, and political culture with news, strategies, education, and mutual aid. Mapping the emancipation circuits, Davis shows the geography of ideas of freedom---circulating on shipping routes, via army maneuvers, and with itinerant activists---that became the basis for the first mass Black political movement for equal citizenship in the United States. In this work, she reconfigures understandings of the evolution of southern Black political agendas while outlining the origins of the enduring Black freedom struggle from the Jim Crow era to the present.

School Culture Development in China - Perceptions of Teachers and Principals

Kai Yu,Xiangyun Du,Xiaoju Duan,2022-09-01 School culture is playing an increasingly important role in school performance and educational development. Within the national campaign in China for the innovative and sustainable development of education, local governments in Beijing Municipality have encouraged and facilitated educational innovation toward better school culture. In recent years various initiatives have been undertaken by a select group of schools to develop strategies and further action toward innovation and change. This book documents an investigation of how teachers and principals perceive school culture development in China. A survey was conducted among 1,992 informants from 37 schools (located in four different districts) in Beijing Municipality. The results of this study indicated that the respondents had overall positive perceptions of school culture construction and development in the educational change process. In general, they showed a positive attitude toward the school culture improvement initiatives, reported satisfaction about their current school culture and held confidence in the direction their school culture is heading. The study demonstrated that certain factors, such as school geographical location and respondents' job duty, job title, and gender, make a difference in how participants perceive their school's culture. Teachers and principals from a less economically developed district had less awareness of, involvement in, and understanding of school culture development in all its aspects. A notable gap between teachers and principals was

identified in their perception of the core values and norms of the school and of communication between teachers and principals. This study suggests that for educational development to be further carried forward successfully, there is an urgent need for better distribution of educational resources (both financial and leadership), common understanding, agreed-upon goals, and efficient communication between principals and teachers. Keywords Educational philosophy, Ethics, Chinese context, Gender, Learning

Markets of Dispossession Julia Elyachar, 2005-10-26 What happens when the market tries to help the poor? In many parts of the world today, neoliberal development programs are offering ordinary people the tools of free enterprise as the means to well-being and empowerment. Schemes to transform the poor into small-scale entrepreneurs promise them the benefits of the market and access to the rewards of globalization. *Markets of Dispossession* is a theoretically sophisticated and sobering account of the consequences of these initiatives. Julia Elyachar studied the efforts of bankers, social scientists, ngo members, development workers, and state officials to turn the craftsmen and unemployed youth of Cairo into the vanguard of a new market society based on microenterprise. She considers these efforts in relation to the alternative notions of economic success held by craftsmen in Cairo, in which short-term financial profit is not always highly valued. Through her careful ethnography of workshop life, Elyachar explains how the traditional market practices of craftsmen are among the most vibrant modes of market life in Egypt. Long condemned as backward, these existing market practices have been seized on by social scientists and development institutions as the raw materials for experiments in “free market” expansion. Elyachar argues that the new economic value accorded to the cultural

resources and social networks of the poor has fueled a broader process leading to their economic, social, and cultural dispossession.

Am I Not a Human? (13): The Suffering of the Palestinians from Israeli Roadblocks in the West bank Fatima Itani, Mohammad Dawood, 2017-12-11 Al-Zaytouna Centre has issued the English version of its book entitled “The Suffering of Palestinians From Israeli Roadblocks in the West Bank” prepared by Fatima Itani and Mohammad Dawood, edited by Dr. Mohsen Moh’d Saleh and Rana Sa’adah. This book is the thirteenth in the series “Am I not a Human?” through which Al-Zaytouna Centre seeks to provide a comprehensive picture of the suffering of the Palestinian people caused by the Israeli occupation, in a style that addresses the mind and the heart, within an academic, systematic and documented frame. This 108-page book addresses the suffering of Palestinians at Israeli checkpoints in the West Bank (WB) and the most serious violations committed by the occupation against the Palestinians at these roadblocks, which are spread out in their various forms all over the WB. The book reviews the Israeli policy of disconnecting Palestinian lands and humiliating Palestinians. It is followed by a legal preamble that reviews international and humanitarian laws that prove the illegality of the barriers. Then it gives an account of how the numbers and types of these barriers have evolved in the WB during the period 2001–2014. The book points out how setting up Israeli checkpoints in the WB hinders people’s movement, prevents them from going about their daily business in a normal manner and wears them out economically, mentally and socially. It also points out that, in spite of their different types, they are all there to break the Palestinians’ will. The Israeli checkpoints are

considered among the worst manifestations of human rights violations; as in many respects, they are actually linked to practices that infringe on people's lives and violate their dignity, safeguarded in international charters and conventions. The book points out that the logic that must be adhered to in demanding immediate removal of the occupation's barriers is the illegitimacy of the occupation. As these roadblocks detain behind them Palestinians' hope of living in a free country, in which they enjoy freedom of movement, work, education ... and others.

Lions' Commentary on UNIX 6th Edition with Source Code John Lions,1996-01-01
For the past 20 years, UNIX insiders have cherished and zealously guarded pirated photocopies of this manuscript, a hacker trophy of sorts. Now legal (and legible) copies are available. An international who's who of UNIX wizards, including Dennis Ritchie, have contributed essays extolling the merits and importance of this underground classic.

Visual InterDev 6 Unleashed Paul B. Thurrott,1999 Ready-to-use building blocks for integrated circuit design. Why start coding from scratch when you can work from this library of pre-tested routines, created by an HDL expert? There are plenty of introductory texts to describe the basics of Verilog, but Verilog Designer's Library is the only book that offers real, reusable routines that you can put to work right away. Verilog Designer's Library organizes Verilog routines according to functionality, making it easy to locate the material you need. Each function is described by a behavioral model to use for simulation, followed by the RTL code you'll use to synthesize the gate-level implementation. Extensive test code is included for each function, to assist you with your own verification efforts. Coverage

includes: Essential Verilog coding techniques Basic building blocks of successful routines State machines and memories Practical debugging guidelines Although Verilog Designer's Library assumes a basic familiarity with Verilog structure and syntax, it does not require a background in programming. Beginners can work through the book in sequence to develop their skills, while experienced Verilog users can go directly to the routines they need. Hardware designers, systems analysts, VARs, OEMs, software developers, and system integrators will find it an ideal sourcebook on all aspects of Verilog development.

Gestaltung der zukünftigen Candidate Journey in Deutschland. Fachkräfte- und Personalmangel im Einzelhandel, 2022-12-07 Studienarbeit aus dem Jahr 2022 im Fachbereich Führung und Personal - Recruiting, , Sprache: Deutsch, Abstract: Diese Arbeit versucht, die folgenden Forschungsfragen zu beantworten: Wie muss die Candidate Journey für die Future Talents gestaltet sein, um in Zeiten von Fachkräfte- und Personalmangel im Einzelhandel geeignete neue Mitarbeiter rekrutieren zu können? Und wie würden sich Future Talents gerne bewerben? Zielsetzung dieser Arbeit ist es, Faktoren der Candidate Journey der Zukunft auszuarbeiten. Es sollen Handlungsempfehlungen aufgedeckt werden, welche die Anforderungen der Bewerber erfüllen. Um die vorangestellten Forschungsfragen bearbeiten zu können, ergibt sich folgende Gliederung der Arbeit: Nach einleitender Problemstellung und Zielsetzung folgen im zweiten Kapitel die theoretischen Grundlagen zum Forschungsthema. Anschließend erfolgt im dritten Kapitel die Vorstellung der geplanten Forschungsmethodik und Vorgehensweise. Im darauffolgenden Kapitel erfolgt die Auswertung der Datenerhebung. Das letzte Kapitel umfasst eine Überprüfung der Zielerreichung in Form eines Fazits mit abschließendem Ausblick.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems
