Monthly Catalog of United States Government Publications ,2000

Operating Grants for Nonprofit Organizations 2005 Grants Program,2005-04-30 Few needs are more important to a nonprofit organization than funding for operating costs. In this new directory, nonprofits and other organizations seeking grants and funding opportunities to support general operating expenses will find over 1,300 current operating grants—organized by state—with contact and requirement information for each. Three user-friendly indexes (subject, sponsor, and geographic restriction) help grantseekers quickly find the ideal funding opportunity.

The Third Force Ann M. Florini,2012-10-24 From the landmines campaign to the Seattle protests against the WTO to the World Commission on Dams, transnational networks of civil society groups are seizing an ever-greater voice in how governments run countries and how corporations do business. This volume brings together a multinational group of authors to help policy makers, scholars, business people, and activists themselves understand the profound issues raised. Contributors include Fredrik Galtung, Rebecca Johnson, Sanjeev Khagram, Chetan Kumar, Motoko Mekata, Thomas Risse, P.J. Simmons, and Yahya Dehqanzada.

Art Information and the Internet Lois Swan Jones,2013-12-16 In the first book of its kind, art information expert Lois Swan Jones discusses how to locate visual and textual information on the Internet and how to evaluate and supplement that information with material from other formats--print sources, CD-ROMS, documentary videos, and microfiche sets--to produce excellent research results. The book is divided into three sections: Basic Information Formats; Types of Websites and How to Find Them; and How to Use Web Information. Jones discusses the strengths and limitations of Websites; scholarly and basic information resources are noted; and search strategies for finding pertinent Websites are included. Art Information and the Internet also discusses research methodology for studying art-historical styles, artists working in various media, individual works of art, and non-Western cultures--as well as art education, writing about art, problems of copyright, and issues concerning the buying and selling of art. This title will be periodically updated.

Internet Issues and Applications, 1997-1998 Bert J. Dempsey,Paul Jones,1998 Covering everything from today's issues to emerging technologies, this essential resource for teachers developing internet-related courses also sheds light for anyone interested in the evolution of the internet and its impact on today's society.

Digital Dilemmas M.I. Franklin,2013-11-19 Digital Dilemmas looks at the dynamics of power and resistance surrounding the internet. It focuses on how publics, nation-states, and multilateral institutions are being continually reinvented in local and global decision-making domains that are accessed and controlled by a relative few. Importantly it unpacks the ways in which computer-mediated power relations play out as on the ground and cyberspatial practices and discourses that collude and collide with one another at the personal, community, and transnational level. Case studies include homelessness and the internet, rights-based advocacy for the online environment at the United Nations, and how the ongoing battle between proprietary and open source software designs affects ordinary people and policy-making. The result is an innovative and groundbreaking critique of the way new paradigms of power and resistance forged online reshape traditional power hierarchies offline, at home and abroad.

The Internet, Development, Human Rights and the Law in Africa Danwood M. Chirwa,Caroline B. Ncube,2023-03-17 This book tracks and critiques the impact of the internet in Africa. It explores the legal policy implications of, and legal responses to, the internet in matters straddling human rights, development, trade, criminal law, intellectual property and social justice from the perspective of several African countries and the region. Well-known and emerging African scholars consider whether access to the internet is a human right, the implications on the right to privacy, e-commerce, cybercrime, the opportunities and dangers of admitting electronic evidence, the balancing of freedom of expression with the protection of intellectual property and how different African legal systems address this tension. This book will be an invaluable resource for a wide range of stakeholders, including researchers, scholars and postgraduate students; policymakers and

legislators; lawyers and judicial officers; crime-fighting agencies; national human rights institutions; civil society organisations; international and regional organisations; and human rights monitoring bodies.

East Side Access in New York, Queens, and Bronx Counties, New York, and Nassau and Suffolk Counties, New York ,2001

Internet Child Pornography and the Law Yaman Akdeniz,2016-05-23 This book provides a critical assessment of the problem of internet child pornography and its governance through legal and non-legal means, including a comparative assessment of laws in England and Wales, the United States of America and Canada in recognition that governments have a compelling interest to protect children from sexual abuse and exploitation. The internet raises novel and complex challenges to existing regulatory regimes. Efforts towards legal harmonization at the European Union, Council of Europe, and United Nations level are examined in this context and the utility of additional and alternative methods of regulation explored. This book argues that effective implementation, enforcement and harmonization of laws could substantially help to reduce the availability and dissemination of child pornography on the internet. At the same time, panic-led policies must be avoided if the wider problems of child sexual abuse and commercial sexual exploitation are to be meaningfully addressed.

Connected Viewing Jennifer Holt,Kevin Sanson,2013-12-04 As patterns of media use become more integrated with mobile technologies and multiple screens, a new mode of viewer engagement has emerged in the form of connected viewing, which allows for an array of new relationships between audiences and media texts in the digital space. This exciting new collection brings together twelve original essays that critically engage with the socially-networked, multi-platform, and cloud-based world of today, examining the connected viewing phenomenon across television, film, video games, and social media. The result is a wide-ranging analysis of shifting business models, policy matters, technological infrastructure, new forms of user engagement, and other key trends affecting screen media in the digital era. Connected Viewing contextualizes the dramatic transformations taking place across both media industries and national contexts, and offers students and scholars alike a diverse set of methods and perspectives for studying this critical moment in media culture.

Information Communication Technology and Poverty Alleviation Jack J. Barry,2018-07-24 Despite global economic disparities, recent years have seen rapid technological changes in developing countries, as it is now common to see people across all levels of society with smartphones in their hands and computers in their homes. However, does access to Information Communication Technologies (ICTs) actually improve the day-to-day lives of low-income citizens? This book argues that access to the internet can help alleviate poverty, improve development outcomes, and is now vital for realizing many human rights. This book posits that good governance is essential to the realization of inclusive pro-poor development goals, and puts forward policy recommendations that aim to mitigate the complex digital divide by employing governance as the primary actor. In making his argument, the author provides a quantitative analysis of developing countries, conjoined with a targeted in-depth study of Mexico. This mixed method approach provides an intriguing case for how improvements in the quality of governance impacts both ICT penetration, and poverty alleviation. Overall, the book challenges the neoliberal deterministic perspective that the open market will solve technology diffusion, and argues instead that good governance is the lynchpin that creates conducive conditions for ICTs to make an impact on poverty alleviation. In fact, the digital divide should not be considered binary, rather it is a multifaceted problem where income, education, and language all need to be considered to address it effectively. This book will be useful for researchers/students of development, communication technologies, and comparative politics as well as for development practitioners and policy makers with an interest in how modern technology is impacting the poor in the developing world.

Net Neutrality or Net Neutering: Should Broadband Internet Services Be Regulated Thomas M. Lenard,Randolph J. May,2006-09-13 The subject of this book - whether or not to extend traditional telecommunications regulation to high-speed, or broadband, access to the Internet - is

perhaps the most important issue facing the Federal Communications Commission. The issue is contentious, with academics and influential economic interests on both sides. This volume offers updated papers originally presented at a June 2003 conference held by the Progress and Freedom Foundation. The authors are top researchers in telecommunications.

Making Connections Intermediate Student's Book Jo McEntire, Jessica Williams, 2009 A Strategic Approach to Academic Reading. Prepares students to read at university level, with advice on reading skills and strategies. Suitable for self-study and improving reading and study skills. Teacher's manual with teaching suggestions and answer key also available.

Information Communication Technology Law, Protection and Access Rights: Global Approaches and Issues Portela, Irene Maria, Cruz-Cunha, Maria Manuela, 2010-06-30 This book identifies key issues in the relationship between ICT and law, ethics, politics and social policy, drawing attention to diverse global approaches to the challenges posed by ICT to access rights-- Provided by publisher.

Revolutionary Wealth Alvin Toffler, Heidi Toffler, 2006-04-25 Starting with the publication of their seminal bestseller, *Future Shock*, Alvin and Heidi Toffler have given millions of readers new ways to think about personal life in today's high-speed world with its constantly changing, seemingly random impacts on our businesses, governments, families and daily lives. Now, writing with the same rare grasp and clarity that made their earlier books classics, the Tofflers turn their attention to the revolution in wealth now sweeping the planet. And once again, they provide a penetrating, coherent way to make sense of the seemingly senseless. *Revolutionary Wealth* is about how tomorrow's wealth will be created, and who will get it and how. But twenty-first-century wealth, according to the Tofflers, is not just about money, and cannot be understood in terms of industrial-age economics. Thus they write here about everything from education and child rearing to Hollywood and China, from everyday truth and misconceptions to what they call our "third job"—the unnoticed work we do without pay for some of the biggest corporations in our country. They show the hidden connections between extreme sports, chocolate chip cookies, Linux software and the "surplus complexity" in our lives as society wobbles back and forth between depressing decadence and a hopeful post-decadence. In their earlier work, the Tofflers coined the word "prosumer" for people who consume what they themselves produce. In *Revolutionary Wealth* they expand the concept to reveal how many of our activities—whether parenting or volunteering, blogging, painting our house, improving our diet, organizing a neighborhood council or even "mashing" music—pump "free lunch" from the "hidden" non-money economy into the money economy that economists track. Prosuming, they forecast, is about to explode and compel radical changes in the way we measure, make and manipulate wealth. Blazing with fresh ideas, *Revolutionary Wealth* provides readers with powerful new tools for thinking about—and preparing for—their future.

Media Access E. Page Bucy, Erik P. Bucy, John E. Newhagen, 2004 This is a focus on access to media, including physical, psychological and sociological components of media use.

Cities around the World [2 volumes] Jing Luo, 2019-07-10 This two-volume set offers a comprehensive overview of major challenges faced by cities worldwide in the 21st century, and how cities in different geographic, economic, and political conditions are finding solutions to them. This two-volume encyclopedia examines ten critical issues that face cities across the globe today—environmental and societal struggles that affect the daily lives of city dwellers. Readers will gain a better understanding of our global neighbors and will be able to use this book in order to compare and contrast different approaches to critical issues in our world. Volume One examines employment and jobs; energy and sustainability; green spaces; housing and infrastructure; and migration and demographic changes. Volume Two discusses pollution; schools; traffic and transportation; violence, corruption, and organized crime; and waste management. Each issue begins with an introduction providing an overview of the issue from a global perspective. Following the introduction are ten alphabetically arranged world city profiles of cities that are struggling with

the issue and cities that have found innovative solutions to deal with the crisis. The profiles explain how the problem came to be; consequences inhabitants face, such as compromised health, limited access to education, and high taxes with low wages; and failed and successful initiatives taken by city management.

The Internet Playground Ellen Seiter, 2005 Based on four years of experience teaching computers to 8-12 year olds, media scholar Ellen Seiter offers parents and educators practical advice on what children need to know about the Internet and when they need to know it. The Internet Playground argues that, contrary to the promises of technology boosters, teaching with computers is very difficult. Seiter points out that the Internet today resembles a mall more than it does a library. While children love to play online games, join fan communities, and use online chat and instant messaging, the Internet is also an appallingly aggressive marketer to children and, as this book passionately argues, an educational boondoggle.

This is likewise one of the factors by obtaining the soft documents of this **Problems Connecting Internet 10009.htm** by online. You might not require more era to spend to go to the book opening as with ease as search for them. In some cases, you likewise attain not discover the revelation Problems Connecting Internet 10009.htm that you are looking for. It will completely squander the time.

However below, subsequently you visit this web page, it will be so certainly simple to get as without difficulty as download guide Problems Connecting Internet 10009.htm

It will not assume many era as we tell before. You can reach it even though operate something else at house and even in your workplace. so easy! So, are you question? Just exercise just what we find the money for under as well as review **Problems Connecting Internet 10009.htm** what you in imitation of to read!
