**Water, Electricity, and the Poor** Kristin Komives, World Bank, 2005 This book reviews the prevalence and variants of consumer subsidies found in the developing world and the effectiveness of these subsidies for the poor. It places consumer subsidies in a broader social protection framework and compares them with poverty-focused programmes in other sectors using a common metric. It concludes that the most common subsidy instruments perform poorly in comparison with most other transfer mechanisms. Alternative consumption and connection subsidy mechanisms show more promise, especially when combined with complementary non-price approaches to making utility services accessible and affordable to poor households. The many factors contributing to those outcomes are dissected, identifying those that can be controlled and used to improve performance.

*Failed Bridges* Joachim Scheer, 2011-08-24 When bridges fail, often with loss of human life, those involved may be unwilling to speak openly about the cause. Yet it is possible to learn from mistakes. The lessons gained lead to greater safety and are a source of innovation. This book contains a systematic, unprecedented overview of more than 400 bridge failures assigned to the time of their occurrence in the bridges' life cycle and to the releasing events. Primary causes are identified. Many of the cases investigated are published here for the first time and previous interpretations are shown to be incomplete or incorrect. A catalogue of rules that can help to avoid future mistakes in design analysis, planning and erection is included. A lifetime's work brilliantly compiled and courageously presented - a wealth of knowledge and experience for every structural engineer.

*Taxing Caloric Sweetened Beverages: Potential Effects on Beverage Consumption, Calorie Intake, and Obesity* Travis A. Smith, 2010-11 The link between high U.S. obesity rates and the over-consumption of added sugars, largely from sodas and fruit

drinks, has prompted calls for a tax on caloric sweetened beverages (CSB). Faced with a tax, consumers may reduce consumption of these CSB and substitute non-taxed beverages, such as bottled water, juice, and milk. A tax-induced 20% price increase on CSB could cause an average reduction of 3.8 pounds of body weight over a year, for adults and an average of 4.5 pounds over a year, for children. Given these reductions in calorie consumption, results show an estimated decline in adult overweight prevalence and obesity prevalence, as well as the child at-risk-for-overweight prevalence and the overweight prevalence. **Sexual Harassment of Women** National Academies of Sciences, Engineering, and Medicine,Policy and Global Affairs,Committee on Women in Science, Engineering, and Medicine,Committee on the Impacts of Sexual Harassment in Academia,2018-09-01 Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised

urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. Sexual Harassment of Women explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings.

**Law, Public Policies and Complex Systems: Networks in Action** Romain Boulet, Claire Lajaunie, Pierre Mazzega, 2019-05-07  
 This book investigates how various scientific communities – e.g. legal scientists, political scientists, sociologists, mathematicians, and computer scientists – study law and public policies, which are portrayed here as complex systems. Today, research on law and public policies is rapidly developing at the international level, relying heavily on modeling that employs innovative methods for concrete implementation. Among the subject matter discussed, law as a network of evolving and interactive norms is now a prominent sphere of study. Similarly, public policies are now a topic in their own right, as policy can no longer be examined as a linear process; rather, its study should reflect the complexity of the networks of actors, norms and resources involved, as well as the uncertainty or weak predictability of their direct or indirect impacts. The book is divided into three main parts: complexity faced by jurists, complexity in action and public policies, and complexity and networks. The main themes examined concern codification, governance, climate change, normative networks, health, water management, use-related conflicts, legal regime

conflicts, and the use of indicators.

The Fifth Edition features updated information throughout, including new theories and models such as the Healthy Action Process Approach (HAPA) and

It has been thoroughly reviewed by both practitioners and professors to reflect the latest trends in the field. I too just took the CHES exam in April and passed...What I found to be most helpful was reading over Planning, Implementing, and Evaluating Health Promotion Programs: A Primer (4th Ed.) by Mckenzie, Neiger, & Smeltzer. I think it would give individuals who have been out of school for a while a good refresher on not only the terminology, but also core concepts. Joseph D.
