Android Application Development for the Intel Platform Ryan Cohen,Tao Wang,2014-09-17 The number of Android devices running on Intel processors has increased since Intel and Google announced, in late 2011, that they would be working together to optimize future versions of Android for Intel Atom processors. Today, Intel processors can be found in Android smartphones and tablets made by some of the top manufacturers of Android devices, such as Samsung, Lenovo, and Asus. The increase in Android devices featuring Intel processors has created a demand for Android applications optimized for Intel Architecture: *Android Application Development for the Intel® Platform* is the perfect introduction for software engineers and mobile app developers. Through well-designed app samples, code samples and case studies, the book teaches Android application development based on the Intel platform—including for smartphones, tablets, and embedded devices—covering performance tuning, debugging and optimization. This book is jointly developed for individual learning by Intel Software College and China Shanghai JiaoTong University.

Oracle Tuning Alexey B. Danchenkov,2006-02-01 Oracle 10g has become the most complex database ever created and Oracle tuning has become increasingly complex. This book provides a complete step-by-step approach for holistic Oracle tuning and it is the accumulated knowledge from tuning thousands of Oracle databases. Incorporating the principles of artificial intelligence, Oracle10g has developed a sophisticated mechanism for capturing and tracking database performance over time periods. This new complexity has introduced dozens of new v\$ and DBA views, plus dozens of Automatic Workload Repository (AWR) tables. The AWR and its interaction with the Automatic Database Diagnostic Monitor (ADDM) is a revolution in database tuning. By understanding the internal workings of the AWR tables, the senior DBA can develop time-series tuning models to predict upcoming outages and dynamically change the instance to accommodate the impending resource changes. This is not a book for beginners. Targeted at the senior Oracle DBA, this book dives deep into the internals of the v\$ views, the AWR table structures and the new DBA history views. Packed with ready-to-run scripts, you can quickly monitor and identify the most challenging performance issues.

Dreaming in Code Scott Rosenberg,2008-02-26 Our civilization runs on software. Yet the art of creating it continues to be a dark mystery, even to the experts. To find out why it's so hard to bend computers to our will, Scott Rosenberg spent three years following a team of maverick software developers—led by Lotus 1-2-3 creator Mitch Kapor—designing a novel personal information manager meant to challenge market leader Microsoft Outlook. Their story takes us through a maze of abrupt dead ends and exhilarating breakthroughs as they wrestle not only with the abstraction of code, but with the unpredictability of human behavior— especially their own.

The Persian Presence in the Islamic World Richard G. Hovannisian, Georges Sabagh, 1998-11-19 The thirteenth volume based on the Giorgio Levi Della Vida conference reassesses the role of the Iranian peoples in the development and consolidation of Islamic civilization. In his key essay, Ehsan Yarshater casts fresh light on that role challenging the view that, after reaching a climax in Baghdad in the ninth century, Islamic culture entered a period of decline. In fact, he maintains, a new and remarkably creative phase began in Khurasan and Transoxania, symbolized by the adoption of Persian as a medium of literary expression. By the mid-sixteenth century, Persian literary and intellectual paradigms had spread from Anatolia to India, encompassing the greater part of the Islamic world. Yarshater also challenges traditional assumptions about the 'Islamization of Persia'. In the essays which follow, six distinguished scholars consider the historical, cultural, and religious aspects of the Persian presence in the Islamic world.

The Angel Investor's Handbook Gerald A. Benjamin, Joel B. Margulis, 2001-07-01 Many of today's high-net-worth investors are turning their attention to early-stage investing in emerging companies. They know just how successful and lucrative funding a start-up venture can be. Savvy angel investors can foresee distant but potentially huge returns from pre-IPO companies. There are scores of hungry entrepreneurs in search of capital and lots of money to be invested. But, matching the right entrepreneurs with wise investors, so that both can profit, is the challenge in new enterprises. Gerald Benjamin and Joel Margulis demonstrate that the real pitfall for potential investors is an incomplete understanding of the complexities of early-stage investing. At the same time, the angel capital market offers few mechanisms for bringing investors and entrepreneurs together, while securities regulations restrict communication between sophisticated investors and promising new businesses. So, where do the uninitiated start, and how do they separate the wheat from the chaff? In this ground breaking work, Benjamin and Margulis offer angel investors a hands-on manual for profiting from early-stage, private equity deals. They show how to develop investment criteria and overall game plans, locate viable investment opportunities, assess and manage risks, negotiate the most favorable deal terms, conduct thorough due diligence, and plan the all-important exit strategy.

A Primer on QSAR/QSPR Modeling Kunal Roy, Supratik Kar, Rudra Narayan Das, 2015-04-11 This brief goes back to basics and describes the Quantitative structure-activity/property relationships (QSARs/QSPRs) that represent predictive models derived from the application of statistical tools correlating biological activity (including therapeutic and toxic) and properties of chemicals (drugs/toxicants/environmental pollutants) with descriptors representative of molecular structure and/or properties. It explains how the sub-discipline of Cheminformatics is used for many applications such as risk

assessment, toxicity prediction, property prediction and regulatory decisions apart from drug discovery and lead optimization. The authors also present, in basic terms, how QSARs and related chemometric tools are extensively involved in medicinal chemistry, environmental chemistry and agricultural chemistry for ranking of potential compounds and prioritizing experiments. At present, there is no standard or introductory publication available that introduces this important topic to students of chemistry and pharmacy. With this in mind, the authors have carefully compiled this brief in order to provide a thorough and painless introduction to the fundamental concepts of QSAR/QSPR modelling. The brief is aimed at novice readers.
