**IBM Data Center Networking: Planning for Virtualization and Cloud Computing** Michele Girola,Marian Friedman,Mark Lewis,Alessio M. Tarenzio,IBM Redbooks,2011-05-09 The enterprise data center has evolved dramatically in recent years. It has moved from a model that placed multiple data centers closer to users to a more centralized dynamic model. The factors influencing this evolution are varied but can mostly be attributed to regulatory, service level improvement, cost savings, and manageability. Multiple legal issues regarding the security of data housed in the data center have placed security requirements at the forefront of data center architecture. As the cost to operate data centers has increased, architectures have moved towards consolidation of servers and applications in order to better utilize assets and reduce server sprawl. The more diverse and distributed the data center environment becomes, the more manageability becomes an issue. These factors have led to a trend of data center consolidation and resources on demand using technologies such as virtualization, higher WAN bandwidth technologies, and newer management technologies. The intended audience of this book is network architects and network administrators. In this IBM® Redbooks® publication we discuss the following topics: The current state of the data center network The business drivers making the case for change The unique capabilities and network requirements of system platforms The impact of server and storage consolidation on the data center network The functional overview of the main data center network virtualization and consolidation technologies The new data center network design landscape

*Tivoli Integration Scenarios* Redbooks Tivoli Integration Scenarios Team IBM,Andre Ricardo Cavalcanti de Araujo,Antonio Orlando Neto,Ayron Dal Pont,Bill J Layne,Bruno Caiado Paranhos Carneiro,Bruno Nogueira Costa,Carlos Alexandre Salgado Penante,Carlos Felipe Franca da Fonseca,Carolina Escribano Sanchez,Datta S Khot,David Kwock,David Stephenson,Diogo Tadeu Silva de Araujo,Douglas Barranqueiros Gomes,Eravimangalath P Naveen,Krishnan Venkitasubramanian,Leucir Marin Junior,Harshini Mariswamy,Johan Raeymaeckers,Marcel Dubiella Ferreira de Oliveira,Marcel Laurenz,Marianne Hardh,Mario Schuerewegen,Miguel Sanders,Murat Kipel,Rishikesh Kumar,Neetha Mangalore,Ozgun Odabasi,Pankaj Pandey,Rafael Risso Moleiro,Sabri Kizanlik,Sandy Cash,Soumyadeep Paul,Tomasz Sekman,Vasfi Gucer,Yatresh K Agarwal,IBM Redbooks,2011-01-11 This IBM® Redbooks® publication provides a broad view of how Tivoli® system management products work together in several common scenarios. You must achieve seamless integration for operations personnel to work with the solution. This integration is necessary to ensure that the product can be used easily by the users. Product integration contains multiple dimensions, such as security, navigation, data and task integrations. Within the context of the scenarios in this book, you see examples of these integrations. The scenarios implemented in this book are largely based on the input from the integration team, and several clients using IBM products. We based these scenarios on common real-life examples that IT operations often have to deal with. Of course, these scenarios are only a small subset of the possible integration scenarios that can be accomplished by the Tivoli products, but they were chosen to be representative of the integration possibilities using the Tivoli products. We discuss these implementations and benefits that are realized by these integrations, and also provide sample scenarios of how these integrations work. This book is a reference guide for IT architects and IT specialists working on integrating Tivoli products in real-life environments.

*Global Value Chains in a Postcrisis World* Olivier Cattaneo,Gary Gereffi,Cornelia Staritz,2010 The book looks to address the following questions in a post-crisis world: How have lead firms responded to the crisis? Have they changed their traditional supply chain strategy and relocated and/or outsourced part of their production? How will those changes affect developing countries? What should be the policy responses to these changes?

*Security Sector Reform and Citizen Security* Robert Muggah,John de Boer,2020-10-09 While widely considered a core pillar of the peace and security architecture, Security Sector Reform (SSR) is coming under fire. SSR theory and practice are criticized for being overly focused on traditional conflict and post-conflict settings and for being unable to adjust to unconventional settings marked by chronic crime and terrorism. SSR tends to be disproportionately focused on national institutions and less amenable to engaging at the subnational scale. Drawing on the experiences of so-called 'citizen security' measures in cities across Latin America and the Caribbean, this paper offers some opportunities for renewing and revitalizing SSR. The emphasis of citizen security interventions on multiple forms of insecurity, data-driven and evidence-informed prevention, the promotion of social cohesion and efficacy and designing crime prevention into the social and built environment are all insights that can positively reinforce comprehensive SSR measures in the 21st century. **Combinatorial Methods for Chemical and Biological Sensors** Radislav A. Potyrailo,Vladimir M. Mirsky,2009-03-21 Chemical sensors are in high demand for applications as varied as water pollution detection, medical diagnostics, and battlefield air analysis. Designing the next generation of sensors requires an interdisciplinary approach. The book provides a critical analysis of new opportunities in sensor materials research that have been opened up with the use of combinatorial and high-throughput technologies, with emphasis on experimental techniques. For a view of component selection with a more computational perspective, readers may refer to the complementary volume of *Integrated Analytical Systems* edited by M. Ryan et al., entitled "Computational Methods for Sensor Material Selection".

*Hybrid Artificial Intelligence Systems* Emilio Corchado,Ajith Abraham,2008-09-30 The Third International Workshop on Hybrid Artificial Intelligence Systems (HAIS 2008) presented the most recent developments in the dynamically expanding realm of symbolic and sub-symbolic techniques aimed at the construction of highly robust and reliable problem-solving techniques. Hybrid intelligent systems have become increasingly popular given their capabilities to handle a broad spectrum of real-world complex problems which come with inherent imprecision, uncertainty and vagueness, high-dimensionality, and non stationarity. These systems provide us with the opportunity to exploit existing domain knowledge as well as raw data to come

up with prom- ing solutions in an effective manner. Being truly multidisciplinary, the series of HAIS workshops offers a unique research forum to present and discuss the latest theoretical advances and real-world applications in this exciting research field. This volume of Lecture Notes on Artificial Intelligence (LNAI) includes accepted papers presented at HAIS 2008 held in University of Burgos, Burgos, Spain, Sept- ber 2008 The global purpose of HAIS conferences has been to form a broad and interdis- plinary forum for hybrid artificial intelligence systems and associated learning pa- digms, which are playing increasingly important roles in a large number of application areas. Since its first edition in Brazil in 2006, HAIS has become an important forum for researchers working on fundamental and theoretical aspects of hybrid artificial intel- gence systems based on the use of agents and multiagent systems, bioinformatics and bio-inspired models, fuzzy systems, artificial vision, artificial neural networks, opti- zation models and alike.

Writing Beyond Pen and Parchment Ricarda Wagner,Christine Neufeld,Ludger Lieb,2019-10-21 What can stories of magical engraved rings or prophetic inscriptions on walls tell us about how writing was perceived before print transformed the world? Writing beyond Pen and Parchment introduces readers to a Middle Ages where writing is not confined to manuscripts but is inscribed in the broader material world, in textiles and tombs, on weapons or human skin. Drawing on the work done at the Collaborative Research Centre “Material Text Cultures,” (SFB 933) this volume presents a comparative overview of how and where text-bearing artefacts appear in medieval German, Old Norse, British, French, Italian and Iberian literary traditions, and also traces the paths inscribed objects chart across multiple linguistic and cultural traditions. The volume’s focus on the raw materials and practices that shaped artefacts both mundane or fantastical in medieval narratives offers a fresh perspective on the medieval world that takes seriously the vibrancy of matter as a vital aspect of textual culture often overlooked.

**War Photographs Taken on the Battlefields of the Civil War** Mathew B. Brady,Alexander Gardner,2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.

**Juvenile Firesetting** Michael Lawrence Slavkin,2000-09 The study assessed the psychometric properties of the Federal Emergency Management Agency (FEMA) questionnaires (Family Fire Risk Interview Form, Juvenile Fire Risk Interview Form, Parent Fire Risk Interview Form) used to record juvenile firesetting events. It also attempted to identify characteristics of firesetters, determine a basis for the variation in the severity of fires set, and determine the chance of recidivism. Specific types of firesetters exhibit a range of different characteristics. Maturational and environmental factors are implicated. Recommends that future examinations of this subject should include an examination of the firesetter's history, including cognitive and behavioural reviews, and parent and family influences and stressors.
