Two Decades of Re-Emerging Russia: Challenges and Prospects Mr Sanjay Deshpande, 2015-04-15 Russia has been re-emerging as a major political and economic power during the last decade. The leadership of Russia claims that the objectives of transition from the former one-party socialist system to a plural multiparty democratic system and centralised planning to market economy are largely achieved. Russia is politically stable and has demonstrated how new political institutions, multiparty system are functioning under three presidents. In the initial years after the disintegration of the Soviet Union, the Russian economy passed through different phases such as crisis, boom and recovery. Russia has largely succeeded in managing its political and economic relations with "Near Abroad" which have witnessed considerable complexities over the last two decades. Russia has demonstrated that its bilateral ties with India in the political and defence sectors have been consistently cordial and close. However, trade and economic relations need to be strengthened. Notwithstanding its major achievements, Russia has been facing several problems, both in its domestic front and in its foreign relations. Some of the major problems on the domestic front are: over centralisation of power, nexus between state authorities, oligarchs and the bureaucracy, growing menace of corruption, surging political reactions by political parties and some former powerful leaders on various political issues, growing social discontent, issues between different ethnic groups, widening economic disparities among various sections of society and regions. On the external front, Russia has conflicts of interest with some former Soviet republics such as Georgia, Moldova, Ukraine and the Baltic states. Russia's relations with the US and NATO have

been highly critical on political and security related issues. There is a need for an objective and critical evaluation of how Russia has managed its domestic and foreign affairs after the collapse of the Soviet Union. What were the successes and failures of Russia in its policies and performance with regard to the social, political and economic developments in the country? This book is an attempt to assess those developments.

Soil Health on the Farm, Ranch, and in the Garden Kenneth E. Spaeth Jr., 2020-11-07 This book explores the importance of soil health in croplands, rangelands, pasturelands, and gardens, and presents new methods and technologies for assessing soil dynamics and health in these different land types. Through perspectives of agriculture, soil management, and ecological sustainability, the book provides accurate and up-to-date information on soil health assessment and maintenance that is often missing from current literature on conservation and environmental management and preservation. The book is written in a clear and concise format, and will appeal to non-scientists interested in soil health, as well as professional farmers, ranchers and gardeners. The book begins by discussing soil health from a historical perspective, and in terms of how it is covered in the news currently. Then the author addresses the ecological implications of soil health in farming, ranching and gardening, and comprehensively details the physical, chemical and biological properties of soil as they apply in various land types. The book then examines soil health assessment using new diagnostic and analytic technologies, and how these new innovations will be necessary going forward to maintain and improve soil health.

Anglo-Indians and Minority Politics in South Asia Uther Charlton-Stevens, 2017-11-03 Anglo-Indians are a mixed-race, Christian and Anglophone minority community which arose in South Asia during the long period of European colonialism. An often neglected part of the British Raj, their presence complicates the traditional binary through which British imperialism is viewed - of ruler and ruled, coloniser and colonised. The book analyses the processes of ethnic group formation and political organisation, beginning with petitions to the East India Company state, through the Raj's constitutional communalism, to constitution-making for the new India. It details how Anglo-Indians sought to preserve protected areas of state and railway employment amidst the growing demands of Indian nationalism. Anglo-

Indians both suffered and benefitted from colonial British prejudices, being expected to loyally serve the colonial state as a result of their ties of kinship and culture to the colonial power, whilst being the victims of racial and social discrimination. This mixed experience was embodied in their intermediate position in the Raj's evolving socio-racial employment hierarchy. The question of why and how a numerically small group, who were privileged relative to the great majority of people in South Asia, were granted nominated representatives and reserved employment in the new Indian Constitution, amidst a general curtailment of minority group rights, is tackled directly. Based on a wide range of source materials from Indian and British archives, including the Anglo-Indian Review and the debates of the Constituent Assembly of India, the book illuminatingly foregrounds the issues facing the smaller minorities during the drawn out process of decolonisation in South Asia. It will be of interest to students and researchers of South Asia, Imperial and Global History, Politics, and Mixed Race Studies.

Restoration of Ecosystems - Bridging Nature and Humans Stefan Zerbe,2023-02-13 In this interdisciplinary textbook, which bridges the gap between the natural and social sciences both, the scientific principles of restoration ecology and practical aspects of ecosystem restoration are comprehensively presented. The diversity of land-use types with a focus on Central Europe is highlighted and case studies of practical restoration projects are presented. The textbook offers students who deal with the environment as well as scientists and practitioners a profound and up-to-date, but also critical overview of the state of knowledge. This book opens up the broad spectrum of degraded ecosystems of Central European natural and

cultural landscapes. In further chapters, marine ecosystems and their restoration as well as development potentials and the limits of restoration are discussed in more detail. The ecological fundamentals are expanded through an interdisciplinary perspective taking into account environmental ethics, sociology, anthropology, and economics. In addition to an up-to-date overview of the various areas and fields of activity in restoration ecology and ecosystem restoration, the textbook provides a valuable basis for studies, science, and practice. The students also receive assistance in searching for literature and critical fact analysis, and the lecturers on teaching formats and interdisciplinary approaches to discussion in restoration ecology.
