📖 [Imperial Nature](#) Michael Goldman,2008-10-01 Why is the World Bank so successful? How has it gained power even at moments in history when it seemed likely to fall? This pathbreaking book is the first close examination of the inner workings of the Bank, the foundations of its achievements, its propensity for intensifying the problems it intends to cure, and its remarkable ability to tame criticism and extend its own reach. Michael Goldman takes us inside World Bank headquarters in Washington, D.C., and then to Bank project sites around the globe. He explains how projects funded by the Bank really work and why community activists struggle against the World Bank and its brand of development. Goldman looks at recent ventures in areas such as the environment, human rights, and good governance and reveals how—despite its poor track record—the World Bank has acquired greater authority and global power than ever before. The book sheds new light on the World Bank’s role in increasing global inequalities and considers why it has become the central target for anti-globalization movements worldwide. For anyone concerned about globalization and social justice, Imperial Nature is essential reading.

📖 [The Theoretic Life - A Classical Ideal and Its Modern Fate](#) Alexander S. Rosenthal-Pubul,2019-01-01 In this work, Alexander Rosenthal Pubul presents a broad examination of the ancient philosophical question: “What is the good life?”, while addressing how the liberal arts can help us to answer this question. Greek philosophy distinguished between the “noble” (what is good in itself), from the merely “useful” (good for something else). From thence follows the distinction between the liberal arts which pursue such noble goods and the mechanical arts which are only instrumental. For Aristotle, the most noble and excellent good is wisdom itself. Hence the theoretic life devoted to the love of wisdom for its own sake –philosophy - is the highest and the most excellent. This work theorizes the origins of modernity in a rebellion against this Greek conception resulting in a complete inversion of the classical hierarchy. Sir. Francis Bacon reconceiving the purpose of knowledge as power, enthroned technology over philosophy and the liberal arts. The unfolding of the modern Baconian revolution progressively sidelines the liberal arts, as practical economic and technical utility become the standard of value. In assessing this problem, the book engages in a capacious journey across disciplines like philosophy, history, art, politics, and science. It is also a veritable tour across the Western intellectual tradition including Socrates, Plato, Aristotle, Cicero, Seneca, Thomas Aquinas, Bacon, Descartes, Hume, Kant, Nietzsche, Dewey, Berdyaev, Einstein, and Heidegger. It pleads the urgent need to preserve the humanizing cultural ideals of the ancient classics against the modern tyranny of utility and the dangers of a new barbarism.
