**The Next Government of the United States: Why Our Institutions Fail Us and How to Fix Them** Donald F. Kettl,2009-09 Presents arguments for why the twentieth-century methods of the American government are inadequate for handling twenty-first-century issues, making strategic recommendations in such arenas as health care, disaster recovery, and foreign policy. 13,000 first printing.

Globalisation and Energy Transition in Latin America and the Caribbean Matheus Koengkan,José Alberto Fuinhas,2022-10-13 This book explores the potential for renewable energy development and the adoption of sustainable production processes in Latin America and the Caribbean. By examining the energy transition process, the impact of environmental degradation, and the relationship between renewable energy sources and economic growth, the effects of increased globalisation and liberalisation in this part of the world are analysed. Particular attention is given to renewable energy investment, the energy-economics growth nexus, the impact of trade openness, and the mitigation of carbon emissions. This book aims to highlight econometric techniques that can be used to tackle issues relating to globalisation, the energy transition, and environmental degradation. It will be relevant to researchers and policymakers interested in energy and environmental economics.

*Obesity Epidemic and the Environment* Matheus Koengkan,Jose Alberto Fuinhas,Aida Isabel P. Tavares,Nuno Silva,2022-10-20 Obesity Epidemic and the Environment: Latin America and the Caribbean Region provides a broad analysis of the macroeconomic impact of the obesity epidemic on environmental degradation in the LAC region. Case studies combine theory and practice to achieve critical conclusions (and subsequent policy implications), providing useful tools for those working on actual health, energy and environmental challenges. Written for researchers, policymakers, international organizations and practitioners in various fields, especially those in public health, health economics, energy and environmental economics and social sciences, this book thoroughly highlights the obesity epidemic in this region. In the LAC region, obesity has become a public health issue. The increase of this problem is related to the economic gains obtained from the process of liberalization and privatization, the increase of foreign investment, and infrastructure investments. Analyzes the macroeconomic impact of the obesity epidemic in the Latin America and Caribbean region Examines the effect of environmental degradation (CO2 emissions) and the contribution it plays Develops working tools for the reader to access econometric techniques to grasp empirical approaches on health, energy and environmental economics

**Quantities, Units and Symbols in Physical Chemistry** E Richard Cohen,Tom Cvitas,Jeremy G Frey,Bertil Holström,Kozo Kuchitsu,Roberto Marquardt,Ian Mills,Franco Pavese,Martin Quack,Jürgen Stohner,Herbert L Strauss,Michio Takami,Anders J Thor,2007-10-31 The first IUPAC Manual of Symbols and Terminology for Physicochemical Quantities and Units (the Green Book) of which this is the direct successor, was published in 1969, with the object of 'securing clarity and precision, and wider agreement in the use of symbols, by chemists in different countries, among physicists, chemists and engineers, and by editors of scientific journals'. Subsequent revisions have taken account of many developments in the field, culminating in the major extension and revision represented by the 1988 edition under the simplified title Quantities, Units and Symbols in Physical Chemistry. This 2007, Third Edition, is a further revision of the material which reflects the experience of the contributors with the previous editions. The book has been systematically brought up to date and new sections have been added. It strives to improve the exchange of scientific information among the readers in different disciplines and across different nations. In a rapidly expanding volume of scientific literature where each discipline has a tendency to retreat into its own jargon this book attempts to provide a readable compilation of widely used terms and symbols from many sources together with brief understandable definitions. This is the definitive guide for scientists and organizations working across a multitude of disciplines requiring internationally approved nomenclature.

**A Geographical Exploration of Urban Risk and COVID-19** Subhash Anand,B. Srinagesh,R.B. Singh,2023-11-13 The term 'health' covers physical, social, mental, emotional, and environmental health. Good health helps us to lead a peaceful and happy life. Human health is a fundamental right which is closely linked to the functions and lifestyles of the people in the urban and peri-urban areas. This book addresses the situation of COVID-19 and its implications for other health issues, providing the solutions to science and society which can be applied for sustainable policy and decision making. It shows that we must enhance adaptive capacity, strengthen resilience, reduce vulnerability, and take risk mitigation measures which need a systematic approach based on the science- policy interface that is transformative for a sustainable future. This book offers a valuable guide for planners, policy makers, practitioners, scientists, the academic community and civil society organizations, as well as anyone concerned about sustainable health and wellbeing.

*Physical Capital Development and Energy Transition in Latin America and the Caribbean* Jose Alberto Fuinhas,Matheus Koengkan,Renato Santiago,2021-07-10 Physical Capital Development and Energy Transition in Latin America and the Caribbean introduces the reader to applied theory and potential solutions to manage the transition from fossil energies to renewables given the resource wealth and infrastructural limitations of Latin American and Caribbean (LAC) countries. The work presents consistent empirical approaches and relevant econometric approaches grounded in case studies that offer realistic portrayals of complex multidisciplinary phenomena. It provides policymakers with the knowledge needed for economic decision-making, especially regarding the energy transition and the physical capital development in the LAC (and similar developing regions). The work concludes by road mapping future LAC physical capital investment options to promote 21st-century sustainable energy development. Analyses the macroeconomics of physical capital and energy transition in LAC countries Uses case studies to draw pragmatic comparative energy policy implications Deploys econometric techniques to address empirical approaches on energy and development economics Discusses the effects of the energy transition on environmental degradation Links energy economics and public investment management

Precariat: Labour, Work and Politics Matthew Johnson,2016-04-14 In his recent work, Guy Standing has identified a new class which has emerged from neo-liberal restructuring with, he argues, the revolutionary potential to change the world: the precariat. This, according to Standing, is 'a class-in-the-making, internally divided into angry and bitter factions' consisting of 'a multitude of insecure people, living bits-and-pieces lives, in and out of short-term jobs, without a narrative of occupational development, including millions of frustrated educated youth..., millions of women abused in oppressive labour, growing numbers of criminalised tagged for life, millions being categorised as disabled and migrants in their hundreds of millions around the world. They are denizens; they have a more restricted range of social, cultural, political and economic rights than citizens around them'. This present book explores the nature, shape and context of precariat, evaluating the internal consistency and applications of the concept. Demonstrating the sheer breadth and depth of application, the chapters cover a wide-range of topics, from the relationships between precariat and authoritarianism, multitude (another concept to achieve popular consciousness), and place as well as the nature of precarious identities and subjectivities among those working in immaterial labour. The book concludes with a reply by Standing to reviews of Precariat. This book was published as a special issue of Global Discourse.

**Managing Information in the Public Sector** Jay D White,2015-02-12 This first-of-its-kind survey covers both the basics of information technology and the managerial and political issues surrounding the use of these technologies. Unlike other works on information systems, this book is written specifically for the public sector and addresses unique public sector issues and concerns. The technical basics are explained in clear English with as little technical jargon as possible so that readers can move on to informed analysis of the public policy issues surrounding government's use of MIS. This practical tool includes end of chapter summaries with bridges to upcoming chapters, numerous boxed exhibits, thorough end-of-chapter notes and a bibliography for further reading.

Integrated Pest Management for Developing Countries Chigozie Jesse Uneke,2007 Pests are defined purely from anthropocentric perspective. An organism is not considered a pest until its activities and life processes interfere with human health, convenience, comfort or profits. The importance of health education in the control of vector-borne diseases cannot be overstated. This should particularly be targeted at rural

communities where the scourges of these diseases are most pronounced. With adequate commitment by the government at the federal, state and local levels as well as from private sectors, considerable success could be achieved in the battle against pests. This book represents an excellent addition to the literature on Integrated Pest Management (IPM). A historical overview traces the origins and concepts of pest organisms, their classification and general characteristics and the basic terminologies are given. The philosophy and goal of IPM and specific examples of chemical, cultural, biological, physical and mechanical approaches to IPM are discussed. The book is enriched with accounts of IPM practices and progression in the developing countries and the problems and prospects of implementation and the future of IPM highlighted. Also included is an interesting account of medical important arthropods and their management. A rich bibliography accompanies every chapter.

Oakes, 2009 Each two-volume book contains four major sections: . - Introduction and Overview: Provides forewords by notables in the field and an outline of the book. - Essays: Features eight to 10 essays on topics such as workplace issues, financial aid, diversity, and more. - Directory: Contains descriptions and contact information for hundreds of organizations, schools, and associations, arranged by topic. - Further Resources/Indexes: Includes glossaries, appendixes, further reading, and indexes

*International Reference Guide to Space Launch Systems* Steven J. Isakowitz, Joseph P. Hopkins, Joshua B. Hopkins, 2004 This bestselling reference guide contains the most reliable and comprehensive material on launch programs in Brazil, China, Europe, India, Israel, and the United States. Packed with illustrations and figures, this edition has been updated and expanded, and offers a quick and easy data retrieval source for policy makers, planners, engineers, launch buyers, and students.

Information Resources in Toxicology, Volume 2: The Global Arena Steve Gilbert, Asish Mohapatra, Sol Bobst, Antoinette Hayes, Sara T. Humes, 2020-05-15 This new fifth edition of Information Resources in Toxicology offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represents a unique, wide-ranging, curated, international, annotated bibliography, and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult. Volume 1: Background, Resources, and Tools, arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework in Part 1. Part 2 continues with chapters organized by more specific subject such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents. Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, -omics, risk assessment, societal implications such as ethics and the precautionary principle, climate change, and children's environmental health. Opens with an overview of the international toxicology scene, organizations and activities involved with both the science and regulatory framework, and a specific look at the European Union's efforts Offers an extensive collection of chapters covering over 40 countries and their toxicological infrastructure which includes listings of major books and journals, organizations, professional societies, universities, poison control centers, legislation, and online databases Provides the Second Edition of the International Union of Pure and Applied Chemistry's Glossary of Terms Used in Toxicology, a carefully constructed and peer reviewed collation of critical terms in the science Concludes with a potpourri of quotes concerning toxicology and their use in the arts and popular culture Paired with Volume One, which offers chapters on a host of toxicology sub-disciplines, this set offers the most comprehensive compendium of print, digital, and organizational resources in the toxicological sciences with over 120 chapters contributions by experts and leaders in the field

**Cognitive Aging** Institute of Medicine, Board on Health Sciences Policy, Committee on the Public Health Dimensions of Cognitive Aging, 2015-07-21 For most Americans, staying mentally sharp as they age is a very high priority. Declines in memory and decision-making abilities may trigger fears of Alzheimer's disease or other neurodegenerative diseases. However, cognitive aging is a natural process that can have both positive and negative effects on cognitive function in older adults - effects that vary widely among individuals. At this point in time, when the older population is rapidly growing in the United States and across the globe, it is important to examine what is known about cognitive aging and to identify and promote actions that individuals, organizations, communities, and society can take to help older adults maintain and improve their cognitive health. Cognitive Aging assesses the public health dimensions of cognitive aging with an emphasis on definitions and terminology, epidemiology and surveillance, prevention and intervention, education of health professionals, and public awareness and education. This report makes specific recommendations for individuals to reduce the risks of cognitive decline with aging. Aging is inevitable, but there are actions that can be taken by individuals, families, communities, and society that may help to prevent or ameliorate the impact of aging on the brain, understand more about its impact, and help older adults live more fully and independent lives. Cognitive aging is not just an individual or a family or a health care system challenge. It is an issue that affects the fabric of society and requires actions by many and varied stakeholders. Cognitive Aging offers clear steps that individuals, families, communities, health care providers and systems, financial organizations, community groups, public health agencies, and others can take to promote cognitive health and to help older adults live fuller and more independent lives. Ultimately, this report calls for a societal commitment to cognitive aging as a public health issue that requires prompt action across many sectors.
