A European Television History Jonathan Bignell, Andreas Fickers, 2008-12-15 European Television History brings together television historians and media scholars to chart the development of television in Europe since its inception. The volume interrogates the history of the medium in divergent political, economic, cultural and ideological national contexts Taking a comparative approach to the topic, the volume is organized around a set of common questions, themes, and methodological reflections Deals with European television in the context of television historiography and transnational traditions Case study chapters written by scholars from different European countries to reflect their specific areas of expertise

Seeds of Deception Jeffrey M. Smith, 2005-03-30 Without knowing it, Americans eat genetically modified (GM) food every day. While the food and chemical industries claim that GMO food is safe, a considerable amount of evidence shows otherwise. In *Seeds of Deception*, Jeffrey Smith, a former executive with the leading independent laboratory testing for GM presence in foods, documents these serious health dangers and explains how corporate influence and government collusion have been used to cover them up. The stories Smith presents read like a mystery novel. Scientists are offered bribes or threatened; evidence is stolen; data withheld or distorted. Government scientists who complain are stripped of responsibilities or fired. The FDA even withheld information from congress after a GM food supplement killed nearly a hundred people and permanently disabled thousands. While Smith was employed by the laboratory he was not allowed to speak on the health dangers or the cover-up. No longer bound by this agreement, Smith now reveals what he knows in this groundbreaking expose. Today, food companies sell GM foods that have not undergone safety studies. FDA scientists opposed this, but White House and industry pressure prevailed and the agency's final policy--co-authored by a former Monsanto attorney--denied the risks. The scientists' concerns were made public only after a lawsuit forced the agency to turn over internal documents. Dan Glickman, former Secretary of Agriculture, describes the government's pro-biotech mindset: You felt like you were almost an alien, disloyal, by trying to present an open-minded view. . . . So I pretty much spouted the rhetoric. . . . It was written into my speeches. In *Seeds of Deception* Smith offers easy-to-understand descriptions of genetic engineering and explains why it can result in serious health problems. This well-documented, pivotal work will show you how to protect yourself and your family. DVD Overview Three videos in one: includes an interview with Jeffrey M. Smith, footage of scientists, and a look at the miraculous improvement in student behavior that accompanied a change in diet at a Wisconsin school. Also included is a lecture by Smith on The Health Dangers of Genetically Engineered Foods and Their Cover-up.

**Visible Learners** Mara Krechevsky, Ben Mardell, Melissa Rivard, Daniel Wilson, 2013-06-03 A progressive, research-based approach for making learning visible Based on the Reggio Emilia approach to learning, Visible Learners highlights learning through interpreting objects and artifacts, group learning, and documentation to make students' learning evident to teachers. Visible classrooms are committed to five key principles: that learning is purposeful, social, emotional, empowering, and representational. The book includes visual essays, key practices, classroom and examples. Show how to make learning happen in relation to others, spark emotional connections, give students power over their learning, and express ideas in multiple ways Illustrate Reggio-inspired principles and approaches via quotes, photos, student and teacher reflections, and examples of student work Offer a new way to enhance learning using progressive, research-based practices for increasing collaboration and critical thinking in and outside the classroom Visible Learners asks that teachers look beyond surface-level to understand who students are, what they come to know, and how they come to know it.

The Handbook of Art Therapy and Digital Technology Cathy A Malchiodi, 2018-06-21 Interest in the use of digital technology in art therapy has grown significantly in recent years. This book provides an authoritative overview of the applications of digital art therapy with different client groups and considers the implications for practice. Alongside Cathy Malchiodi, the contributors review the pros

and cons of introducing digital technology into art therapy, address the potential ethical and professional issues that can arise and give insight into the effect of digital technology on the brain. They cover a wide range of approaches, from therapeutic filmmaking to the use of tablet and smartphone technology in therapy. Detailed case studies bring the practicalities of using digital technology with children, adolescents and adults to life and the use of social media in art therapy practice, networking and community-building is also discussed.

*World Cinemas, Transnational Perspectives* Nataša Durovicová, Kathleen E. Newman, 2009-09-10  
SCMS Award Winner Best Edited Collection The standard analytical category of national cinema has increasingly been called into question by the category of the transnational. This anthology examines the premises and consequences of the coexistence of these two categories and the parameters of historiographical approaches that cross the borders of nation-states. The three sections of *World Cinemas, Transnational Perspectives* cover the geopolitical imaginary, transnational cinematic institutions, and the uneven flow of words and images.

*Deadpool Max*, 2013-02-26 Marvel's most mentally misaligned misanthrope, Deadpool, returns in a gloriously raw, uncensored shoot-'em-up romp across America with his good buddy Hydra Bob, a boatload of explosives, enough military-grade weaponry to sink your battleship and a cocktail of mood-altering pharmaceuticals. When Bob is framed for a terrorist act on American soil and hunted by the U.S. government, he and his best friend Deadpool go on the run in a heartfelt, soul-searching journey full of sex, drugs and unnecessary excessive violence! Familiar friends and foes including Taskmaster, Cable, Agent X, Weasel and Blind Al join the bosom buddies on their sanity-smashing adventure as Deadpool helps his pal Bob try to clear his not-so-good name. Plus: Christmastime is here again, and Hydra Bob and Deadpool have a gift you'll never forget! COLLECTING: *Deadpool Max* 2 1-6, *Deadpool Max X-Mas Special*

Politics or Principle? Sarah A. Binder, Steven S. Smith, 2001-09-19 Is American democracy being derailed by the United States Senate filibuster? Is the filibuster an important right that improves the political process or an increasingly partisan tool that delays legislation and thwarts the will of the majority? Are century-old procedures in the Senate hampering the institution from fulfilling its role on the eve of the 21st century? The filibuster has achieved almost mythic proportions in the history of American politics, but it has escaped a careful, critical assessment for more than 50 years. In this book, Sarah Binder and Steven Smith provide such an assessment as they address the problems and conventional wisdom associated with the Senate's long-standing tradition of extended debate. The authors examine the evolution of the rules governing Senate debate, analyze the consequences of these rules, and evaluate reform proposals. They argue that in an era of unprecedented filibustering and related obstructionism, old habits are indeed undermining the Senate's ability to meet its responsibilities. Binder and Smith scrutinize conventional wisdom about the filibuster—and show that very little of it is true. They focus on five major myths: that unlimited debate is a fundamental right to differentiate the Senate from the House of Representatives; that the Senate's tradition as a deliberative body requires unlimited debate; that the filibuster is reserved for a few issues of the utmost national importance; that few measures are actually killed by the filibuster; and that senators resist changing the rules because of a principled commitment to deliberation. In revising conventional wisdom about the filibuster, Binder and Smith contribute to ongoing debates about the dynamics of institutional change in the American political system. The authors conclude by suggesting reforms intended to enhance the power of determined majorities while preserving the rights of chamber minorities. They advocate, for example, lowering the number of votes required to end debate while increasing the amount of time for senators to debate controversial bills. Reform is possible, they suggest, that is consistent with the Senate's unique size and responsibilities.

Filibustering Gregory Koger, 2010-06-15 In the modern Congress, one of the highest hurdles for major bills or nominations is gaining the sixty votes necessary to shut off a filibuster in the Senate. But this wasn't always the case. Both citizens and scholars tend to think of the legislative process as a game played by the rules in which votes are the critical commodity—the side that has the most votes wins. In this comprehensive volume, Gregory Koger shows, on the contrary, that filibustering is a game

with slippery rules in which legislators who think fast and try hard can triumph over superior numbers. *Filibustering* explains how and why obstruction has been institutionalized in the U.S. Senate over the last fifty years, and how this transformation affects politics and policymaking. Koger also traces the lively history of filibustering in the U.S. House during the nineteenth century and measures the effects of filibustering—bills killed, compromises struck, and new issues raised by obstruction. Unparalleled in the depth of its theory and its combination of historical and political analysis, *Filibustering* will be the definitive study of its subject for years to come.

*The Rhetoric of Social Movements* Nathan Crick, 2020-09-22 This collection provides an accessible yet rigorous survey of the rhetorical study of historical and contemporary social movements and promotes the study of relations between strategy, symbolic action, and social assemblage. Offering a comprehensive collection of the latest research in the field, *The Rhetoric of Social Movements: Networks, Power, and New Media* suggests a framework for the study of social movements grounded in a methodology of slow inquiry and the interconnectedness of these imminent phenomena. Chapters address the rhetorical tactics that social movements use to gain attention and challenge power; the centrality of traditional and new media in social movements; the operations of power in movement organization, leadership, and local and global networking; and emerging contents and environments for social movements in the twenty-first century. Each chapter is framed by case studies (drawn from movements across the world, ranging from Black Lives Matter and Occupy to Greek anarchism and indigenous land protests) that ground conceptual characteristics of social movements in their continuously unfolding reality, furnishing readers with both practical and theoretical insights. *The Rhetoric of Social Movements* will be of interest to scholars and advanced students of rhetoric, communication, media studies, cultural studies, social protest and activism, and political science.

**Cosmic Catastrophes** J. Craig Wheeler, 2007-01-04 From supernovae and gamma-ray bursts to the accelerating Universe, this is an exploration of the intellectual threads that lead to some of the most exciting ideas in modern astrophysics and cosmology. This fully updated second edition incorporates new material on binary stars, black holes, gamma-ray bursts, worm-holes, quantum gravity and string theory. It covers the origins of stars and their evolution, the mechanisms responsible for supernovae, and their progeny, neutron stars and black holes. It examines the theoretical ideas behind black holes and their manifestation in observational astronomy and presents neutron stars in all their variety known today. This book also covers the physics of the twentieth century, discussing quantum theory and Einstein's gravity, how these two theories collide, and the prospects for their reconciliation in the twenty-first century. This will be essential reading for undergraduate students in astronomy and astrophysics, and an excellent, accessible introduction for a wider audience.

Low Carbon Energy Transitions Kathleen M. Araújo, 2017 The world is at a pivotal crossroad in energy choices. There is a strong sense that our use of energy must be more sustainable. Moreover, many also broadly agree that a way must be found to rely increasingly on lower carbon energy sources. However, no single or clear solution exists on the means to carry out such a shift at either a national or international level. Traditional energy planning (when done) has revolved around limited cost projections that often fail to take longer term evidence and interactions of a wider set of factors into account. The good news is that evidence does exist on such change in case studies of different nations shifting toward low-carbon energy approaches. In fact, such shifts can occur quite quickly at times, alongside industrial and societal advance, innovation, and policy learning. These types of insights will be important for informing energy debates and decision-making going forward. *Low Carbon Energy Transitions: Turning Points in National Policy and Innovation* takes an in-depth look at four energy transitions that have occurred since the global oil crisis of 1973: Brazilian biofuels, Danish wind power, French nuclear power, and Icelandic geothermal energy. With these cases, Dr. Araújo argues that significant nationwide shifts to low-carbon energy can occur in under fifteen years, and that technological complexity is not necessarily a major impediment to such shifts. Dr. Araújo draws on more than five years of research, and interviews with over 120 different scientists, government workers, academics, and members of civil society in completing this study. *Low Carbon Energy Transitions* is written for professionals in energy, the environment and policy as well as for students and citizens who are interested in critical decisions about energy sustainability. Technology briefings are provided for each of the major technologies in this book, so that scientific and non-scientific readers can engage in more even discussions about the choices that are involved.

*Participatory Visual Methodologies* Claudia Mitchell, Naydene De Lange, Relebohile Moletsane, 2017-09-18 This book demonstrates how data from participatory visual methods can take people and communities beyond ideological engagement, initiating new conversations and changing perspectives, policy debates, and policy development. These methods include, for example, photo-voice, participatory video, drawing/mapping, and digital storytelling. Organised around a series of tools that have been used across health, education, environmental, and sociological research, *Participatory Visual Methodologies* illustrates how to maintain participant engagement in decision-making, navigate critical issues around ethics, track policies, and maximize the potential of longitudinal studies. Tools discussed include: Pedagogical screenings Digital dialogue devices Upcycling and 'speaking back' interventions Participant-led policy briefs An authoritative and accessible guide to how participatory visual methods and arts-based methods can influence social change, this book will help any postgraduate researcher looking to contribute to policy dialogue.

The Origins of Globalization Karl Moore, David Charles Lewis, 2009-06-02 *Origins of Globalization* draws widely on ancient sources and modern economic theory to detail the concept of "known world" globalization, arguing that a mixed economy--similar in many respects to our own--existed in a variety of forms throughout the ancient world. By analyzing the business practices of the ancient world--phenomena such as resource and market seeking behavior, international trade from China, India and Rome, to Africa and even northern and western parts of Europe, Small and Medium Size Enterprises (SMEs) operating internationally and outsourcing production, multicultural workforces, tariff reduced zones, interregional tax issues, and the management of currency risks--the authors provide readers with a unique historical interpretation of the contemporary globalizing economy and a durable theoretical framework for future historical economic analyses.

*Building Chicago's Subways* David Sadowski, 2018 While the elevated Chicago Loop is justly famous as a symbol of the city, the fascinating history of its subways is less well known. The City of Chicago broke ground on what would become the Initial System of Subways during the Great Depression and finished 20 years later. This gigantic construction project, a part of the New Deal, would overcome many obstacles while tunneling through Chicago's soft blue clay, under congested downtown streets, and even beneath the mighty Chicago River. Chicago's first rapid transit subway opened in 1943 after decades of wrangling over routes, financing, and logistics. It grew to encompass the State Street, Dearborn-Milwaukee, and West Side Subways, with the latter modernizing the old

Garfield Park L into the median of Chicago's first expressway. Take a trip underground and see how Chicago's I Will spirit overcame challenges and persevered to help with the successful building of the subways that move millions. Building Chicago's subways was national news and a matter of considerable civic pride--making it a Second City no more

William Grant Still Catherine Parsons Smith,2008 In this compact introduction to the life and work of eminent African American composer William Grant Still (1895-1978), Catherine Parsons Smith tracks the composer's interrelated careers in popular and concert music. Still merged both musical traditions in his work, studying composition with George W. Chadwick at the New England Conservatory, collaborating with Langston Hughes on *Troubled Island*, and working as a commercial arranger and composer on Broadway and radio during the Harlem Renaissance. Still also played in the pit band for *Shuffle Along*, served as recording director for the first black-owned record label, Black Swan, and arranged music for artists such as Sophie Tucker, Paul Whiteman, and Artie Shaw. Best known for his *Afro-American Symphony* and other works that drew heavily on black American musical heritage, Still struggled against financial hardship and declining attention to his work, which he attributed to political and racist conspiracies. This dean of Afro-American composers created his own, unique version of musical modernism, influencing commercial music, symphonic music, and opera in the process.
