Entity-Oriented Search Krisztian Balog,2018-10-02 This open access book covers all facets of entity-oriented search—where "search" can be interpreted in the broadest sense of information access—from a unified point of view, and provides a coherent and comprehensive overview of the state of the art. It represents the first synthesis of research in this broad and rapidly developing area. Selected topics are discussed in-depth, the goal being to establish fundamental techniques and methods as a basis for future research and development. Additional topics are treated at a survey level only, containing numerous pointers to the relevant literature. A roadmap for future research, based on open issues and challenges identified along the way, rounds out the book. The book is divided into three main parts, sandwiched between introductory and concluding chapters. The first two chapters introduce readers to the basic concepts, provide an overview of entity-oriented search tasks, and present the various types and sources of data that will be used throughout the book. Part I deals with the core task of entity ranking: given a textual query, possibly enriched with additional elements or structural hints, return a ranked list of entities. This core task is examined in a number of different variants, using both structured and unstructured data collections, and numerous query formulations. In turn, Part II is devoted to the role of entities in bridging unstructured and structured data. Part III explores how entities can enable search engines to understand the concepts, meaning, and intent behind

the query that the user enters into the search box, and how they can provide rich and focused responses (as opposed to merely a list of documents)—a process known as semantic search. The final chapter concludes the book by discussing the limitations of current approaches, and suggesting directions for future research. Researchers and graduate students are the primary target audience of this book. A general background in information retrieval is sufficient to follow the material, including an understanding of basic probability and statistics concepts as well as a basic knowledge of machine learning concepts and supervised learning algorithms.

Innovation and Future of Enterprise Information Systems Felix Piazolo,Michael Felderer,2013-05-15 This volume presents the revised and peer reviewed contributions of the ERP Future 2012 conference held in Salzburg/Austria on November 11th - 12th, 2012. The conference is a platform for research in ERP systems and closely related topics like business processes, business intelligence, and enterprise information systems in general. To master the challenges of ERP comprehensively, the ERP Future 2012 Research conference accepted contributions both with a business focus as well as with an IT focus to consider enterprise resource planning from various viewpoints. This combination of business and IT aspects is a unique characteristic of the conference and of this volume that resulted in valuable contributions with high practical impact.

Remains of the Everyday Joshua Goldstein,2020-12-22 Remains of the Everyday traces the changing material culture and industrial ecology of China through the lens of recycling. Over the last century, waste recovery and secondhand goods markets have been integral to Beijing's economic functioning and cultural identity, and acts of recycling have figured centrally in the ideological imagination of modernity and citizenship. On the one hand, the Chinese state has repeatedly promoted acts of voluntary recycling as exemplary of conscientious citizenship. On the other, informal recycling networks—from the night soil carriers of the Republican era to the collectors of plastic and cardboard in Beijing's neighborhoods today—have been represented as undisciplined, polluting, and technologically primitive due to the municipal government's failure to control them. The result, Joshua Goldstein argues, is the repeatedly re-inscribed exclusion of waste workers from formations of modern urban citizenship as well as the intrinsic liminality of recycling itself as an economic process.

Nursing Staff in Hospitals and Nursing Homes Institute of Medicine,Committee on the Adequacy of Nursing Staff in Hospitals and Nursing Homes,1996-03-27 Hospitals and nursing homes are responding to changes in the health care system by modifying staffing levels and the mix of nursing personnel. But do these changes endanger the quality of patient care? Do nursing staff suffer increased rates of injury, illness, or stress because of changing workplace demands? These questions are addressed in Nursing Staff in Hospitals and Nursing Homes, a thorough and authoritative look at today's health care system that also takes a long-term view of staffing needs for nursing as the nation moves into the next century. The committee draws fundamental conclusions about the evolving role of nurses in hospitals and nursing homes and presents recommendations about staffing decisions, nursing training, measurement of quality, reimbursement, and other areas. The volume also discusses work-related injuries, violence toward and abuse of nursing staffs, and stress among nursing personnelâ€and examines whether these problems are related to staffing levels. Included is a readable overview of the underlying trends in health care that have given rise to urgent questions about nurse staffing: population changes, budget pressures, and the introduction of new technologies. Nursing Staff in Hospitals and Nursing Homes provides a straightforward examination of complex and sensitive issues surround the role and value of nursing on our health care system.

Nanoscience and Biotechnology for Environmental Applications K M Gothandam,Shivendu Ranjan,Nandita Dasgupta,Eric Lichtfouse,2019-02-05 This book presents the complete guide for readers to understand the applications, and pros and cons of nanotechnology applications in environmental remediation, although there are few critical reviews and textbooks available on environmental biotechnology. Water pollution has

become one of the biggest concerns of the world. After the industrialisation and urbanisation, environmental pollution has become an enormous concern. Water pollution results in biomagnifications by entering the food chain. As a result water pollution and its risks need to be considered seriously and solutions need to be researched. This volume looks into such topics as bioremediation, nanobiotechnology, biosensors, and enzyme degradation to find solutions to these problems.

Team Geek Brian W. Fitzpatrick,Ben Collins-Sussman,2012-07-06 In a perfect world, software engineers who produce the best code are the most successful. But in our perfectly messy world, success also depends on how you work with people to get your job done. In this highly entertaining book, Brian Fitzpatrick and Ben Collins-Sussman cover basic patterns and anti-patterns for working with other people, teams, and users while trying to develop software. This is valuable information from two respected software engineers whose popular series of talks—including Working with Poisonous People—has attracted hundreds of thousands of followers. Writing software is a team sport, and human factors have as much influence on the outcome as technical factors. Even if you've spent decades learning the technical side of programming, this book teaches you about the often-overlooked human component. By learning to collaborate and investing in the soft skills of software engineering, you can have a much greater impact for the same amount of effort. Team Geek was named as a Finalist in the 2013 Jolt Awards from Dr. Dobb's Journal. The publication's panel of judges chose five notable books, published during a 12-month period ending June 30, that every serious programmer should read.

Textile Conservation Frances Lennard,Patricia Ewer,2010-09-08 Textile Conservation: Advances in Practice demonstrates the development in the role and practice of the textile conservator and captures the current diversity of textile conservators' work. The book focuses on four major factors

which have influenced development in textile conservation practice since the 1980s: the changing context, an evolution in the way conservators think about objects, the greater involvement of stakeholders, and technical developments. These are all integral to effective conservation decision-making. • Includes case studies from the UK, USA and mainland Europe and Asia • Assesses the conservation of objects in some of the world's major cultural institutions • Highly illustrated in full colour to show the effect of conservation in practice Textile Conservation is a reference manual for textile conservators, textile conservation students and museum and heritage professionals.

The Hacker's Dictionary Eric S. Raymond,2017-06-19 This document is a collection of slang terms used by various subcultures of computer hackers. Though some technical material is included for background and flavor, it is not a technical dictionary; what we describe here is the language hackers use among themselves for fun, social communication, and technical debate.

Electronic Discourse Boyd H. Davis,Jeutonne Brewer,Jeutonne Patten Brewer,1997-01-01 Investigates the new world of computer conferencing and details how writers use language when their social interaction is exclusively enacted through text on screens.
