Anamorphosis in Early Modern Literature Jen E. Boyle,2017-03-02 Anamorphosis in Early Modern Literature explores the prevalence of anamorphic perspective in the seventeenth and eighteenth centuries in England. Jen Boyle investigates how anamorphic media flourished in early modern England as an interactive technology and mode of affect in public interactive art, city and garden design, and as a theory and figure in literature, political theory and natural and experimental philosophy. Anamorphic mediation, Boyle brings to light, provided Milton, Margaret Cavendish, and Daniel Defoe, among others, with a powerful techno-imaginary for traversing through projective, virtual experience. Drawing on extensive archival research related to the genre of practical perspective in early modern Europe, Boyle offers a scholarly consideration of anamorphic perspective (its technical means, performances, and embodied practices) as an interactive aesthetics and cultural imaginary. Ultimately, Boyle demonstrates how perspective media inflected a diverse set of knowledges and performances related to embodiment, affect, and collective consciousness.

Nutrition and Diet in Menopause Caroline J. Hollins Martin,Ronald Ross Watson,Victor R. Preedy,2013-06-04 Nutrition and Diet in Menopause is a single comprehensive source that will provide readers with an understanding of menopause. Holistic in its approach, this volume is divided into five sections covering psychological, endocrine and lifestyle factors, metabolism and physiology, bone and nutrition, cancer and nutrition, cardiovascular factors and dietary supplements in menopause. In-depth chapters review the potential long term consequences of menopause on the overall health of women, not only at the physical level including hot flushes (flashes) , alterations to the genitourinary system, skin changes, decreased cardiovascular functions, hypertension, headache, back pain, and constipation. Written by international leaders and trendsetters, Nutrition and Diet in Menopause is essential reading for endocrinologists, cardiologists, nutritionists and all health care professionals who are interested in women’s health.

Byron, Poetics and History Jane Stabler,2002-12-05 Jane Stabler offers the first full-scale examination of Byron's poetic form in relation to historical debates of his time. Responding to recent studies of publishing and audiences in the Romantic period, Stabler argues that Byron's poetics developed in response to contemporary cultural history and his reception by the English reading public. Drawing on extensive new archive research into Byron's correspondence and reading, Stabler traces the complexity of the intertextual dialogues that run through his work. For example, Stabler analyses Don Juan alongside Galignani's Messenger - Byron's principal source of news about British politics while in Italy - and refers to hitherto unpublished letters between Byron's publishers and his friends to reveal a powerful impulse among his contemporaries to direct his controversial poetic style to their own conflicting political ends. This fascinating study will be of interest to Byronists and, more broadly, to scholars of Romanticism in general.

Semi-Supervised and Unervised Machine Learning Amparo Albalade, Wolfgang Minker,2011-01-18 This book provides a detailed and up-to-date overview on classification and data mining methods. The first part is focused on supervised classification algorithms and their applications, including recent research on the combination of classifiers. The second part deals with unsupervised data mining and knowledge discovery, with special attention to text mining. Discovering the underlying structure on a data set has been a key research topic associated to unsupervised techniques with multiple applications and challenges, from web-content mining to the inference of cancer subtypes in genomic microarray data. Among those, the book focuses on a new application for dialog systems which can be thereby made adaptable and portable to different domains. Clustering evaluation metrics and new approaches, such as the ensembles of clustering algorithms, are also described.
