Universal Access in Human-Computer Interaction. Context Diversity Constantine Stephanidis,2011-06-24 The four-volume set LNCS 6765-6768 constitutes the refereed proceedings of the 6th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2011, held as Part of HCI International 2011, in Orlando, FL, USA, in July 2011, jointly with 10 other conferences addressing the latest research and development efforts and highlighting the human aspects of design and use of computing systems. The 47 revised papers included in the third volume were carefully reviewed and selected from numerous submissions. The papers are organized in the following topical sections: universal access in the mobile context; ambient assisted living and smart environments; driving and interaction; interactive technologies in the physical and built environment.

Don't Just Sit There, DO NOTHING Jessie Asya Kanzer,2022 Here are forty-seven inspirational pieces that are smart, hip, accessible, and rich with insight; forty-seven bite-sized stories of struggle, triumph, and contemplation based on sharp observations and anecdotes from the author's life. Each chapter begins with a verse from the Tao, followed by anecdotes and observations that give the teachings of Lao Tzu's applicability to contemporary life. Each chapter concludes with a section that offers an actionable step to bring the reader a sense of grounding and fluidity.--

XXXXX Xxxxx,Martin Howse,2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hirosimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adaptor which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

All the Winding World Kate Innes,2018-06-21 During the Anglo-French War of 1294, many of King Edward's knights are taken hostage. Lady Illesa Burnel must find an ingenious way to free her husband before Fortune's Wheel tips them all into death and ruin. German Army Uniforms of World War II Stephen Bull,2021-02-04 In the years after World War I, the defeated and much-reduced German Army developed new clothing and personal equipment that drew upon the lessons learned in the trenches. In place of the wide variety of uniforms and insignia that had been worn by the Imperial German Army, a standardized approach was followed, culminating in the uniform items introduced in the 1930s as the Nazi Party came to shape every aspect of German national life. The outbreak of war in 1939 prompted further adaptations and simplifications of uniforms and insignia, while the increasing use of camouflaged items and the accelerated pace of weapons development led to the appearance of new clothing and personal equipment. Medals and awards increased in number as the war went on, with grades being added for existing awards and new decorations introduced to reflect battlefield feats. Specialists such as mountain troops, tank crews and combat engineers were issued distinctive uniform items and kit, while the ever-expanding variety of fronts on which the German Army fought - from the North African desert to the Russian steppe - prompted the rapid development of clothing and equipment for different climates and conditions. In addition, severe shortages of raw materials and the demands of clothing and equipping an army that numbered in the millions forced the simplification of many items and the increasing use of substitute materials in their manufacture. In this fully illustrated book noted authority Dr Stephen Bull examines the German Army's wide range of uniforms, personal equipment, weapons, medals and awards, and offers a comprehensive guide to the transformation that the German Army soldier underwent in the period from September 1939 to May 1945.

The Ha-Ha Dave King,2005-01-01 Howard Kapostash has not spoken in thirty years. The small repertory of gestures and simple sounds that he uses to communicate lead most people to assume he is disturbed. No one understands that Howard is still the same man he was before his tragic injury. But when he agrees to help an old girlfriend by opening his home to her nine-year-old son, the presence of this nervous, resourceful boy in his life transforms Howard utterly. He is afforded a rare glimpse of life outside his shell? With all its exuberant joys and crushing sorrows.

Innovations in the Designing and Marketing of Information Services Jesubright, John Jeyasekar,Saravanan, P,2019-11-29 Compounded with the emergence of information technology, information services have become more complex. In order to break the bottleneck in providing information services, the information behavior of the user community must be studied and library staff must be effectively trained to identify, adapt, and satisfy the information needs of every type of information seeker. Innovations in the Designing and Marketing of Information Services provides emerging research exploring the theoretical and practical aspects of improving and expanding information resources and services in a cost-effective way and enables librarians to plan and present information services for the betterment of civil society. Featuring coverage on a broad range of topics such as e-resources, knowledge ethics, and user-friendly technology, this book is ideally designed for librarians, information scientists, behavioral scientists, information technologists, marketers, marketing executives, academicians, researchers, and students.

Survival Guide to Web Site Development Mary Haggard,1998 Mary Haggard's insightful book, which grows out of a series of enthusiastically received articles that appear at the SiteBuilder Web site, is aimed at helping Webmasters and computer professionals gain a winning edge on building and managing a commercial Web site. The book sorts out the jumble of marketing messages and technology claims that overwhelm would-be site builders.

The Errant Hours Kate Innes,2015-11-20 A headlong journey through the dangers of Medieval Britain, in this literary adventure the heroine must live by her wits and wiles to break her brother out of jail. Inspired by the seductive art of illuminated manuscripts, 'The Errant Hours' draws from the deep well of medieval legend to weave a story of survival and courage, trickery and love.

Report to the President President's Council of Advisors on Scie,Executive Office of the President,2016-03-06 Cities are beginning a new era of change. From 1920 to 2010 many U.S. cities hollowed out as suburbs grew faster than their urban cores. The trend started reversing in 2011 as Millennials and Baby Boomers looking for social connections and convenience settled in urban neighborhoods. Accompanying the resurgence of residential cities are complex and persistent urban challenges, including resilience against climate change and natural disasters. This report focuses on the technologies that shape some key infrastructures and economic activities, as opposed to those involved in delivering education, health care, or social services. As described in Chapter 2 of the report, technological advances promise to improve the environments in which people live and the services that city governments and companies offer.Cleaner energy technologies, new models of transportation, new kinds of water systems, building-construction innovation, low-water and soil-less agriculture, and clean and small-scale manufacturing are or will be available in the near future. These options, which are summarized in the Table of City Infrastructure Technologies, are evolving through private-sector commercialization and implementation plus university and National Laboratory research and development (R&D) in concert with city governments.

On the Turn Bárbara Arizti,Silvia Martínez-Falquina,2007 On the Turn: The Ethics of Fiction in Contemporary Narrative in English is an attempt to listen to the various voices that participate in the current dialogue on the relationship between fiction and ethics. The editorsâ (TM) introduction investigates the current state of affairs on the return to ethics in critical and literary consideration, and it opens up the way for the variety of approaches that follows. Participants include internationally recognized scholars like Andrew Gibson, Patricia Waugh, or Native American fiction writer and poet Gordon Henry, winner of the American Book Award in 1995. All in all, contributors cover a significant geographical diversity, and their approaches also vary from general theory to particular examples, from traditional interpretations to post-deconstruction ethics. Authors analyze texts both mainstream and marginal, colonial and postcolonial; they examine the ethics of race, gender and sexuality; the ethics of self-positioning and orientation; the ethics of style; the ethics of reception; the ethics of mode and genre; the ethics of extreme situations of evil, disease and fascism. In its search for a better understanding of the global/nationalistic world of today, On the Turn therefore moves beyond the scope of literary criticism into issues of wider, more urgent relevance. What should I, ought I, may I, must I, do, if anything, on the basis of reading, when I have read a literary work? What does reading a literary work authorize, or even command, me to do? Writing an essay about the work would be one response. On the Turn is a wonderfully diverse, learned, challenging, provocative, even sometimes controversial, collection of essays on the ethical dimensions of literature. This book is testimony to the continued lively interest in the ethical turn in literary studies. The authors are, for the most part, concerned with ethical theory and with ethically charged situations in postmodern novels in English, as they shape readersâ (TM) values and judgments. Poetry and non-print media are, however, also discussed. J. Hillis Miller UCI Distinguished Research Professor of Comparative Literature and English, University of California at Irvine The Ethics of Fiction is an important and exciting volume that explores with energy and rigour the connections between ethics and literature. Relating literature to philosophy, neurobiology, politics, religion, deconstruction and psychoanalysis, the twenty two contributors richly advance â ~the ethical turnâ (TM) recently embraced by many critics. Works by authors such as Ian McEwan, A.S.Byatt, Charles Palliser, Hanif Kureishi, J.M. Coetzee, David Malouf, George Orwell, E.L. Doctorow, Flannery Oâ (TM)Connor, Toni Morrison and Paul Auster are presented in a new light and complex topics such as territoriality, the nature of love, Islamophobia and the politics of representation are tackled with imagination and intellectual integrity. This book is essential reading for anyone interested in the dialogue between ethics and literature. Avril Horner, Professor of English, Kingston University

The Spring of Joy Mary Webb,2016-08-25 Mary Webb was passionately devoted to revealing nature in all of its expressions and forms. She was diagnosed with Graves' disease at the age of 20, and in times of recovery she early noticed that her love of nature sped her healing. She also, in these sensitive times of contemplation and struggle, saw the natural world more tenderly and luminously; the urgencies of life were clearer. The Spring of Joy collects together a group of exquisite essays of appreciation, written with the idea of succouring 'the weary and wounded in the battle of life.' They are an extraordinary record of a woman's empathy, not only for the beauty, colour, form, delicacy and majesty of the natural world, but also for her fellow human beings who suffer.
