The Poems of St. John of the Cross Saint John of the Cross, 1979 San Juan de la Cruz, the great sixteenth-century Spanish mystic, is regarded by many as Spain's finest poet. Passionate, ecstatic, and spiritual, his poems are a blend of exquisite lyricism and profound mystical thought. In *The Poems of St. John of the Cross* John Frederick Nims presents his superlative translation of the complete poems, re-creating the religious fervor of St. John's art. This dual-language edition makes available the original Spanish from the Codex of Sanlúcar de Barrameda with facing English translations. The work concludes with two essays--a critique of the poetry and a short piece on the Spanish text that appears alongside the translation--as well as brief notes on the individual poems.

Emerging Topics in Management Studies Patrícia Moura e Sá, 2020-08-02

Presently, Management has witnessed vast advancements, clearly becoming an area of trans and interdisciplinary knowledge. It has widened its scope from traditional business areas – such as marketing, strategy, management control, accounting and finance, taxation or operations – to other spaces, namely deepening bridges with behavioural sciences, engineering, health, or energy, fostering both quantitative models and methods. Management thinking at the Faculty of Economics of the University of Coimbra (FEUC) has followed these trends, enabling students with the essential skills supporting the practice of the profession, both in business and public sector organisations. This book features topical trends of research in Management studies, in which FEUC professors are involved, together with international peers, evidencing the openness of the Faculty to the world. Numerous of the subjects addressed relate to challenges that organisations are already facing or will have to deal with shortly. Therefore, the book not only presents innovative research questions, but it also delivers a practical perspective. Thus, organisations will certainly find here some support to better manage those issues in practice.

Neighbourhoods in Transition Emmanuel Rey, Martine Laprise, Sophie Lufkin, 2021-09-25 This open access book is focused on the intersection between urban brownfields and the sustainability transitions of metropolitan areas, cities and neighbourhoods. It provides both a theoretical and practical approach to the topic, offering a thorough introduction to urban brownfields and regeneration projects as well as an operational monitoring tool. *Neighbourhoods in Transition* begins with an overview of historic urban development and strategic areas in the hearts of towns to be developed. It then defines several key issues related to the topic, including urban brownfields, regeneration projects, and sustainability issues related to neighbourhood development. The second part of this book is focused on support tools, explaining the challenges faced, the steps involved in a regeneration process, and offering an operational monitoring tool. It applies the unique

tool to case studies in three selected neighbourhoods and the outcomes of one case study are also presented and discussed, highlighting its benefits. The audience for this book will be both professional and academic. It will support researchers as an up-to-date reference book on urban brownfield regeneration projects, and also the work of architects, urban designers, urban planners and engineers involved in sustainability transitions of the built environment.

Risk Measures with Applications in Finance and Economics Michael McAleer, Wing-Keung Wong, 2019-07-23 Risk measures play a vital role in many subfields of economics and finance. It has been proposed that risk measures could be analysed in relation to the performance of variables extracted from empirical real-world data. For example, risk measures may help inform effective monetary and fiscal policies and, therefore, the further development of pricing models for financial assets such as equities, bonds, currencies, and derivative securities. A Special Issue of "Risk Measures with Applications in Finance and Economics" will be devoted to advancements in the mathematical and statistical development of risk measures with applications in finance and economics. This Special Issue will bring together the theory, practice and real-world applications of risk measures. This book is a collection of papers published in the Special Issue of "Risk Measures with Applications in Finance and Economics" for Sustainability in 2018.

Flexible Imputation of Missing Data, Second Edition Stef van Buuren, 2018-07-17 Missing data pose challenges to real-life data analysis. Simple ad-hoc fixes, like deletion or mean imputation, only work under highly restrictive conditions, which are often not met in practice. Multiple imputation replaces each missing value by multiple plausible values. The variability between these replacements reflects our ignorance of the true (but missing) value. Each of the completed data set is then analyzed by standard methods, and the results are pooled to obtain unbiased estimates with correct confidence intervals. Multiple imputation is a general approach that also inspires novel solutions to old problems by reformulating the task at hand as a missing-data problem. This is the second edition of a popular book on multiple imputation, focused on explaining the application of methods through detailed worked examples using the MICE package as developed by the author. This new edition incorporates the recent developments in this fast-moving field. This class-tested book avoids mathematical and technical details as much as possible: formulas are accompanied by verbal statements that explain the formula in accessible terms. The book sharpens the reader's intuition on how to think about missing data, and provides all the tools needed to execute a well-grounded quantitative analysis in the presence of missing data.

The Clave Matrix David Peñalosa, 2012-08-01 CLAVE MATRIX: The entire

interwoven structure of clave-based music as it relates to its generative source. CLAVE: A Spanish word meaning 'code,' or 'key,' as in the key to a mystery or puzzle. Also 'keystone,' the wedge-shaped stone in the center of an arch that ties all the stones together. Clave is the key pattern that both binds and decodes the rhythmic structure of Afro-Cuban music. MATRIX: The point of origin from which something takes form and develops; a grid-like array of elements, an interwoven pattern.
