Farley Mowat informs extensive historical and biological research with his direct experience living in and observing this region. When it was first published more than 20 years ago, Sea of Slaughter served as a catalyst for environment reform, raising awareness of the decline and destruction of marine and coastal species. Exploring Zynq Mpsoc CROCKETT H. DAVID LOUISE (NORTHCOTE. CRAIG, RAMSAY.),Northcote David,Ramsay Craig,2019-04-11 This book introduces the Zynq MPSoC (Multi-Processor System-on-Chip), an embedded device from Xilinx. The Zynq MPSoC combines a sophisticated processing system that includes ARM Cortex-A53 applications and ARM Cortex-R5 real-time processors, with FPGA programmable logic. As well as guiding the reader through the architecture of the device, design tools and methods are also covered in detail: both the conventional hardware/software co-design approach, and the newer software-defined methodology using Xilinx's SDx development environment. Featured aspects of Zynq MPSoC design include hardware and software development, multiprocessing, safety, security and platform management, and system booting. There are also special features on PYNQ, the Python-based framework for Zynq devices, and machine learning applications. This book should serve as a useful guide for those working with Zynq MPSoC, and equally as a reference for technical managers wishing to gain familiarity with the device and its associated design methodologies.

Atomic Ranch Michelle Gringeri-Brown,2006-08-29 An in-depth exploration of midcentury residential architecture in America, with extensive photos and design tips included. Post-World War II ranches (1946–1970) range from the decidedly modern gable-roofed Joseph Eichler tracts in the San Francisco Bay area and butterfly wing houses in Palm Springs, Florida, to the unassuming brick or stucco L-shaped ranches and split-levels so common throughout the United States. In this book Michelle Gringeri-Brown and Jim Brown, founders and publishers of the popular quarterly Atomic Ranch magazine, extol the virtues of the tract, split-level, rambler home and its many unique qualities: private front facades, open floor plans, secluded bedroom wings, walls of glass, and an easy-living style. From updated homes with high-end Italian kitchens, terrazzo floors, and modern furniture to affordable homeowner renovations with eclectic thrift-store furnishings, Atomic Ranch presents twenty-five homes showcasing inspiring examples of stylish living through beautiful color photographs, including before and after shots, design-tip sidebars, and a thorough resource index. Atomic Ranch reveals: Hallmarks of the ranch style Inspiring original ranch homes Ranch house transformations and makeovers Preservation of mid-century neighborhoods Adding personality to a ranch home Yards and landscaping A helpful resource section and index

Fair Food Oran B. Hesterman,2012-06-05 Our food system is broken, and it's endangering what's most precious to us: our environment, our health, our soil and water, and our future. In recent years, a host of books and films have compellingly

documented the dangers. But advice on what to do about them largely begins and ends with the admonition to "eat local" or "eat organic." Longtime good food pioneer Oran Hesterman knows that we can't fix the broken system simply by changing what's on our own plates: the answer lies beyond the kitchen. In Fair Food he shares an inspiring and practical vision for changing not only what we eat, but how food is grown, packaged, delivered, marketed, and sold. He introduces people and organizations across the country who are already doing this work in a number of creative ways, and provides a wealth of practical information for readers who want to get more involved.

Cultural Techniques Jörg Dünne,Kathrin Fehringer,Kristina Kuhn,Wolfgang Struck,2020-08-24 This volume presents the preliminary results of the work carried out by the interdisciplinary cultural techniques research lab at the University of Erfurt. Taking up an impulse from media studies, its contributions examine —from a variety of disciplinary perspectives—the interplay between the formative processes of knowledge and action outlined within the conceptual framework of cultural techniques. Case studies in the fields of history, literary (and media) studies, and the history of science reconstruct seemingly fundamental demarcations such as nature and culture, the human and the nonhuman, and materiality and the symbolical order as the result of concrete practices and operations. These studies reveal that particularly basic operations of spatialization form the very conditions that determine emergence within any cultural order. Ranging from manual and philological paper work to practices of opening up and closing off spaces and collective techniques of assembly, these case studies replace the grand narratives of cultural history focusing on micrological examinations of specific constellations between human and nonhuman actors.
