Reducing Environmental Cancer Risk Suzanne H. Reuben,2010-10 Though overall cancer incidence and mortality have continued to decline in recent years, cancer continues to devastate the lives of far too many Americans. In 2009 alone, 1.5 million American men, women, and children were diagnosed with cancer, and 562,000 died from the disease. There is a growing body of evidence linking environmental exposures to cancer. The Pres. Cancer Panel dedicated its 2008-2009 activities to examining the impact of environmental factors on cancer risk. The Panel considered industrial, occupational, and agricultural exposures as well as exposures related to medical practice, military activities, modern lifestyles, and natural sources. This report presents the Panel's recommend. to mitigate or eliminate these barriers. Illus.

Misconceptions about the Tuskegee Airmen Daniel Haulman,2023-02-15 Once an obscure piece of World War II history, the Tuskegee Airmen are now among the most celebrated and documented aviators in military history. With this growth in popularity, however, have come a number of inaccurate stories and assumptions. Misconceptions about the Tuskegee Airmen refutes fifty-five of these myths, correcting the historical record while preserving the Airmen's rightful reputation as excellent servicemen. The myths examined include: the Tuskegee Airmen never losing a bomber to an enemy aircraft; that Lee Archer was an ace; that Roscoe Brown was the first American pilot to shoot down a German jet; that Charles McGee has the highest total combat missions flown; and that Daniel "Chappie" James was the leader of the "Freeman Field Mutiny." Historian Daniel Haulman, an expert on the Airmen with many published books on the subject, conclusively disproves these misconceptions through primary documents like monthly histories, daily narrative mission reports, honor-awarding orders, and reports on missing crews, thereby proving that the Airmen were praiseworthy, even without embellishments to their story.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Predators Anna Salter,2018-07-03 What motivates sexual abusers? Why are so few caught? Drawing on the stories of abusers, Anna C. Salter shows that sexual predators use sophisticated deception techniques and rely on misconceptions surrounding them to evade discovery. Arguing that even the most knowledgeable among us can be fooled, Salter dispels the myths about sexual predators and gives us the tools to protect our families and ourselves.

Peptide Therapeutics Ved Srivastava,2019-08-28 Peptide therapy has become a key strategy in innovative drug development, however, one of the potential barriers for the development of novel peptide drugs in the clinic is their deficiencies in clearly defined chemistry, manufacturing and controls (CMC) strategy from clinical development to commercialization. CMC can often become a rate-limiting step due to lack of knowledge and lack of a formal policy or guidelines on CMC for peptide-based drugs. Regulators use a risk-based approach, reviewing applications on a case-by-case basis. *Peptide Therapeutics: Strategy and Tactics for Chemistry, Manufacturing, and Controls* covers efficient manufacturing of peptide drug substances, a review of the process for submitting applications to the regulatory authority for drug approval, a holistic approach for quality attributes and quality control from a regulatory perspective, emerging analytical tools for the characterisation of impurities, and the assessment of stability. This book is an essential reference work for students and researchers, in both academia and industry, with an interest in learning about CMC, and facilitating development and manufacture of peptide-based drugs.
