Times of Terror Lee Jarvis,2009-07-08 Since 11 September 2001, the War on Terror has dominated global political life. The book takes a critical look at different ways in which the George W. Bush administration created and justified this far-reaching conflict through their use of language and other discursive practices.

International Resource Politics in the Asia-Pacific Jeffrey David Wilson,2017-06-30 Resource security is a new battleground in the international politics of the Asia-Pacific. With demand for minerals and energy surging, disputes are emerging over access and control of scarce natural resource endowments. Drawing on critical insights from political economy, this book explains why resources have emerged as a source of inter-state conflict in the region.

International Register of Ornamental Plant Cultivars: Woody Plants Laurence C. Hatch,Mark Summers,2017-02-19 This is the November 2017 register of all new ornamental or landscape tree, shrub, conifer, and vine cultivar submitted or registered in the Open Registration Of Cultivars (OROC)(pronounced OH-rock) from 2013 to late 2017. OROC was formed to remedy the lack of an worldwide catalog of new cultivars because existing patent, trademark, and ICRA agencies barely account for 5% of the available new material. By reason, patented plants are only those likely to be very popular or from larger firms who can pay the fee, not collector's items, most university items, nor smaller nurseries.

India-China Relations Jagannath P. Panda,2016-10-04 The rise of India and China as two major economic and political actors in both regional and global politics necessitates an analysis of not only their bilateral ties but also the significance of their regional and global pursuits. This book looks at the nuances and politics that the two countries attach to multilateral institutions and examines how they receive, react to and approach each other's presence and upsurge. The driving theme of this book is to highlight the enduring and emerging complexities in India-China relations, which are multi-layered and polygonal in nature, and both a result and reflection of a multipolar world order. The book argues that coexistence between India and China in this multipolar world order is possible, but that it is limited to a medium-term perspective, given the constraints of identity complexities and global aspirations these two rising powers are pursuing. It goes on to discuss how their search for energy resources, quest to uphold their own identity as developing powers, and engagement in balance-of-power politics to exert authority on each other's presence, are some elements that guide their non-cooperative relationship. By explaining the foreign policy approaches of Asia's two major powers towards the growing Asian and global multilateralism, and highlighting the policies they carry towards each other, the book is a useful contribution to students and scholars of Asian Politics, Foreign Policy and International Relations.

India and China in Asia Jagannath P. Panda,2019-04-08 This book analyses the structure of the India-China relationship and the two prominent powers' positions with and against each other, bilaterally and globally, in a complex Asian environment and beyond. India and China's perceptions of one another are evaluated to reveal how the order of Asia is influenced by engaging in different power equations that affect equilibrium and disequilibrium. Contributors address three critical perspectives of India and China in Asia which are increasingly shaping the future of Asia and impacting the Indo-Pacific power balance. First, they examine the mutual perceptions of India and China as an integral part of Asia's evolving politics and the impact of this on the emerging Asian order and disorder. Second, they assess how classical and contemporary characteristics of the India-China boundary and beyond-border disputes or conflicts are shaping Asia's political trajectory and leaving an impact on the Indo-Pacific region. Additionally, contributors observe the prevailing power equations in which India and China are currently engaged to reveal that they are not only geographically limited to the Asian region. Instead, having a strong global or intercontinental character attached to it, the India-China relationship involves extra-territorial powers and extra-territorial regions. This book will be of interest to academics, students and policymakers working on Asian studies, international relations, area studies, emerging powers studies, strategic studies, security studies and conflict studies.

The New Great Game Thomas Fingar,2016-03-23 China's rise has elicited envy, admiration, and fear among its neighbors. Although much has been written about this, previous coverage portrays events as determined almost entirely by Beijing. Such accounts minimize or ignore the other side of the equation: namely, what individuals, corporate actors, and governments in other countries do to attract, shape, exploit, or deflect Chinese involvement. The New Great Game analyzes and explains how Chinese policies and priorities interact with the goals and actions of other countries in the region. To explore the reciprocal nature of relations between China and countries in South and Central Asia, The New Great Game employs numerous policy-relevant lenses: geography, culture, history, resource endowments, and levels of development. This volume seeks to discover what has happened during the three decades of China's rise and why it happened as it did, with the goal of deeper understanding of Chinese and other national priorities and policies and of discerning patterns among countries and issues.

Conflict and Cooperation in the Indo-Pacific Ash Rossiter,Brendon J. Cannon,2020-04-15 This book explores the most important strategic questions about the emerging Indo-Pacific region by offering an incisive analysis on the current and future patterns of competition and cooperation of key nations in the region. Examining emerging policies of cooperation and conflict adopted by Indo-Pacific states in response to a rising China, the book offers insights into the evolving Indo-Pacific visions and strategies being developed in Japan, India, Australia and the US in reaction to shifting geopolitical realities. The book provides evidence of geopolitical advances in what some see as a spatially coherent maritime zone stretching from the eastern Pacific to the western Indian Ocean, including small island states and countries that line its littoral. It also analyzes the development and operationalization of Indo-Pacific policies and strategies of various key nations. Contributors provide both macro and micro perspectives to this critically significant topic, offering insights into the grand strategies of great powers as well as case studies ranging from the Philippines to the Maldives to Kenya. The book suggests that new rivalries, shifting alliances and economic ebbs and flows in the Indo-Pacific will generate new geopolitical realities and shape much else beyond in the twenty-first century. A timely contribution to the rapidly expanding policy and scholarly discussions about what is likely to be the defining region for international politics for coming generations, the book will be of interest to policymakers as well as students and academics in the fields of International Relations, Foreign Policy, Security Studies, Diplomacy and International Law, East and South Asian Studies, East African Studies, Middle East Studies, and Australian Studies.

Elusive Tipping Point, The: China-India Ties For A New Order Pisupati Sadasiva Suryanarayana,2021-02-08 The Elusive Tipping Point: China-India Ties for a New Order is a timely foreign-policy-relevant book. This insightful book delves deep into the reasons for frequent diplomatic and strategic crises between Asia's two dynamic ancient civilisations with post-modern capabilities. Set in the context of seventieth anniversary of China-India diplomacy, the spotlight is turned on their complex search for neighbourliness and global good. Often a mirage, the positive tipping point in their state-to-state relations is traced through the past, the present and the potential future. A controversial missed opportunity in the past and a collective-win approach for the present are explored. For Beijing and Delhi, imaginative all-weather dialogue is the best option if they wish to stabilise their engagement for the uncertain future. Despite their major military crisis, PRC and India are

expected to shape a realistic post-COVID world order.

China-India Relations Kanti Bajpai,Jing Huang,Kishore Mahbubani,2015-12-14 The question of whether China and India can cooperate is at the core of global geopolitics. As the two countries grow their economies, the potential for conflict is no longer simply a geopolitical one based on relative power, influence and traditional quarrels over land boundaries. This book assesses the varying interests of China and India in economics, environment, energy, and water and addresses the possibility of cooperation in these domains. Containing analyses by leading authorities on China and India, it analyses the nature of existing and emerging conflict, describes the extent of cooperation, and suggests possibilities for collaboration in the future. While it is often suggested that conflict between the giants of Asia is the norm, there are a number of opportunities for cooperation in trade, international and regional financial institutions, renewable energy development and climate change, and shared rivers. This book will be of interest to researchers in the fields of Asian Studies, International Relations, and Asian Politics.

The China-India Rivalry in the Globalization Era T.V. Paul,2018-09-03 As the aspirations of the two rising Asian powers collide, the China-India rivalry is likely to shape twenty-first-century international politics in the region and far beyond. This volume by T.V. Paul and an international group of leading scholars examines whether the rivalry between the two countries that began in the 1950s will intensify or dissipate in the twenty-first century. The China-India relationship is important to analyze because past experience has shown that when two rising great powers share a border, the relationship is volatile and potentially dangerous. India and China's relationship faces a number of challenges, including multiple border disputes that periodically flare up, division over the status of Tibet and the Dalai Lama, the strategic challenge to India posed by China's close relationship with Pakistan, the Chinese navy's greater presence in the Indian Ocean, and the two states' competition for natural resources. Despite these irritants, however, both countries agree on issues such as global financial reforms and climate change and have much to gain from increasing trade and investment, so there are reasons for optimism as well as pessimism. The contributors to this volume answer the following questions: What explains the peculiar contours of this rivalry? What influence does accelerated globalization, especially increased trade and investment, have on this rivalry? What impact do US-China competition and China's expanding navy have on this rivalry? Under what conditions will it escalate or end? The China-India Rivalry in the Globalization Era will be of great interest to students, scholars, and policymakers concerned with Indian and Chinese foreign policy and Asian security.

Accommodating Rising Powers T. V. Paul,2016-03-10 Addresses how to accommodate and integrate rising powers peacefully into the international order in the nuclear and globalized age.
China's Frontier Regions Doug Smith,2016-03-08 China has traditionally viewed her frontier regions--Zxinjiang, Tibet, Inner Mongolia and Yunnan--as buffer zones. Yet their importance as commercial and cosmopolitan hubs, intimately involved in the transmission of goods, peoples and ideas between China and it west and southwest has meant they are crucial for China's ongoing development. The resurgence of China under Deng Xiaoping's policy of 'reform and opening' has therefore led to a focus on integrating these regions into the PRC (People's Republic of China). This has important implications not only for the frontier regions themselves but also for the neighbouring states, with which they have strong cultural, religious, linguistic and economic ties. China's Frontier Regions explores the challenges presented by this integrationist policy, both for domestic relations and for diplomatic and foreign policy relations with the countries abutting their frontier regions.

Anthropology of Ascendant China Mayfair Yang,2024-05-06 This volume represents the latest research in cultural anthropology on an ascendant and globalizing China, covering the many different dimensions of China's ascendancy both within China itself and beyond. It focuses not only on the real and perceived successes of China in the past four decades, but also on the difficulties, tensions, and dangers that have emerged as a result of rapid economic development: class polarization, state expansion, psychological distress, and environmental degradation. Including contributions by some of the most well-known cultural anthropologists of China, as well as rising innovative younger scholars, this book documents and analyzes China's multifaceted transformations in the modern era—both within Chinese society and in Chinese relations with the outside world. It features the unique perspective of anthropology, with its on-the-ground deep cultural immersion through long-term fieldwork, coupled with a macrolevel global perspective, a strong historical perspective, and theoretically engaged analyses to present a balanced account of China's ascendancy. Anthropology of Ascendant China: Histories, Attainments, and Tribulations is suitable for students and scholars in Anthropology, Sociology, History, Political Science, and East Asian Studies, as well as those working on contemporary Chinese society and culture more broadly.
