Robert A. Brechner

Contemporary Mathematics for Business and

Consumers Robert A. Brechner, 1999-06-18 This book is an adventure into today's business world of the new millennium and its associated mathematical procedures. It is designed to provide solid mathematical preparation and foundation for students going on to various courses and careers. Packed with current real-life examples, discussions and illustrations, it features today's most important and frequently used business math procedures and applications. Bob Brechner's expansive expertise, both inside and out of the classroom is reflected in the text's reader-friendly writing style. The book begins with a business-oriented review of the basic operations, including whole numbers, fractions, and decimals. Once students have mastered these operations, they are introduced to the concept of basic equations and how equations are used to solve business problems. From that point, each chapter presents a business math topic that utilizes the student's knowledge of the basic operations and equations. In keeping with the philosophy of 'practice makes perfect' the text contains over 2000 realistic business math exercises- many with multiple steps and answers- designed to prepare students to use math to make business decisions and develop critical-thinking and problem-solving skills.

Moon-face and Other Stories Jack London, 1906
JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and

Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Introduction to CHEMICAL ENGINEERING

THERMODYNAMICS GOPINATH HALDER,2014-09-02

This book, now in its second edition, continues to provide a comprehensive introduction to the principles of chemical engineering thermodynamics and also introduces the student to the application of principles to various practical areas. The book emphasizes the role of the fundamental principles of thermodynamics in the derivation of significant relationships between the various thermodynamic properties. The initial chapter provides an overview of the basic concepts and processes, and discusses the important units and dimensions involved. The ensuing chapters, in a logical presentation, thoroughly cover the first and second laws of thermodynamics, the heat effects, the thermodynamic properties and their relations, refrigeration and liquefaction processes, and the

equilibria between phases and in chemical reactions. The book is suitably illustrated with a large number of visuals. In the second edition, new sections on Quasi-Static Process and Entropy Change in Reversible and Irreversible Processes are included. Besides, new Solved Model Question Paper and several new Multiple Choice Questions are also added that help develop the students' ability and confidence in the application of the underlying concepts. Primarily intended for the undergraduate students of chemical engineering and other related engineering disciplines such as polymer, petroleum and pharmaceutical engineering, the book will also be useful for the postgraduate students of the subject as well as professionals in the relevant fields.
