Biodiversity and Ecophysiology of Yeasts Carlos Augusto Rosa,Gabor Peter,2006-03-30 In the last few decades more and more yeast habitats have been explored, spanning cold climates to tropical regions and dry deserts to rainforests. As a result, a large body of ecological data has been accumulated and the number of known yeast species has increased rapidly. This book provides an overview of the biodiversity of yeasts in different habitats. Recent advances achieved by the application of molecular biological methods in the field of yeast taxonomy and ecology are also incorporated in the book. Wherever possible, the interaction between yeasts and the surrounding environment is discussed.

Vulnerable Workers Maria Giovannone,2016-02-11 The leading academic authorities contributing to this book have been involved in major studies carried out for international organisations, individual governments, and national trades' union organisations; in Vulnerable Workers they consider the growth of job insecurity, the prevalence of flexible or temporary work, and the emergence of precarious forms of self-employment. They look at the new market economies of post-communist Eastern Europe and China, where economic development may occur at the expense of workers' lives and health; 'misclassification' by employers of workers as 'contractors', denying them access to rights; and the plight of migrant, transient and 'invisible' workers. The impact of supply chain business strategies on the most vulnerable workers; and on the complex relationships between levels of job security and the presence of different kinds of risks are similarly assessed. The contributors also propose responses to the challenges they highlight. The role of employee representatives is examined, together with the potential to enhance worker capability through

organisational change. New legislative approaches, and changes to traditional compensation and social security systems are considered. Academics and researchers, policy makers, regulators, trades unionists and occupational health professionals - and wise employers - will all find a use for this book.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang,2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Ready to Work Executive Office of the President,2014-10-29 In his 2014 State of the Union address, as President Obama called for "a year of action" and predicted "a breakthrough year for America" in 2014, he emphasized the vital priority of equipping Americans

with the skills needed to realize the economic opportunity that a renewed American economy could provide. Two days later, in Waukesha, Wisconsin, he signed a Presidential Memorandum on Job-Driven Training for Workers, assigning Vice President Biden and the Secretaries of Labor, Commerce, and Education – working closely with the National Economic Council, the Domestic Policy Council, the Council of Economic Advisers, the Office of Science and Technology Policy, and the Office of Management and Budget – to develop within 180 days an action plan to make America's workforce and training system "more job-driven, integrated and effective." The Presidential Memorandum called for this action plan to include "concrete steps to make federal workforce and training programs and policies more focused on imparting relevant skills with job-market value, more easily accessed by employers and job seekers, and more accountable for producing positive employment and earning outcomes for the people they serve." Under the leadership of Vice President Biden, Secretary of Labor Tom Perez, Secretary of Commerce Penny Pritzker, and Secretary of Education Arne Duncan, the Administration engaged in an intensive review to identify, initiate, and implement actions to make federal employment and training programs and policies more job-driven and effective, consistent with existing statutory authority. This review benefitted from the work not only of the Departments of Labor, Commerce, and Education, but also from the constructive engagement of Cabinet Secretaries and leaders of employment, training, education, and workforce development programs in the Departments of Agriculture, Defense, Energy, Health and Human Services, Housing and Urban Development, Interior, Justice, Transportation, Veterans Affairs, the Social Security Administration, and Environmental Protection Agency, and

from the expertise of the Department of the Treasury, the National Science Foundation, and the Office of Personnel Management. The Presidential Memorandum on Job-Driven Training for Workers emphasized the importance of looking beyond our federal programs and agencies for answers and best practices, stating specifically that the Vice President and Secretaries "….shall consult with industry, employers and employer associations, state and local leaders, economic development organizations, worker representatives, education and training providers, workforce leaders, and relevant non-profit organizations."

Children Exposed to Domestic Violence Peter Jaffe,2018-10-24 Discover research from across the United States and around the world on children exposed to domestic violence! If you are a member of a helping, medical, or legal profession, Children Exposed to Domestic Violence: Current Issues in Research, Intervention, Prevention, and Policy Development will help you explore research, assessments, interventions, and policy and prevention for children, victims of battering, batterers, and their families. This important book focuses on various aspects of spousal/partner abuse and child maltreatment. Comprehensive and thorough, Children Exposed to

Domestic Violence focuses on three major sections: theoretical and research issues, intervention and prevention strategies, and policy development from an international perspective. Some of the important issues you will examine include: exploring the importance of partnerships between the domestic violence front-line workers and researchers at universities addressing the thorny issues of parenting in abused women assessing all areas of children's adjustment as well as their various relationships that may be problematic investigating the results of a quarter century research on men who batter by focusing on the crucial link between exposure to violence in childhood and adult marital behavior understanding the role of physiological and environmental factors as central to the role in domestic violence exploring the challenges faced by shelter staff in providing services to children who accompany their mother to find refuge examining new ideas for primary prevention programs in schools understanding policy and legislative implications of the growing body of literature on the impact of exposure to violence on children Children Exposed to Domestic Violence exemplifies the serious challenges faced by social workers, educators, policymakers, psychologists and others in helping professions working with children who have been exposed to domestic violence. You will gain insight into the vast amount of research that has taken place in the last ten years on this problem that will assist you with creating research ideas, interventions, prevention programs, and policies concerning children exposed to domestic violence.

   Children of Battered Women Peter G. Jaffe,David A. Wolfe,Susan Kaye Wilson,1990-03-01 The devastating impact of family violence on children, the links between violence and spouse abuse on child development and clinical dysfunction, children's views of violence, and

strategies for intervention and prevention are considered in this volume. The authors discuss cases, conceptual models of abuse and dysfunction, and empirical research to portray the scope of the problem and explore promising avenues of resolution.

XXXXX Xxxxx,Martin Howse,2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine,

informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War,

again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adapter which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

Online Deliberation Todd Davies,Seeta Peña Gangadharan,2009 Can new technology enhance local, national, and global democracy? Online Deliberation is the first book that attempts to sample the full range of work on online deliberation, forging new connections between academic research, web designers, and practitioners. Since the most exciting innovations in deliberation have occurred

outside of traditional institutions, and those involved have often worked in relative isolation from each other, research conducted on this growing field has to this point neglected the full perspective of online participation. This volume, an essential read for those working at the crossroads of computer and social science, illuminates the collaborative world of deliberation by examining diverse clusters of Internet communities.

Communication for Health Care Catherine Anne Berglund,Deborah Saltman,2002 This text follows the key information steps in health care. It places communication in context, where professionals meet and work with patients, alongside other members of their own profession and with members of other professions in one healthcare team.

LITERACY DRIVE AND REHABILITATION OF THE STREET CHILDREN OF KOLKATA: AN ANALYTICAL STUDY Dr. Shabana Haydar,

Moon-face and Other Stories Jack London,1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master′s death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of

London´s most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

The Annenbergs John E. Cooney,1982 This is the colorful and dramatic biography of two of America's most controversial entrepreneurs: Moses Louis Annenberg, 'the racing wire king, ' who built his fortune in racketeering, invested it in publishing, and lost much of it in the biggest tax evasion case in United States history; and his son, Walter, launcher of TV Guide and Seventeen magazines and former ambassador to Great Britain.--Jacket.
