Risk Management in Crisis Piotr Jedynak,Sylvia Bąk,2021-08-19 Risk management is a domain of management which comes to the fore in crisis. This book looks at risk management under crisis conditions in the COVID-19 pandemic context. The book synthesizes existing concepts, strategies, approaches and methods of risk management and provides the results of empirical research on risk and risk management during the COVID-19 pandemic. The research outcome was based on the authors' study on 42 enterprises of different sizes in various sectors, and these firms have either been negatively affected by COVID-19 or have thrived successfully under the new conditions of conducting business activities. The analysis looks at both the impact of the COVID-19 pandemic on the selected enterprises and the risk management measures these enterprises had taken in response to the emerging global trends. The book puts together key factors which could have determined the enterprises' failures and successes. The final part of the book reflects on how firms can build resilience in challenging times and suggests a model for business resilience. The comparative analysis will provide useful insights into key strategic approaches of risk management. Yavneh Raz Kletter, Irit Ziffer, Wolfgang Zwickel, 2010 In the words of late Professor Moshe Kochavi, the Philistine repository pit at Yavneh is the kind of discovery made only once every fifty years. It is the richest repository pit ever found from Bronze and Iron Ages Israel/Palestine, containing thousands of cultic finds originating from a temple, including an unprecedented number - more than a hundred - of cult stands (so-called 'architectural models') carrying rich figurative art, dozens of fire-pans, chalices and other objects. The present volume includes the full publication of the excavation, the stratigraphy, the cult stands and the figures detached from cult stands, several clay and stone altars and some pottery vessels related to burning of plant material, most likely incense. This exceptional book raises a host of highly important and intriguing questions. Is this a favissa, or even a genizah? Why are many cult stands badly broken, while some are intact - were cult stands broken on purpose? What is the explanation for the unique stratigraphy and for the layer of gray ash in the pit - was fire kindled inside as part of a ritual? How do we know that these finds are Philistine? Are they part of the 'furniture' of the temple or objects dedicated by worshippers as votives? Do the figures on the cult stands represent mortal beings, or divinities? If divinities, can we relate them with Biblical or extra-biblical data on the gods of the Philistines? What was the function/s of cult stands? Were they models of buildings, supports for images, offering tables, altars, or perhaps incense burners? Why are female figures dominant, while male figures are virtually absent? In discussing such topics, Yavneh I treats issues that are central to many fields of study:

religion and cult in Iron Age Israel/Palestine; the history and archaeology of the Philistines and their 'western' relations; Near Eastern iconography, the meaning of cult stands/architectural models and the understanding of votive objects and of repository pits in general. Literally salvaged from the teeth of a bulldozer, these rare finds are now published. Generations of scholars will discuss and reinterpret them - there is no 'final word' for such finds and hence, this final excavation volume is not an end, but a beginning.

GMPLS Adrian Farrel, Igor Bryskin, 2005-12-20 The last two years have seen significant developments in the standardization of GMPLS and its implementation in optical and other networks. **GMPLS: Architecture and Applications** brings you completely up to date, providing the practical information you need to put the growing set of GMPLS-supported services to work and manage them effectively. This book begins by defining GMPLS's place in a transport network, leveraging your knowledge of MPLS to give you an understanding of this radically new control plane technology. An overview of GMPLS protocols follows, but the real focus is on what comes afterwards: in-depth examinations of the architectures underpinning GMPLS in real-world network environments and current and emerging GMPLS applications. This one-of-a-kind resource delivers immensely useful information for software architects, designers and programmers, hardware developers, system testers, and network operators--and also for managers and other decision-makers. Written by two industry researchers at the forefront of the development of GMPLS. Provides a practical look at GMPLS protocols for signaling, routing, link and resource management, and traffic engineering. Delves deep into the world of GMPLS applications, including traffic engineering, path computation, layer one VPNs, point-to-multipoint connectivity, service management, and resource protection. Explores three distinct GMPLS control plane architectures: peer, overlay, and hybrid, and explains the GMPLS UNI and NNIs. Explains how provisioning challenges can be met in multi-region networks and details the provisioning systems and tools relied on by the GMPLS control plane, along with the standard MIB modules used to manage a GMPLS system.
