Innovations in Land Rights Recognition, Administration, and Governance Klaus Deininger, Clarissa Augustinus, Stig Enemark, Paul Munro-Faure, 2010-10-22 The importance of good land governance to strengthen women's land rights, facilitate land-related investment, transfer land to better uses, use it as collateral, and allow effective decentralization through collection of property taxes has long been recognized. The challenges posed by recent global developments, especially urbanization, increased and more volatile food prices, and climate change have raised the profile of land and the need for countries to have appropriate land policies. However, efforts to improve country-level land governance are often frustrated by technical complexities, institutional fragmentation, vested interests, and lack of a shared vision on how to move towards good land governance and measure progress in concrete settings. Recent initiatives have recognized the important challenges this raises and the need for partners to act in a collaborative and coordinated fashion to address them. The breadth and depth of the papers included in this volume, all of which were presented at the World Bank's Annual Conference on Land Policy and Administration, illustrate the benefits from such collaboration. They are indicative not only of the diversity of issues related to land governance but, more importantly, highlight that, even though the topic is complex and politically challenging, there is a wealth of promising new approaches to improving land governance through innovative technologies, country-wide policy dialogue, and legal and administrative reforms. The publication is based on an on-going partnership between the World Bank, the International Federation of Surveyors, the Global Land Tool Network and the United Nations Food and Agriculture Organization provide tools that can help to address land governance in practice and at scale. It is our hope that this volume will be of use to increase awareness of and support to the successful implementation of innovative approaches that can help to not only improve land governance, but also thereby contribute to the well-being of the poorest and the achievement of the Millennium Development Goals.

The Quest for Alpha Larry E. Swedroe, 2010-12-20 The final word on passive vs. active investing The debate on active investing-stock picking and market timing-versus passive investing-markets are highly efficient and almost impossible to outperform-has raged for decades. Which side is right? In *The Quest for Alpha: The Holy Grail of Investing*, author Larry E. Swedroe puts an end to the debate, proving once and for all that active investing is likely to prove futile as the associated expenses-costs, fees, and time spent analyzing individual stocks and the overall market-are likely to exceed any benefits gained. The book Presents research, data, and quotations that reveal it's extremely difficult to outperform the market Explains why investors should focus on asset allocation, fund construction, costs, tax efficiency, and the building of a globally diversified portfolio that minimizes, if not eliminates, the taking of idiosyncratic, uncompensated risks Other titles by Swedroe: *The Only Guide to Alternative Investments You'll Ever Need* and *The Only Guide You'll Ever Need for the Right Financial Plan* Investors are on a never-ending search for a money manager who will deliver returns above the appropriate risk-adjusted benchmark, aka the Holy Grail of Investing. *The Quest for Alpha* demonstrates that it's a loser's game-while it's possible to win, it's so unlikely that you shouldn't try.

Phylogenetic Perspectives on the Vertebrate Immune System Gregory Becker, Manickam Sugumaran, Edwin L. Cooper, 2012-11-13 This book contains the proceedings of the first meeting on invertebrate immunity ever sponsored as a summer research conference by the Federation of American Societies for Experimental Biology (FASEB). The conference was held in Copper Mountain, CO from July 11-16, 1999. It was an extension of a New York Academy of Sciences meeting entitled *Primordial Immunity: Foundations for the Vertebrate Immune System* held on May 2-5, 1993 at the Marine Biological Laboratories in Woods Hole, MA. The proceedings of that meeting were published in *The Annals of the New York Academy of Sciences* (volume 712). At that meeting all the attendees agreed that this type of conference (a relatively small focused gathering) allowed for participation by investigators at all levels of their careers. We further agreed that we should search for a forum that would allow this meeting to continue. The FASEB Summer Research Conference was an excellent vehicle for this type of meeting. Furthermore, this year's participants decided to continue this meeting as a regularly scheduled FASEB sponsored event. This was a unique conference in the sense that it focused upon mechanisms of development and defense in protostome and deuterostome invertebrates and lower vertebrates. There was a strong emphasis on evolutionary cell biology, phylogenetic inferences and the evolution of recognition and regulatory systems.

Child Protection and Child Welfare John Dixon, Penelope Welbourne, 2013-08-28 *Child Protection and Child Welfare* draws on the knowledge of child protection experts and social care professionals to provide an authoritative international overview of child protection strategy and policy. Devoting particular attention to the role played by culture in determining child welfare issues and child protection responses, this book illustrates the

impact of both long-term influences, such as the legacy of the caste system in India, and more recent global events, such as the development of international trade in Ghana and shrinking budgets in Italy on national approaches to supporting families and children. The international perspective aims to enhance our understanding of the range of possible approaches, encouraging researchers, policymakers and practitioners to think critically about current models, and providing insights for developing practice. This important book will be essential reading for social workers, policy makers, child protection service workers, commissioners and managers across child and family welfare services, as well as researchers and academics in the field.

Judicial Process and Judicial Policymaking George Alan Tarr, 2023-11 An excellent introduction to judicial politics as a method of analysis, the seventh edition of Judicial Process and Judicial Policymaking focuses on policy in the judicial process. Rather than limiting the text to coverage of the U.S. Supreme Court, G. Alan Tarr examines the judiciary as the third branch of government, and weaves four major premises throughout the text: 1. Courts in the United States have always played an important role in governing and their role has increased in recent decades; 2. Judicial policymaking is a distinctive activity; 3. Courts make policy in a variety of ways; and 4. Courts may be the objects of public policy, as well as creators--

GMPLS Adrian Farrel, Igor Bryskin, 2005-12-20 The last two years have seen significant developments in the standardization of GMPLS and its implementation in optical and other networks. GMPLS: Architecture and Applications brings you completely up to date, providing the practical information you need to put the growing set of GMPLS-supported services to work and manage them effectively. This book begins by defining GMPLS's place in a transport network, leveraging your knowledge of MPLS to give you an understanding of this radically new control plane technology. An overview of GMPLS protocols follows, but the real focus is on what comes afterwards: in-depth examinations of the architectures underpinning GMPLS in real-world network environments and current and emerging GMPLS applications. This one-of-a-kind resource delivers immensely useful information for software architects, designers and programmers, hardware developers, system testers, and network operators--and also for managers and other decision-makers. Written by two industry researchers at the forefront of the development of GMPLS. Provides a practical look at GMPLS protocols for signaling, routing, link and resource management, and traffic engineering. Delves deep into the world of GMPLS applications, including traffic engineering, path computation, layer one VPNs, point-to-multipoint connectivity, service management, and resource protection. Explores three distinct GMPLS control plane architectures: peer, overlay, and hybrid, and explains the GMPLS UNI and NNIs. Explains how provisioning challenges can be met in multi-region networks and details the provisioning systems and tools relied on by the GMPLS control plane, along with the standard MIB modules used to manage a GMPLS system.

Social Presence and Identity in Online Learning Patrick R. Lowenthal, Vanessa P. Dennen, 2020-06-09 This book is an investigation into the role which social presence and identity play in online learning environments. Scholars across disciplines have grappled with the questions of what it means for a person to be and to interact online. In the context of online learning, these questions reflect specific concerns related to how well people can learn in a setting limited to mediated interactions and lacking various communication cues. For example, how can a teacher and students come to know each other if they cannot see each other? How can they effectively understand and communicate with each other if they are separated by space and, in many instances, time? These concerns are related to social presence and identity, both of which are complex, multi-faceted, and closely interrelated constructs. The chapters in this book consider how online learning has developed and changed over time in terms of technology, pedagogy, and familiarity. Collectively these chapters show the diverse ways that educational researchers have explored social presence and identity. They also highlight some of the nuanced concerns online educators might have in these areas. This book was originally published as a special issue of Distance Education.
