My Windows 8 Consumer Preview Katherine Murray, 2012-04-09 This book gives you a first look at the exciting new features in Windows 8 Consumer Preview, the beta version of the operating system Microsoft released to the public on February 29, 2012. Chances are good that you've already heard about the flashy new Metro style of the Windows 8 interface. The new look may be the biggest news item you've been hearing about, but the changes in Windows 8 go far beyond the surface design changes. Windows 8 is a new program from the ground up, meaning that the experience it offers you will be much different from any version of Windows you've used before. Windows 8 is fast and fluid, bringing you the updates you need quickly, while providing reliable access to the programs and files you depend on as you go about your daily tasks. Whether you are sharing photos, checking your social media accounts, designing a presentation, or listening to your favorite podcast, Windows 8 gives you the means to move through your tasks smoothly in any order or combination you choose. Some folks welcome this kind of new energy in technology; others aren't so sure a complete makeover is a good idea. Whichever camp you find yourself in, this book will help you learn more about what you can expect from Windows 8. Some of the biggest changes we'll discuss in this book include: Navigating the new Start screen, customizing Start screen colors, and displaying your favorite apps as you want them to appear Using live tiles to get the latest information for your favorite apps Using touch and mouse-based techniques to personalize your Windows 8 experience and work with files, folders, and more Enhancing the security of your system by changing your Lock Screen, adding a picture password, and creating a PIN logon Learning to work fluidly with open apps,

cycling through open apps, docking apps, and closing or suspending apps you no longer need Using the Refresh and Reset tools to give your computer a fresh start if you're having computer problems Shopping for apps in the Windows Store, installing apps on your computer, and adding ratings and reviews to let other shoppers know what you think Browsing with the sleek and streamlined Internet Explorer 10

Introducing Windows 10 for IT Professionals, Preview Edition Ed Bott,2015-05-11 Get a head start evaluating Windows 10--with early technical insights from award-winning journalist and Windows expert Ed Bott. This guide introduces new features and capabilities, providing a practical, high-level overview for IT professionals ready to begin deployment planning now. This book is a preview, a work in progress about a work in progress. It offers a snapshot of the Windows 10 Technical Preview as of April 2015, on the eve of the BUILD Developers' Conference in San Francisco.

What Technology Wants Kevin Kelly,2011-09-27 From the author of the New York Times bestseller *The Inevitable*— a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed-or what it wants. Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

New Trends in the Use of Artificial Intelligence for the Industry 4.0 Luis Romeral Martinez, Roque A.

Osornio-Rios, Miguel Delgado Prieto, 2020-03-25 *Industry 4.0* is based on the cyber-physical transformation of processes, systems and methods applied in the manufacturing sector, and on its autonomous and decentralized operation. Industry 4.0 reflects that the industrial world is at the beginning of the so-called Fourth Industrial Revolution, characterized by a massive interconnection of assets and the integration of human operators with the manufacturing environment. In this regard, data analytics and, specifically, the artificial intelligence is the vehicular technology towards the next generation of smart factories. Chapters in this book cover a diversity of current and new developments in the use of artificial intelligence on the

industrial sector seen from the fourth industrial revolution point of view, namely, cyber-physical applications, artificial intelligence technologies and tools, Industrial Internet of Things and data analytics. This book contains high-quality chapters containing original research results and literature review of exceptional merit. Thus, it is in the aim of the book to contribute to the literature of the topic in this regard and let the readers know current and new trends in the use of artificial intelligence for the Industry 4.0.

Emerging Topics in Management Studies Patrícia Moura e Sá, 2020-08-02 Presently, Management has witnessed vast advancements, clearly becoming an area of trans and interdisciplinary knowledge. It has widened its scope from traditional business areas – such as marketing, strategy, management control, accounting and finance, taxation or operations – to other spaces, namely deepening bridges with behavioural sciences, engineering, health, or energy, fostering both quantitative models and methods. Management thinking at the Faculty of Economics of the University of Coimbra (FEUC) has followed these trends, enabling students with the essential skills supporting the practice of the profession, both in business and public sector organisations. This book features topical trends of research in Management studies, in which FEUC professors are involved, together with international peers, evidencing the openness of the Faculty to the world. Numerous of the subjects addressed relate to challenges that organisations are already facing or will have to deal with shortly. Therefore, the book not only presents innovative research questions, but it also delivers a practical perspective. Thus, organisations will certainly find here some support to better manage those issues in practice.

CALL and complexity – short papers from EUROCALL 2019 Fanny Meunier, Julie Van de

Vyver,Linda Bradley,Sylvie Thouësny,2019-12-09 The theme selected for the 2019 EuroCALL conference held in Louvain-la-Neuve was ‘CALL and complexity’. As languages are known to be intrinsically and linguistically complex, as are the many determinants of learning (additional) languages, complexity is viewed as a challenge to be embraced collectively. The 2019 conference allowed us to pay tribute to providers of CALL solutions and to recognize the complexity of their task. We hope you will enjoy reading this volume as it offers a rich glimpse into the numerous debates that took place during EuroCALL 2019. We look forward to continuing those debates and discussions with you at the next EuroCALL conferences!

The world universities’ response to COVID-19: remote online language teaching Nebojša

Radić,Anastasia Atabekova,Maria Freddi,Josef Schmied,2021-05-24 This collection of case studies is special for several reasons. Firstly, because of the geographical and institutional diversity of the authors, bringing together experiences of teaching under COVID-19 restrictions in the university language classroom from 18 countries and five continents. Secondly, the publication is interesting because of the variety of case studies that testify to different strategies and emphases in dealing with pandemic-related challenges. Finally, the case studies collected strikingly demonstrate the creative responses of language teachers in a variety of contexts to meet the challenges of the pandemic crisis (Dr Sabina Schaffner).

Advanced Computer and Communication Engineering Technology Hamzah Asyrani Sulaiman,Mohd

Azlishah Othman,Mohd Fairuz Iskandar Othman,Yahaya Abd Rahim,Naim Che Pee,2015-12-28 This book covers diverse aspects of advanced computer and communication engineering, focusing specifically on industrial and manufacturing theory and applications of electronics, communications, computing and

information technology. Experts in research, industry, and academia present the latest developments in technology, describe applications involving cutting-edge communication and computer systems, and explore likely future trends. In addition, a wealth of new algorithms that assist in solving computer and communication engineering problems are presented. The book is based on presentations given at ICOCOE 2015, the 2nd International Conference on Communication and Computer Engineering. It will appeal to a wide range of professionals in the field, including telecommunication engineers, computer engineers and scientists, researchers, academics and students.

Phenolic Resins: A Century of Progress Louis Pilato, 2010-03-10 The legacy of Leo Hendrik Baekeland and his development of phenol formaldehyde resins are recognized as the cornerstone of the Plastics Industry in the early twentieth century, and phenolic resins continue to flourish after a century of robust growth. On July 13, 1907, Baekeland filed his “heat and pressure” patent related to the processing of phenol formaldehyde resins and identified their unique utility in a plethora of applications. The year 2010 marks the Centennial Year of the production of phenolic resins by Leo Baekeland. In 1910, Baekeland formed Bakelite GmbH and launched the manufacture of phenolic resins in Erkner in May 1910. In October 1910, General Bakelite began producing resins in Perth Amboy, New Jersey. Lastly, Baekeland collaborated with Dr. Takamine to manufacture phenolic resins in Japan in 1911. These events were instrumental in establishing the Plastics Industry and in tracing the identity to the brilliance of Dr. Leo Baekeland. Phenolic resins remain as a versatile resin system featuring either a stable, thermoplastic novolak composition that cures with a latent source of formaldehyde (hexa) or a heat reactive and perishable resole composition that

cures thermally or under acidic or special basic conditions. Phenolic resins are a very large volume resin system with a worldwide volume in excess of 5 million tons/year, and its growth is related to the gross national product (GNP) growth rate globally.

The Sky at Einstein's Feet William C. Keel, 2006-08-29 Specifically traces the impact of Einstein's ideas on astronomy, including the way we interpret observations of stars and galaxies. Includes comments from principals in important discoveries, illuminating the processes behind these results. Presents many applications of relativity that have not been shown in earlier popular-level books and illustrates how deeply physics permeates the way we interpret many astronomical phenomena. Highlights light-travel delays in cosmic jets, using gravitational lensing to trace cosmic mass distribution. Illustrations employ new and archival data from ground- and space-based observatories.

THz Communications Thomas Kürner, Daniel M. Mittleman, Tadao Nagatsuma, 2021-12-07 This book describes the fundamentals of THz communications, spanning the whole range of applications, propagation and channel models, RF transceiver technology, antennas, baseband techniques, and networking interfaces. The requested data rate in wireless communications will soon reach from 100 Gbit/s up to 1 Tbps necessitating systems with ultra-high bandwidths of several 10s of GHz which are available only above 200 GHz. In the last decade, research at these frequency bands has made significant progress, enabling mature experimental demonstrations of so-called THz communications, which are thus expected to play a vital role in future wireless networks. In addition to chapters by leading experts on the theory, modeling, and implementation of THz communication technology, the book also features the latest experimental results

and addresses standardization and regulatory aspects. This book will be of interest to both academic researchers and engineers in the telecommunications industry.

International Complete Collection of R&D Information about Traditional Chinese Materia Medica and Biotechnology Enterprises Zhengsong Zhan, 2010-04-01 The International Complete Collection of R&D Information about Traditional Chinese Materia Medica (TCMM) and Biotechnology (BT) Enterprises is designed as an informative medicinal reference directory listing of up-to-date R&D information about TCMM, medical biotechnology, and related medical equipment companies. The focus of this valuable and practical directory is on providing a comprehensive coverage of the most recent developments in scientific research, patents and major products of about 3,000 companies from 50 countries covering the five continents: Asia, Europe, America, Africa and the Oceania. The resource material and information are relevant and compulsory to practitioners and professionals in the fields of TCMM, medical biotechnology, biochemical industry and related medical instrumentation/equipment, as well as to organizational departments of the medicinal information management, intelligence, logistics and trade. The directory also opens up and serves as an important window through which biotech professionals master product information of their counterparts across the world. The directory will benefit professionals of medical health, TCMM, biotechnology and related fields, as well as academics and students, executives of research, information media staffs and translators.

Out Of Control Kevin Kelly, 2009-04-30 Out of Control chronicles the dawn of a new era in which the machines and systems that drive our economy are so complex and autonomous as to be indistinguishable

from living things.

Digital Information Processing and Communications Václav Snásel, Jan Platos, Eyas El-Qawasmeh, 2011-06-30 This two-volume-set (CCIS 188 and CCIS 189) constitutes the refereed proceedings of the International Conference on Digital Information Processing and Communications, ICDIPC 2011, held in Ostrava, Czech Republic, in July 2011. The 91 revised full papers of both volumes presented together with 4 invited talks were carefully reviewed and selected from 235 submissions. The papers are organized in topical sections on network security; Web applications; data mining; neural networks; distributed and parallel processing; biometrics technologies; e-learning; information ethics; image processing; information and data management; software engineering; data compression; networks; computer security; hardware and systems; multimedia; ad hoc network; artificial intelligence; signal processing; cloud computing; forensics; security; software and systems; mobile networking; and some miscellaneous topics in digital information and communications.

Bacteriophages Martha R. J. Clokie, Andrew Kropinski, 2010-11-19 Ranging from the evolution of pathogenicity to oceanic carbon cycling, the many and varied roles that bacteriophages play in microbial ecology and evolution have inspired increased interest within the scientific community. *Bacteriophages: Methods and Protocols* pulls together the vast body of knowledge and expertise from top international bacteriophage researchers to provide both classical and state-of-the-art molecular techniques. With its well-organized modular design, *Volume 2: Molecular and Applied Aspects* examines a multitude of topics, including the bacteriophage genomics, metagenomics, transcriptomics, and proteomics, along with applied

bacteriophage biology. Written in the highly successful Methods in Molecular Biology™ series format, chapters consist of brief introductions to the subject, lists of the necessary materials and reagents, readily reproducible laboratory protocols, and a Notes section which details tips on troubleshooting and avoiding known pitfalls. Thorough and cutting-edge, Bacteriophages: Methods and Protocols is a valuable reference for experienced bacteriophage researchers as well as an easily accessible introduction for newcomers to the subject.

Smart Environment for Smart Cities T.M. Vinod Kumar, 2019-04-04 This book discusses the design and practice of environmental resources management for smart cities. Presenting numerous city case studies, it focuses on one specific environmental resource in each city. Environmental resources are commonly owned properties that require active inputs from the government and the people, and in any smart city their management calls for a synchronous combination of e-democracy, e-governance and IOT (Internet of Things) systems in a 24/7 framework. Smart environmental resources management uses information and communication technologies, the Internet of Things, internet of governance (e-governance) and internet of people (e-democracy) along with conventional resource management tools to achieve coordinated, effective and efficient management, development, and conservation that equitably improves ecological and economic welfare, without compromising the sustainability of development ecosystems and stakeholders.

Building and Using Binoscopes Norman Butler, 2014-10-25 Provides easy to understand information and guidelines about the design and construction of binoscopes Focusing on both homemade and commercial products, this book provides the reader with simple and straightforward information about the modelling

and building of binoscopes. Binoscopes can be thought of as binoculars enlarged to the size of telescopes: essentially, a combination of the two. Constructing a binoscope is easier than most people think, but it still demands attention to detail and proper background knowledge. The author goes on to provide additional information about how to understand the products currently on the market, should the reader choose to purchase a binoscope instead of building one. Lastly, the book also compares binoscopes with telescopes in great detail, outlining the differences the reader can expect to see in the night sky from using both. The celestial views obtained with a binoscope, compared to a single telescope of the same aperture, are a very different experience and well worth the effort.

Information and Communication Technology for Sustainable Development Milan Tuba, Shyam Akashe, Amit Joshi, 2019-06-26 The book proposes new technologies and discusses future solutions for ICT design infrastructures, and includes high-quality submissions presented at the Third International Conference on ICT for Sustainable Development (ICT4SD 2018), held in Goa, India on 30–31 August 2018. The conference stimulated cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. Bringing together experts from different countries, the book focuses on innovative issues at an international level.

Million Mile Road Trip Rudy Rucker, 2019-05-07 Three teens ride a car across the universe and back. Look out for the flying saucers! Tipping his hat to Thomas Pynchon, Jack Kerouac, and Douglas Adams, Rucker immerses readers in a fantastical roadtrip adventure that's a wild ride of unmitigated joy. . . . he ties everything together with internal consistency, playful use of language that keeps his ideas alien yet

accessible, and a solid grounding in fourth-dimensional math. This wacky adventure is a geeky reader's delight.—Publishers Weekly, starred review
