**The Greek Crisis in the Media** George Tzogopoulos,2020-07-26 The portrayal of Greece by the international press during the financial crisis has been seen by many independent observers as very harsh. The Greeks have often been blamed for a myriad of international political problems and external economic factors beyond their control. In this original and insightful work George Tzogopoulos examines international newspaper coverage of the unfolding economic crisis in Greece. American, British, French, German and Italian broadsheet and tabloid coverage is carefully analysed. The Greek Crisis in the Media debates and dissects the extent to which the Greek response to the financial crisis has been given fair and balanced coverage by the press and questions how far politics and national stereotypes have played their part in the reporting of events. By placing the Greek experiences and treatment alongside those of other EU members such as Portugal, Ireland, Italy and Spain, Tzogopoulos examines and highlights similarities and differences in the ways in which different countries tackled the challenges they faced during this crucial period and explores how and why the world's media reported these events.

**Indian Ocean Challenges: A Quest for Cooperative Solutions** Vice Admiral Pradeep Kaushiva,Commander Abhijit Singh,2013-02-15 The Indian Ocean Region (IOR) is of immense strategic significance on the global maritime map – not just on account of its centrality to the current trade and energy flows, but also because of the extreme disparities and inherent volatility of the region. The region faces an array of security challenges, both traditional and non-traditional. These include security of SLOCs, the problem of piracy, the possibility of renewed terrorism at and from the sea and the pervasive smuggling of people, narcotics and arms. The narrative of regional maritime security is also characterized by oscillating economic growth, growing military presence and a rapidly deteriorating ecological balance in the Indian Ocean. A stand-out feature of the IOR is the lack of correspondence between nations on issues concerning 'security'. While using the high seas for trade, transportation of energy, major powers have tended to neglect the impact of the economic activities on the sea itself. In contrast, smaller regional countries and island states with developing economies have, at best, been able to use only those resources of the sea which are vital to their survival. As the challenges rise, the need to factor in and secure effective management of the Indian Ocean has turned into a compelling imperative. While governments and authorities grapple with complex issues trying to forge a coherent maritime policy, there is a growing recognition that unless solutions are found quickly, lives, livelihoods, and in some cases the very future of local populations could be at risk. This book contains a comprehensive overview of perspectives of some of the stakeholders in the Indian Ocean Region. It seeks to identify the key maritime security issues and explores the potential contribution of the stakeholders in meeting these challenges.

**Warriors of Ultramar** Graham McNeill, 2015-05 In the cold darkness of space, the voracious alien tyrannids travel from world to world, consuming all in a futile attempt to slake their hunger for bio-matter. Lying directly in their path is the industrial planet Tarsis Ultra, where Captain Uriel Ventris and the Ultramarines of Fourth Company stand shoulder to shoulder with their battle-brothers from the Mortifactors Chapter. As war rages and the situation looks bleak, Uriel must accept the barbaric traditions of his allies and act against the ancient tactics laid down in the holy Codex Astartes if there is to be any chance of destroying the alien menace. *Globalization and Latin American Cinema* Sophia A. McClennen, 2018-05-25 Studying the case of Latin American cinema, this book analyzes one of the most public - and most exportable - forms of postcolonial national culture to argue that millennial era globalization demands entirely new frameworks for thinking about the relationship between politics, culture, and economic policies. Concerns that globalization would bring the downfall of national culture were common in the 1990s as economies across the globe began implementing neoliberal, free market policies and abolishing state protections for culture industries. Simultaneously, new technologies and the increased mobility of people and information caused others to see globalization as an era of heightened connectivity and progressive contact. Twenty-five years later, we are now able to examine the actual impact of globalization on local and regional cultures, especially those of postcolonial societies. Tracing the full life-cycle of films and studying blockbusters like *City of God*, *Motorcycle Diaries*, and *Children of Men* this book argues that neoliberal globalization has created a highly ambivalent space for cultural expression, one willing to market against itself as long as the stories sell. The result is an innovative and ground-breaking text suited to scholars

interested in globalization studies, Latin-American studies and film studies.

*Business Models and Modelling*, 2015-11-09 In this volume leading scholars from North America, Europe and Asia come together to explore the topic of business models that takes the demand side (customers and their engagement) seriously. The first part deals with the model dimension of business models. The second part deals with business models and change.

**Québec, Canada, Russie, 100 miroirs** Etienne Berthold, Henri Dorion, 2016-02-24 T00:00:00-05:00 De plus en plus au Québec et au Canada, on s'intéresse à la Russie qui, après les difficiles lendemains de la chute du régime soviétique et de la désintégration de l'URSS, reprend maintenant sa place sur l'échiquier mondial. Tant sur le plan de l'enseignement et de la recherche universitaires que sur celui de la coopération internationale gouvernementale et privée, les relations entre le Québec et le Canada, d'une part, et la Russie, d'autre part, profitant de cette conjoncture, se développent rapidement. Le présent ouvrage se veut une contribution à une meilleure connaissance réciproque de ces régions en présentant cent sujets de comparaison dans des domaines aussi différents que la géographie, l'histoire, l'économie, la culture, les institutions. La méthode comparative se justifie par le fait que, pour le lecteur, la connaissance des données relatives à son pays constitue une base utile à la compréhension des phénomènes de l'autre région. Les textes étant bilingues, ils pourront subsidiairement servir à une familiarisation interlinguistique.

*Iron Warriors Omnibus* Graham McNeill, 2019-04-02 A great omnibus, collecting together Iron warriors stories from two great Black Library authors. The traitorous Iron Warriors are masters of siegecraft, builders of nigh-impenetrable defences - and just as good at tearing down those of their foes, as these action-packed tales of siege warfare demonstrate.

*Beyond Economic Growth* Tatyana P. Soubbotina, Katherine Sheram, 2000-01-01 The book, which draws on data published by the World Bank, is addressed to teachers, students, and all those interested in exploring issues of global development.
