A Regulatory Design for Financial Stability in Hong Kong Evan Gibson, 2022-09-01 In Hong Kong, the banking system is the primary source of financial stability risk. Post-2008 regulatory reforms have focused on financial stability policies and tools while neglecting the design of supervisory models. This book provides a comparative analysis of how supervisory models affect the management of financial stability regulations in Hong Kong's banking system. Regulatory issues discussed span prudential regulations, systemically important banks, unconventional liquidity tools, deposit insurance, lender of last resort, resolution regimes, central clearing counterparties and derivatives, Renminbi infrastructure, stock and bond connect schemes, distributed ledger technology, digital yuan, US dollar sanctions, cryptocurrencies, RegTech, and FinTech. *A Regulatory Design for Financial Stability in Hong Kong* elucidates the flaws and synergies in Hong Kong's banking regulatory framework and proposes conventional and innovative regulatory reforms. This book will be of great interest to banking, financial, and legal practitioners, central bankers, regulators, policy makers, finance ministries, scholars, researchers, and policy institutes.

The Oxford Handbook of the Economics of Central Banking David G. Mayes, Pierre L. Siklos, Jan-Egbert Sturm, 2019-03-15 The Handbook reflects the state of the art in the theory and practice of central banking. It covers all the essential areas that have come under scrutiny since the global financial crisis of 2007-9--

Global Gender and Environment Outlook 2016 United Nations Environment Programme, 2016-09-15 The Global Gender and Environment Outlook (GGEO) provides an overview of critical evaluations and analyses of the interlinkages between gender and the environment, and their importance for gender-

sensitive policymaking and actions. The GGEO was first proposed by the Network of Women Ministers and Leaders for the Environment (NWMLE) to UNEP at the United Nations Conference on Sustainable Development (Rio+20). The 2014 United Nations Environment Assembly subsequently welcomed the development of the GGEO, and the use of social science information and gender relevant indicators to examine the links between gender and the environment. The report describes policy options and concrete opportunities to contribute to the future we want - a future of justice and equality that leaves no one behind. It reflects and builds on the ground-breaking work of hundreds of scientists, policy experts, gender advocates and members of community groups. And it examines a wide range of topics, including food production, water and sanitation, energy, sustainable consumption and production, fisheries and fishing communities, and forests and those who depend on them for their livelihoods.

The Consequences of the Crisis on European Integration and on the Member States Stelio

Mangiameli, 2017-02-23 The book examines the economic crisis in the European Union and its consequences for European integration and the member states. Discussing the provisions introduced by the Treaty of Lisbon, from the effects of macroeconomic monitoring to the restraints produced by the Fiscal Compact, it offers an analysis of the European Union's current situation and the effects of the measures adopted to manage the crisis, also making reference to how Europe is perceived by its citizens. Moreover, the chapters offer thoughts on the European integration process, in particular the effects that the policies adopted to tackle the crisis have had on the economic and financial sovereignty of the member states. This detailed examination of the situation of the EU between the Treaty of Lisbon and the Fiscal Compact is

characterized by an original multidisciplinary approach that offers an articulate reflection on the criticalities that affect the actions of both European and national institutions.

Regulation and the Global Financial Crisis Daniel Cash, Robert Goddard, 2020-11-24 The Financial Crisis was a cross-sector crisis that fundamentally affected modern society. Regulation, as a concept, was both blamed for allowing the crisis to happen, but also tasked with developing and implementing solutions in the wake of the crash. In this book, a number of specialists from a range of fields have contributed their insights into the effect of the Financial Crisis upon the regulatory frameworks affecting their fields, how regulators have responded to the Crisis, and then what this may mean for the future of regulation within those industries. These analyses are joined by a picture of past financial crises – which reveals interesting patterns – and then analyses of architectural regulatory models that were fundamentally affected by the Crisis. The book aims to allow sector specialists the freedom to share their insights so that, potentially, a broader picture can be identified. Providing an interesting and thought-provoking account of this societally impactful era, this book will help the reader develop a more informed understanding of the potential future of financial regulation. The book will be of value to researchers, students, advanced level students, regulators, and policymakers.

The Bank That Lived a Little Philip Augar, 2018-07-05 Based on unparalleled access to those involved, and told with compelling pace and drama, *The Bank that Lived a Little* describes three decades of boardroom intrigue at one of Britain's biggest financial institutions. In a tale of feuds, grandiose dreams and a struggle for supremacy between rival strategies and their adherents, Philip Augar gives a riveting account

of Barclays' journey from an old Quaker bank to a full-throttle capitalist machine. The disagreement between those ambitious for Barclays to join the top table of global banks, and those preferring a smaller domestic role more in keeping with the bank's traditions, cost three chief executives their jobs and continues to divide opinion within Barclays, the City and beyond. This is an extraordinary corporate thriller, which among much else describes how Barclays came to buy Lehman Brothers for a bargain price in 2008, why it was so keen to avoid taking government funding during the financial crisis, and the price shareholders have paid for a decade of barely controlled ambition. But Augar also shows how Barclays' experiences are a paradigm for Britain's social and economic life over thirty years, which saw the City move from the edge of the economy to its very centre. These decades created unprecedented prosperity for a tiny number, and made the reputations of governments and individuals but then left many of them in tatters. The leveraged society, the winner-takes-all mentality and our present era of austerity can all be traced to the influence of banks such as Barclays. Augar's book tells this rollercoaster story from the perspective of many of its participants - and also of those affected by the grip they came to have on Britain.

The Mitigation of Marine Plastic Pollution in International Law Judith Schäli, 2022-04-19 The open access publication of this book has been published with the support of the Swiss National Science Foundation. The massive accumulation of plastics in marine environments is one of the most pressing environmental concerns of our time. This book examines the relevant international legal framework applying to land-based sources of plastic pollution. Against the backdrop of the dynamics of recent policy formulation in this field, it outlines the main developments and provides a snapshot inventory of state obligations related to plastic pollution mitigation. The Mitigation of Marine Plastic Pollution in International Law identifies the main barriers and opportunities, and points out the possible building blocks of an

enhanced regime.

Global Status Report on Road Safety 2015 World Health Organization, 2015-12-17 The Global status report on road safety 2015, reflecting information from 180 countries, indicates that worldwide the total number of road traffic deaths has plateaued at 1.25 million per year, with the highest road traffic fatality rates in low-income countries. In the last three years, 17 countries have aligned at least one of their laws with best practice on seat-belts, drink-driving, speed, motorcycle helmets or child restraints. While there has been progress towards improving road safety legislation and in making vehicles safer, the report shows that the pace of change is too slow. Urgent action is needed to achieve the ambitious target for road safety reflected in the newly adopted 2030 Agenda for Sustainable Development: halving the global number of deaths and injuries from road traffic crashes by 2020. Made possible through funding from Bloomberg Philanthropies, this report is the third in the series, and provides a snapshot of the road safety situation globally, highlighting the gaps and the measures needed to best drive progress.--Publisher's description.

Architectural Robotics Keith Evan Green, 2016-02-10 How a built environment that is robotic and interactive becomes an apt home to our restless, dynamic, and increasingly digital society. The relationship of humans to computers can no longer be represented as one person in a chair and one computer on a desk. Today computing finds its way into our pockets, our cars, our appliances; it is ubiquitous—an inescapable part of our everyday lives. Computing is even expanding beyond our devices; sensors, microcontrollers, and actuators are increasingly embedded into the built environment. In *Architectural Robotics*, Keith Evan Green looks toward the next frontier in computing: interactive, partly intelligent, meticulously designed

physical environments. Green examines how these “architectural robotic” systems will support and augment us at work, school, and home, as we roam, interconnect, and age. Green tells the stories of three projects from his research lab that exemplify the reconfigurable, distributed, and transfigurable environments of architectural robotics. The Animated Work Environment is a robotic work environment of shape-shifting physical space that responds dynamically to the working life of the people within it; home+ is a suite of networked, distributed “robotic furnishings” integrated into existing domestic and healthcare environments; and LIT ROOM offers a simulated environment in which the physical space of a room merges with the imaginary space of a book, becoming “a portal to elsewhere.” How far beyond workstations, furniture, and rooms can the environments of architectural robotics stretch? Green imagines scaled-up neighborhoods, villages, and metropolises composed of physical bits, digital bytes, living things, and their hybrids. Not global but local, architectural robotics grounds computing in a capacious cyber-physical home.

Israel Confronts Iran P. R. Kumaraswamy, 2012 This study examines Israel's changing perception of Iran and the underlying reasons for the current Israeli tension, anxiety, verbal acrimony and fears. In deconstructing Israel's fears vis-à-vis Iran, the study looks at Israel's failures to revisit its erstwhile peripheral diplomacy and to make adequate changes. Israel was unable to overcome the nostalgia of the past bonhomie and evolve a cohesive policy on Iran. Moreover, it was afraid of the cost of such a radical shift in its fundamental plank vis-à-vis Iran: the peripheral diplomacy. With the result, Iran soon became a nightmare for Israeli foreign policy and the security establishment. The nuclear controversy is just a recent

addition. Given the growing importance of Israel and Iran to India, what are New Delhi's options vis-à-vis the Israel-Iran tensions?

Chasing Alpha Philip Augar, 2009 * Chasing Alpha is the definitive insider's history of Britain's financial services sector, from the early days of New Labour to the present day. At the heart of the action is the revival of the City's institutions in the mid-nineties. Augar uses his peerless connections with the people and firms that made it happen to give a compelling narrative of how the City's golden generation turned London round. Then, as so often happens in finance, the City got carried away with its own success, boasting of a new risk-free economic paradigm that would make the world a richer place. Northern Rock gave the lie to this claim. Far from heralding the eclipse of finance capital, Augar will show how the City stands poised to emerge from the credit crunch stronger than ever. As New Labour heads towards electoral meltdown, the industry it did so much to nurture will embrace the opportunities afforded by David Cameron's even more business-friendly Conservatives. The guiding principle of th
