The Transnational Middle East Leïla Vignal, 2016-10-04 The Middle East has been undergoing new crises since the powerful socio-political uprisings known as the Arab Spring took place in several countries in 2011. Some countries are experiencing a long-term collapse of their political and social structures out of internal conflicts and external interventions. The Transnational Middle East posits that, in the Middle East, the development of regional dynamics, of processes and circulations of all kinds, can be documented. In this regard, the approaches it develops – ‘bottom-up’ regionalisation, ‘globalisation from below’ – allow for a better understanding of the ways in which the Middle East is part of global transformations. The book analyses how, through their practices, Middle East societies elaborate a regional space which is not institutionalised. Based on fieldwork in the Middle East, the book provides venues for further theoretical elaboration on globalisation and contemporary societies, as well as on processes of regionalisation. It draws on the emergence of genuine regional spaces of culture, art, economic activity, human circulation – which supplement and do not contradict other infra-national, national, or global social processes. As in other areas of the world, these transformations are to a large extent the mode of the Middle East’s insertion into globalisation. In this respect, they go against standard narratives of the supposed ‘exceptionalism’ of the region. This book will be a great contribution to comparative politics, Middle Eastern studies, globalisation and international relations.

Moldova Marcin Kosienkowski, William Schreiber, 2012 Moldova: Arena of International Influences brings international perspective to Moldova's

foreign relations since its independence from the Soviet Union in 1991. Eighteen chapters analyze the policy toward Moldova of selected international actors: Belarus, Bulgaria, China, the Czech Republic and Slovakia, the European Union, Germany, Hungary, Italy, Lithuania, Poland, Romania, Russia, Turkey, Ukraine, the United Kingdom, the United States, and the unrecognized breakaway state of Transnistria. For these international actors, Moldova functions as an arena of influences--a sphere of intersecting interests, activities and, occasionally, competition. For the first time, leading experts and practitioners from many of the countries engaged in Moldova are brought together in a common language. The result is a detailed map of the international political landscape in Moldova, a chronicle of the past two decades, and a forecast of the country's future.

**Flying the B-26 Marauder Over Europe** Carl H. Moore,2013-05-21 "This is the story of my experiences with the medium bomber designated by the Army as a B-26 and named by the British the Marauder. The book includes a history of the development of the plane. My war experience began with ferrying our Marauder to England, which included a Sahara Desert stretch from Dakar to Marrakesh. Less than a third of the way there we lost the right engine but flew on safely on one engine, making an emergency landing at the oasis village of Tindouf, an old French Foreign Legion base. The Marauders were involved in the tragic, low-level mission over the E-boat pens in Holland where 60 percent of the officers and airmen and all ten aircraft were lost. This mission resulted in a reconsideration of low level operations in Europe (decision: move to medium altitude). My journal entries were created after each mission and offer details (target, date, crew members, their emotions, action narrative) of 50 combat missions (Appendix A). Considerable background on the design and construction of the Marauder is included, as well as a description of the B-26 reconstructed by the Confederate (now: Commemorative)

Air Force. The book ends with a description of each of the crew members and their activity since the war if available."

This is a major work, which will prove immensely valuable to institutions and authorities related to the chemical industry. - Chemistry & Industry ...no science or engineering library should be without it. - Angewandte Chemie Ullmann's might well be preferred...because of its many convenience features and excellent organisation. - Chemical Engineering

**Exploring Zynq Mpsoc** CROCKETT H. DAVID LOUISE (NORTHCOTE. CRAIG,

RAMSAY.), Northcote David, Ramsay Craig, 2019-04-11 This book introduces the Zynq MPSoC (Multi-Processor System-on-Chip), an embedded device from Xilinx. The Zynq MPSoC combines a sophisticated processing system that includes ARM Cortex-A53 applications and ARM Cortex-R5 real-time processors, with FPGA programmable logic. As well as guiding the reader through the architecture of the device, design tools and methods are also covered in detail: both the conventional hardware/software co-design approach, and the newer software-defined methodology using Xilinx's SDx development environment. Featured aspects of Zynq MPSoC design include hardware and software development, multiprocessing, safety, security and platform management, and system booting. There are also special features on PYNQ, the Python-based framework for Zynq devices, and machine learning applications. This book should serve as a useful guide for those working with Zynq MPSoC, and equally as a reference for technical managers wishing to gain familiarity with the device and its associated design methodologies.

**Refuge beyond Reach** David Scott FitzGerald, 2019-03-14 Media pundits, politicians, and the public are often skeptical or ambivalent about granting asylum. They fear that asylum-seekers will impose economic and cultural costs and pose security threats to nationals. Consequently, governments of rich, democratic countries attempt to limit who can approach their borders, which often leads to refugees breaking immigration laws. In *Refuge beyond Reach*, David Scott FitzGerald traces how rich democracies have deliberately and systematically shut down most legal paths to safety. Drawing on official government documents, information obtained via WikiLeaks, and interviews with asylum seekers, he finds that for ninety-nine percent of refugees, the only way to find safety in one of the prosperous democracies of the Global North

is to reach its territory and then ask for asylum. FitzGerald shows how the US, Canada, Europe, and Australia comply with the letter of law while violating the spirit of those laws through a range of deterrence methods—first designed to keep out Jews fleeing the Nazis—that have now evolved into a pervasive global system of remote control. While some of the most draconian remote control practices continue in secret, Fitzgerald identifies some pressure points and finds that a diffuse humanitarian obligation to help those in need is more difficult for governments to evade than the law alone. *Refuge beyond Reach* addresses one of the world's most pressing challenges—how to manage flows of refugees and other types of migrants—and helps to identify the conditions under which individuals can access the protection of their universal rights.

**County Courthouse Book** Elizabeth Petty Bentley, 2009 The County Courthouse Book is a concise guide to county courthouses and courthouse records. It is an important book because the genealogical researcher needs a reliable guide to American county courthouses, the main repositories of county records. To proceed in his investigations, the researcher needs current addresses and phone numbers, information about the coverage and availability of key courthouse records such as probate, land, naturalization, and vital records, and timely advice on the whole range of services available at the courthouse. Where available he will also need listings of current websites and e-mail addresses. -- Publisher website.
