Privacy Lost David H. Holtzman, 2006-10-11 While other books in the field focus on specific aspects of privacy or how to avoid invasions, David H. Holtzman—a master technologist, internet pioneer, security analyst, and former military codebreaker—presents a comprehensive insider's exposé of the world of invasive technology, who's using it, and how our privacy is at risk. Holtzman starts out by categorizing privacy violations into The 7 Sins Against Privacy and then goes on to explain in compelling and easy to understand language exactly how privacy is being eroded in every aspect of our lives. Holtzman vividly reveals actual invasions and the dangers associated with the loss of privacy, and he takes a realistic look at the trade offs between privacy and such vital issues as security, rights, and economic development. Praise for Privacy Lost Whether we know it or not, we have all become citizens of the Digital Age. As such we need to take responsibility for our conduct, our safety, and our privacy. David Holtzman is deeply knowledgeable about the industry and passionate about the issues. Regardless of your political views, you will come away from this book better equipped to meet the challenges before us all. —Geoffrey A. Moore, author, *Dealing with Darwin: How Great Companies Innovate at Every Phase of Their Evolution* Holtzman has drafted a blueprint all citizens of this great land ought to read if they desire to understand what privacy truly means, why it is important to both their everyday life as well as to their understanding of what it really means to be free, and what they can do to salvage what little privacy is left them. *Privacy Lost* needs to be readily available on the desks of all concerned citizens—heavily dog-eared and underlined. —Bob Barr, practicing attorney and former Member of the United States House of Representatives

Statecraft in Symbols Paul Cheung, 2022-06-30 This book presents a study of how urban residency in China is regulated by state policy in the second decade of the 21st Century. Far from a straightforward divide between natives and newcomers, policy in this period has created delicate cross-classifications of internal migrants and attendant conditions under which they reside in particular urban areas. With reference to some of the most profound social theorists of the present day, such symbolic acts of division are explained as acts of statecraft carried out by different levels of public administration in the face of multiple quandaries. The book will appeal to those with an interest in the governance of population and territory in China, and by extension, in other parts of the contemporary world.

The Synchronization of National Policies Pertti Alasuutari, 2015-09-25 The Synchronization of National Policies shows how it is possible that there is remarkable uniformity in the policies that the nation-states adopt, although there is no world government. Mainstream research attributes such global governance to the influence of leading countries, to functional requirements created by capitalism and technological development, or to international organizations. This book argues that to understand how national policies are synchronized we need to realize that the global population forms a single global tribe of moderns, divided into some 200 clans called nations. While previous research on the world culture of moderns has focused on the diffusion of ideas, this book concentrates on the active role of local actors, who introduce global models and domesticate them to nation-states. In national policymaking, actors justify new policies by international comparisons, by the successes and failures of models adopted in other countries, and by building and appealing to the authority of international organizations. Consequently, national policies are synchronized with each other. Yet, because of the way such domestication of global trends takes place, citizens retain and reproduce the understanding that they follow a sovereign national trajectory. This book will be of interest to students and scholars of sociology, world culture theory, globalization, international relations, and political science.
