U.S. Marines in Afghanistan, 2001-2009 U S Marine Corps History Division, 2017-02-05 This volume presents a collection of 38 articles, interviews, and speeches describing many aspects of the U.S. Marine Corps' participation in Operation Enduring Freedom from 2001 to 2009. This work is intended to serve as a general overview and provisional reference to inform both Marines and the general public until the History Division completes monographs dealing with major Marine Corps operations during the campaign. The accompanying annotated bibliography provides a detailed look at selected sources that currently exist until new scholarship and archival materials become available. From the Preface - From the outset, some experts doubted that the U.S. Marines Corps would play a major role in Afghanistan given the landlocked nature of the battlefield. Naval expeditionary Task Force 58 (TF-58) commanded by then-Brigadier General James N. Mattis silenced naysayers with the farthest ranging amphibious assault in Marine Corps/Navy history. In late November 2001, Mattis' force seized what became Forward Operating Base Rhino, Afghanistan, from naval shipping some 400 miles away. The historic assault not only blazed a path for follow-on forces, it also cut off fleeing al-Qaeda and Taliban elements and aided in the seizure of Kandahar. While Corps doctrine and culture advocates Marine employment as a fully integrated Marine air-ground task force (MAGTF), deployments to Afghanistan often reflected what former Commandant General Charles C. Krulak coined as the three-block war. Following TF-58's deployment during the initial take down of the Taliban regime, the MAGTF made few appearances in Afghanistan until 2008. Before then, subsequent Marine units often deployed as a single battalion under the command of the U.S. Army Combined Joint Task Force (CJTF) to provide security for provincial reconstruction teams. The Marine Corps also provided embedded training teams to train and mentor the fledgling Afghan National Army and Police. Aviation assets

sporadically deployed to support the U.S.-led coalition mostly to conduct a specific mission or to bridge a gap in capability, such as close air support or electronic warfare to counter the improvised explosive device threat. From 2003 to late 2007, the national preoccupation with stabilizing Iraq focused most Marine Corps assets on stemming the insurgency, largely centered in the restive al-Anbar Province. As a result of the North Atlantic Treaty Organization (NATO) taking over command of Afghan operations and Marine Corps' commitments in Iraq, relatively few Marine units operated in Afghanistan from late 2006 to 2007. Although Marines first advocated shifting resources from al-Anbar to southern Afghanistan in early 2007, the George W. Bush administration delayed the Marine proposal for fear of losing the gains made as a result of Army General David H. Petraeus' surge strategy in Iraq. By late 2007, the situation in Afghanistan had deteriorated to the point that it inspired Rolling Stone to later publish the story *How We Lost the War We Won*. In recognition of the shifting tides in both Iraq and Afghanistan, the Bush administration began to transfer additional resources to Afghanistan in early 2008. The shift prompted senior Marines to again push for a more prominent role in the Afghan campaign, even proposing to take over the Afghan mission from the Army. . . .

Global Corruption Report 2001 Robin Hodess, Jessie Banfield, Toby Wolfe, 2001 The Global Corruption Report 2001 is the new annual publication of Transparency International, the leading global anti-corruption NGO. By providing an overview of the state of corruption around the globe, the Global Corruption Report fills a significant gap in the existing literature. It assembles news and analysis on corruption and the fight against it around the world, highlighting international and regional trends, and significant instances of reform. It also reveals the links between global, regional and national developments in the corruption field, and does so from the independent perspective of an NGO. The book includes reports by leading experts on topical issues such as

political party funding, money laundering, and corruption in international sport, exploring in particular the global nature of these themes. It also contains 12 regionally-focused reports, written by journalists from around the world. The report's final data and research section delivers a unique survey of the contemporary corruption and anti-corruption research terrain, with contributions from a range of IGOs, NGOs, the private sector, and academics. It also contains TI's own well-known Corruption Perceptions Index (CPI). The Global Corruption Report is a must have publication for policy-makers, business people, lawyers, journalists, academics, and anti-corruption activists the world over.

U.S. Marines In Afghanistan, 2001-2002: From The Sea

Colonel Nathan S. Lowrey, 2015-11-06 Includes more than 100 maps, plans and illustrations. "This monograph is more than the story of Marine expeditionary operations in Afghanistan. It describes who our nation's enemies are; how America became involved in the Global War on Terrorism; and how the Marine Corps struggled to acquire a major role in Operation Enduring Freedom, as well as the actions of Marines and sailors who helped prosecute the air and ground campaigns against Taliban and al-Qaeda forces."— Dr. Charles P. Neimeyer, Director of Marine Corps History

The Social Impact of AIDS in the United States National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Panel on Monitoring the Social Impact of the AIDS

Epidemic,1993-02-01 Europe's Black Death contributed to the rise of nation states, mercantile economies, and even the Reformation. Will the AIDS epidemic have similar dramatic effects on the social and political landscape of the twenty-first century? This readable volume looks at the impact of AIDS since its emergence and suggests its effects in the next decade, when a million or more Americans will likely die of the disease. The Social Impact of AIDS in the United States addresses some of the most sensitive and controversial issues in the public debate over AIDS. This landmark book explores how AIDS has affected fundamental policies and practices in our major institutions, examining: How America's major religious organizations have dealt with sometimes conflicting values: the imperative of care for the sick versus traditional views of homosexuality and drug use. Hotly debated public health measures, such as HIV antibody testing and screening, tracing of sexual contacts, and quarantine. The potential risk of HIV infection to and from health care workers. How AIDS activists have brought about major change in the way new drugs are brought to the marketplace. The impact of AIDS on community-based organizations, from volunteers caring for individuals to the highly political ACT-UP organization. Coping with HIV infection in prisons. Two case studies shed light on HIV and the family relationship. One reports on some efforts to gain legal recognition for nonmarital relationships, and the other examines foster care programs for newborns with the HIV virus. A case study of New York City details how selected institutions interact to give what may be a picture of AIDS in the future. This clear and comprehensive presentation will be of interest to anyone concerned about AIDS and its impact on the country: health professionals, sociologists, psychologists, advocates for at-risk populations, and interested individuals.

A Capital City at the Margins Michael D. Panté,2019

Forbidden City, USA Arthur Dong,2015-09-15 Forbidden City,

USA: Chinatown Nightclubs, 1936-1970 captures the magic and glamour of the Chinese American nightclub scene, which peaked in San Francisco during World War II. Previously unpublished personal stories, along with over four hundred stunning images and rare artifacts, are presented in this sexy and insightful chronicle of Asian American performers who defied racial and cultural barriers to pursue their showbiz dreams. It was the mid-1930s: Prohibition was repealed and the Great Depression was waning. With a global conflict on the rise, people were out to drink, dine, dance, and see a show to forget their woes--and what a surprise for the world to behold an emerging generation of Chinese American entertainers commanding the stage in their own nightclubs. *Forbidden City, USA: Chinatown Nightclubs, 1936-1970* reveals the sassy, daring, and sometimes heartbreaking memories of the dancers, singers, and producers who lived this story, and it weaves in a fascinating collection of photos, postcards, menus, programs, and yes, even souvenir chopsticks. Together they recreate a forgotten era, treating readers to a dazzling night on the town. *Forbidden City, USA: Chinatown Nightclubs, 1936-1970* is the culmination of filmmaker and writer Arthur Dong's nearly thirty-year devotion to the topic, originally inspired by the author's research for his documentary of the same name. *Forbidden City, USA: Chinatown Nightclubs, 1936-1970* was previously published in paperback under the title: *Forbidden City, USA: Chinese American Nightclubs, 1936-1970*.

Widescreen Worldwide John Belton, Sheldon Hall, Stephen Neale, 2010 Examining widescreen cinema as a worldwide aesthetic and industrial phenomenon, the essays in this volume situate the individual expressions of this new technology within the larger cultural and industrial practices that inform them. What Hollywood sought to market globally as CinemaScope, SuperScope, Techniscope, Technirama, and Panavision took indigenous form in a host of compatible anamorphic formats developed around the world. The book documents how the

aesthetics of the first wave of American widescreen films underwent revision in Europe and Asia as filmmakers brought their own idiolect to the language of widescreen mise-en-scène, editing, and sound practices. The work of Otto Preminger, Anthony Mann, Samuel Fuller, Sam Peckinpah, Seijun Suzuki, Kihachi Okamoto, and Tai Kato, among others, is addressed.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide

Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more.

Marine Corps History Division, 2011 Represents one of the earliest
efforts to chronicle Marine Corps operations in Iraq between
2004-2005. Commissioned and written while U.S. forces were still
engaged in combat operations in Iraq. Contains maps to help
orientate and familiarize readers to Iraq, al-Anbar Province, and
the two battles for Fallujah. Contains photographs of commanders,
combat operations, equipment, and civil-military operations.

Cyber War Richard A. Clarke, Robert K. Knake, 2010-04-02 An
essential, eye-opening book about cyberterrorism, cyber war, and
the next great threat to our national security. "Cyber War may be
the most important book about national security policy in the last
several years." -Slate Former presidential advisor and counter-
terrorism expert Richard A. Clarke sounds a timely and chilling
warning about America's vulnerability in a terrifying new
international conflict. Cyber War is a powerful book about
technology, government, and military strategy; about criminals,
spies, soldiers, and hackers. It explains clearly and convincingly
what cyber war is, and how vulnerable we are as a nation and as
individuals to the vast and looming web of cyber criminals. Every
concerned American should read this startling and explosive book
that offers an insider's view of White House 'Situation Room'
operations and carries the reader to the frontlines of our cyber
defense. Cyber War exposes a virulent threat to our nation's
security.

Spider from Mars Woody Woodmansey, 2017-01-03 In January
2016, the unexpected death of David Bowie rocked the globe. For
millions of people, he was an icon celebrated for his music, his film
and theatrical roles, and his trendsetting influence on fashion and
gender norms. But no one from her inner circle has told the story

of how David Jones—a young folksinger, dancer, and aspiring mime—became one of the most influential artists of our time. Drummer Woody Woodmansey is the last surviving member of Bowie's band The Spiders from Mars which helped launch his Ziggy Stardust persona and made David Bowie a sensation. In this first memoir to follow Bowie's passing, Spider from Mars reveals what it was like to be at the white-hot center of a star's self-creation. With never-before-told stories and never-before-seen photographs, Woodmansey offers details of the album sessions for The Man Who Sold the World, Hunky Dory, The Rise and Fall of Ziggy Stardust and the Spiders from Mars, and Aladdin Sane: the four albums that made Bowie a cult figure. And, as fame beckoned by eventually consumed Bowie, Woodmansey recalls the wild tours, eccentric characters, and rock 'n' roll excess that eventually drove the band apart. A vivid and unique evocation of a transformative musical era and the enigmatic, visionary musician at the center of it, with a foreword by legendary music producer Tony Visconti and an afterword from Def Leppard's Joe Elliot, Spider from Mars is for everyone who values David Bowie, by one of the people who knew him best. ... those interested in rock history won't want to miss this slice of music history. - Publishers Weekly

Monetizing Entertainment Larry Wacholtz, 2016-11-03

An accompanying website (www.routledge.com/cw/wacholtz), hosting case studies, videos, data, infographics, and blog posts on business models, is the perfect companion to this authoritative resource.

Western Sahara Stephen Zunes, Jacob Mundy, 2010-08-04
The Western Sahara conflict has proven to be one of the most protracted and intractable struggles facing the international community. Pitting local nationalist determination against Moroccan territorial ambitions, the dispute is further complicated by regional tensions with Algeria and the geo-strategic concerns of major global players, including the United States, France, and the territory's former colonial ruler, Spain. Since the early 1990s, the UN Security Council has failed to find a formula that will delicately balance these interests against Western Sahara's long-denied right to a self-determination referendum as one of the last UN-recognized colonies. The widely-lauded first edition was the first book-length treatment of the issue in the previous two decades. Zunes and Mundy examined the origins, evolution, and resilience of the Western Sahara conflict, deploying a diverse array of sources and firsthand knowledge of the region gained from multiple research visits. Shifting geographical frames—local, regional, and international—provided for a robust analysis of the stakes involved. With the renewal of the armed conflict, continued diplomatic stalemate, growing waves of nonviolent resistance in the occupied territory, and the recent U.S. recognition of Morocco's annexation, this new revised and expanded paperback

edition brings us up-to-date on a long-forgotten conflict that is finally capturing the world's attention.

Introduction to Natural Language Processing Jacob Eisenstein, 2019-10-01 A survey of computational methods for understanding, generating, and manipulating human language, which offers a synthesis of classical representations and algorithms with contemporary machine learning techniques. This textbook provides a technical perspective on natural language processing—methods for building computer software that understands, generates, and manipulates human language. It emphasizes contemporary data-driven approaches, focusing on techniques from supervised and unsupervised machine learning. The first section establishes a foundation in machine learning by building a set of tools that will be used throughout the book and applying them to word-based textual analysis. The second section introduces structured representations of language, including sequences, trees, and graphs. The third section explores different approaches to the representation and analysis of linguistic meaning, ranging from formal logic to neural word embeddings. The final section offers chapter-length treatments of three transformative applications of natural language processing: information extraction, machine translation, and text generation. End-of-chapter exercises include both paper-and-pencil analysis and software implementation. The text synthesizes and distills a broad and diverse research literature, linking contemporary machine learning techniques with the field's linguistic and computational foundations. It is suitable for use in advanced undergraduate and graduate-level courses and as a reference for software engineers and data scientists. Readers should have a background in computer programming and college-level mathematics. After mastering the material presented, students will have the technical skill to build and analyze novel natural

language processing systems and to understand the latest research in the field.
