**Fair Food** Oran B. Hesterman, 2012-06-05 Our food system is broken, and it's endangering what's most precious to us: our environment, our health, our soil and water, and our future. In recent years, a host of books and films have compellingly documented the dangers. But advice on what to do about them largely begins and ends with the admonition to "eat local" or "eat organic." Longtime good food pioneer Oran Hesterman knows that we can't fix the broken system simply by changing what's on our own plates: the answer lies beyond the kitchen. In *Fair Food* he shares an inspiring and practical vision for changing not only what we eat, but how food is grown, packaged, delivered, marketed, and sold. He introduces people and organizations across the country who are already doing this work in a number of creative ways, and provides a wealth of practical information for readers who want to get more involved.

**A Dictionary of Creek/Muskogee** Jack B. Martin, Margaret McKane Mauldin, 2004-12-01 The result of more than ten years of research, *A Dictionary of Creek/Muskogee* draws on the expertise of a linguist and a native Creek speaker to yield the first modern dictionary of the Creek language of the southeastern United States. The dictionary contains over seven thousand Creek-English entries, over four thousand English-Creek entries, and over four hundred Creek place names in Alabama, Georgia, Florida, and Oklahoma. The volume also includes illustrations, a map, antonyms, dialects, stylistic information, word histories, and other useful reference material. Entries are given in both the traditional Creek spelling and a modern phonemic transcription. *A Dictionary of Creek/Muskogee* is the standard reference work for the Creek language.

**WIR 2001**, 2001 Successful economic development depends on a country's ability to attract foreign investment and mobilize its own resources. Success stories in an unforgiving global market are few, but this report examines a generation of investment promotion strategies, and shows how international production networks could point the way forward.

**Globalization of R&D and Developing Countries** United Nations Conference on Trade and Development, 2005 The studies presented in this volume elaborate key issues related to the globalization of research and development and its implications for developing countries. Firms establish such operations in developing locations with the aim of accessing the skills of the host economies, adapting products to local markets and reducing their costs, in response to competitive pressures, technological changes and a more liberal trade and investment environment. The studies in this volume explore the implications of the recent rise of a number of developing economies as locations of important foreign direct investment projects in research and development. The issues addressed include the use of foreign direct investment versus contractual channels in acquiring innovative capacities in developing countries, the potential links of transnational corporations' research and development activities with the local innovation system of host countries, the likelihood of research and development spreading to new developing locations, and the kinds of host country policies that can facilitate diffusion of technologies from foreign affiliates activities to the local economy. This publication is a collection of the written submissions presented by scholars and experts at an UNCTAD Expert Meeting on FDI in Research and Development held in January 2005. The overview chapter is based on a note prepared by the UNCTAD secretariat for that meeting. The Chairperson's summary of the discussion at the Expert Meeting is also included, reflecting the diversified views

expressed by scholars and experts from Governments. Despite divergences in views, there was general agreement among scholars and experts that active policies by governments could play a leading role in creating and facilitating the right conditions to attract and benefit from foreign direct investment in research and development.
