Assessing the Costs of Climate Change and Adaptation in South Asia Asian Development Bank,2014-06-01 This report synthesizes the results of country and sector studies on the economic

costs and benefits of unilateral and regional actions on climate change in the Asian Development Bank's six South Asia developing members, namely Bangladesh, Bhutan, India, the Maldives, Nepal, and Sri Lanka. The study takes into account the different scenarios and impacts projected across vulnerable sectors and estimates the total economic loss throughout the 21st century and amount of funding required for adaptation measures to avert such potential losses. It is envisioned to strengthen decision-making capacities and improve understanding of the economics of climate change for the countries in South Asia.

Toxic Chemical and Biological Agents Giovanni Sindona, Joseph H. Banoub, Maria Luisa Di Gioia, 2020-10-19 This book critically assesses the current state of knowledge on new and important detection technologies, e.g. mass spectrometry, tandem mass spectrometry, biosensor detection and tissue imaging, in connection with toxic chemical and biological agents. In general, the main topics discussed concern the risks and consequences of chemical and biological agents for human health in

general, with special emphasis on all biochemical and metabolic pathways including the reproductive system. The exposome, genetic risks and the environment, various health hazard agents, risk assessment, environmental assessment and preparedness, and analysis of sub-lethal effects at the molecular level are also discussed. In closing, the book provides comprehensive information on the diagnosis of exposure, and on health concerns related to toxic chemical and biological agents.

Infected Kin Ellen Block, Will McGrath, 2019-05-17 AIDS has devastated communities across southern Africa. In Lesotho, where a quarter of adults are infected, the wide-ranging implications of the disease have been felt in every family, disrupting key aspects of social life. In *Infected Kin*, Ellen Block and Will McGrath argue that AIDS is fundamentally a kinship disease, examining the ways it transcends infected individuals and seeps into kin relations and networks of care. While much AIDS scholarship has turned away from the difficult daily realities of those affected by the disease, *Infected Kin* uses both ethnographic scholarship and creative nonfiction to bring to life the joys and struggles of the Basotho people at the heart of the AIDS pandemic. The result is a book accessible to wide

readership, yet built upon scholarship and theoretical contributions that ensure Infected Kin will remain relevant to anyone interested in anthropology, kinship, global health, and care. Supplementary instructor resources

In Defence of Animals Peter Singer, 1985-01-01 In Singer's book, the idea of the animal rights movement is set in the context of scientific knowledge, philosophy, and ethics. This highly readable account gives an invaluable introduction to modern thought on animal rights. (Animals/Pets)

The Autism Revolution Dr. Martha Herbert, Karen Weintraub, 2013-03-12 “An in-depth, scientific—yet hopeful and positive—look at how the brain and body work together . . . [Dr. Martha

Herbert] has developed a new way of seeing autism.”—Library Journal After years of treating patients and analyzing scientific data, Harvard Medical School researcher and clinician Dr. Martha Herbert offers a revolutionary new view of autism and a transformative strategy for dealing with it. Autism, she concludes, is not a hardwired impairment programmed into a child’s genes and destined to remain fixed forever. Instead, it is the result of a cascade of events, many seemingly minor. And while other doctors may dismiss your child’s physical symptoms—the anxiety, sensory overload, sleeplessness, frequent illnesses or seizures—as coincidental or irrelevant, Dr. Herbert sees them as vital clues to what the underlying problems are, and how to help. Drawing from the newest research, technologies, and insights, as well as inspiring case studies of both children and adults, Dr. Herbert guides you toward restoring health and resiliency in your loved one with autism. Her specific recommendations aim to provide optimal nutrition, reduce toxic exposures, limit stress, and open the door to learning and creativity. As thousands of families who have cobbled together these solutions themselves already know, this program can have dramatic benefits—for your child with autism, and for you, your whole

family, and perhaps your next baby as well. “Invaluable . . . a must-read . . . Dr. Martha Herbert gets it. She not only gets it, but she puts it out there in an awesome book so the rest of us can get it, too.”—Autism Watch “[Herbert] goes further than most autism specialists. Her impressive science background merges with common sense and even intuitive sense [making] complex scientific and medical materials seamlessly blend with a holistic viewpoint.”—Relieve Autism “Hope and practical guidance . . . With this easy-to-read book, parents can gain wisdom on how to guide your child to achieve a healthy and thriving life.”—Mom Central

Nanostructured Materials for Next-Generation Energy Storage and Conversion Fan Li, Sajid Bashir, Jingbo Louise Liu, 2019-02-01 The energy crisis and pollution have posed significant risks to the environment, transportation, and economy over the last century. Thus, green energy becomes one of the critical global technologies and the use of nanomaterials in these technologies is an important and active research area. This book series presents the progress and opportunities in green energy sustainability. Developments in nanoscaled electrocatalysts, solid oxide and proton exchange

membrane fuel cells, lithium ion batteries, and photovoltaic techniques comprise the area of energy storage and conversion. Developments in carbon dioxide (CO₂) capture and hydrogen (H₂) storage using tunable structured materials are discussed. Design and characterization of new nanoscaled materials with controllable particle size, structure, shape, porosity and band gap to enhance next generation energy systems are also included. The technical topics covered in this series are metal organic frameworks, nanoparticles, nanocomposites, proton exchange membrane fuel cell catalysts, solid oxide fuel cell electrode design, trapping of carbon dioxide, and hydrogen gas storage.

Inclusion Matters World Bank, 2013-11-26 Social inclusion is on the agenda of governments, policymakers, and nonstate actors around the world. Underpinning this concern is the realization that despite progress on poverty reduction, some people continue to feel left out. This report aims to

unpack the concept of social inclusion and understand better how policies can be designed to further inclusion. First, the report offers a definition of social inclusion as the process of improving the terms for individuals and groups to take part in society. It unpacks different domains of society that excluded groups and individuals are at particular risk of being left out of -- markets, services, and spaces. Second, the report discusses the most important global mega-trends such as migration, climate change, and aging of societies, which will impact challenges and opportunities for inclusion. Finally, it argues that despite these challenges, change towards inclusion is possible and offers examples of inclusionary policies.
