Communist Multiculturalism Susan McCarthy,2011-12-01 The communist Chinese state promotes the distinctiveness of the many minorities within its borders. At the same time, it is vigilant in suppressing groups that threaten the nation's unity or its modernizing goals. In *Communist Multiculturalism*, Susan K. McCarthy examines three minority groups in the province of Yunnan, focusing on the ways in which they have adapted to the government's nationbuilding and minority nationalities policies since the 1980s. She reveals that Chinese government policy is shaped by perceptions of what constitutes an authentic cultural group and of the threat ethnic minorities may constitute to national interests. These minority groups fit no clear categories but rather are practicing both their Chinese citizenship and the revival of their distinct cultural identities. For these groups, being minority is, or can be, one way of being national. Minorities in the Chinese state face a paradox: modern, cosmopolitan, sophisticated people -- good Chinese citizens, in other words -- do not engage in unmodern behaviors. Minorities, however, are expected to engage in them.

Managing Cover Crops Profitably (3rd Ed.) You'll reap dividends on your cover crop investments for years, since their benefits accumulate over the long term. This book will help you find which ones are right for you. Captures farmer and other research results from the past ten years. The authors verified the info. from the 2nd ed., added new results and updated farmer profiles and research data, and added 2 chap. Includes maps and charts, detailed narratives about individual cover crop species, and chap. about aspects of cover cropping.

Violence at Work Duncan Chappell,Vittorio Di Martino,International Labour Office,2006 Violence at work, ranging from bullying and mobbing, to threats by psychologically unstable co-workers, sexual harassment and homicide, is increasing worldwide and has reached epidemic levels in some countries. This updated and revised edition looks at the full range of aggressive acts, offers new information on their occurrence and identifies occupations and situations at particular risk. It is organised in three sections: understanding violence at work; responding to violence at work; future action.

Ways of Being Ethnic in Southwest China Stevan Harrell,2012-11-20 Drawing on extensive fieldwork conducted in the 1980s and 1990s in southern Sichuan, this pathbreaking study examines the nature of ethnic consciousness and ethnic relations among local communities, focusing on the Nuosu (classified as Yi by the Chinese government), Prmi, Naze, and Han. It argues that even within the same regional social system, ethnic identity is formulated, perceived, and promoted differently by different communities at different times. *Ways of Being Ethnic in Southwest China* exemplifies a model in which ethnic consciousness and ethnic relations consist of drawing boundaries between one's own group and others, crossing those boundaries, and promoting internal unity within a group. Leaders and members of ethnic groups use commonalities and differences in history, culture, and kinship to promote internal unity and to strengthen or cross external boundaries. Superimposed on the structure of competing and cooperating local groups is a state system of ethnic classification and administration; members and leaders of local groups incorporate this system into their own ethnic consciousness, co-opting or resisting it situationally. The heart of the book consists of detailed case studies of three Nuosu village communities, along with studies of Prmi and Naze communities, smaller groups such as the Yala and Nasu, and Han Chinese who live in minority areas. These are followed by a synthesis that compares different configurations of ethnic identity in different communities and discusses the implications of these examples for our understanding of ethnicity and for the near future of China. This lively description and analysis of the region's complex ethnic identities and relationships constitutes an original and important contribution to the study of ethnic identity. *Ways of Being Ethnic in Southwest China* will be of interest to social scientists concerned with issues of ethnicity and state-building.

Innovations and Implementations of Computer Aided Drug Discovery Strategies in Rational Drug Design Sanjeev Kumar Singh,2021-02-02 This book presents various computer-aided drug discovery methods for the design and development of ligand and structure-based drug molecules. A wide variety of computational approaches are now being used in various stages of drug discovery and development, as well as in clinical studies. Yet, despite the rapid advances in computer software and hardware, combined with the exponential growth in the available biological information, there are many challenges that still need to be addressed, as this book shows. In turn, it shares valuable insights into receptor-ligand interactions in connection with various biological functions and human diseases. The book discusses a wide range of phylogenetic methods and highlights the applications of Molecular Dynamics Simulation in the drug discovery process. It also explores the application of quantum mechanics in order to provide better accuracy when calculating protein-ligand binding interactions and predicting binding affinities. In closing, the book provides illustrative descriptions of major challenges associated with computer-aided drug discovery for the development of therapeutic drugs. Given its scope, it offers a valuable asset for life sciences researchers, medicinal chemists and bioinformaticians looking for the latest information on computer-aided methodologies for drug development, together with their applications in drug discovery.

Cultural Encounters on China's Ethnic Frontiers Stevan Harrell,1995 A succession of Chinese governments, as well as Western missionaries, have sought to define, objectify, and "civilize" ethnic minorities - to make them more like the civilizers. In this volume, ten scholars examine some of these attempts involving groups as culturally different and geographically distant as the Mongols in the North and the Yi in the Southwest.

The Rise of Metallurgy in Eurasia Miljana Radivojević,Benjamin Roberts,Miroslav Marić,Julka Kuzmanović-Cvetković,Thilo Rehren,2021-12-23 *The Rise of Metallurgy in Eurasia* is a landmark study in the evolution of early metallurgy in the Balkans. It demonstrates that far from being a rare and elite practice, the earliest metallurgy in the world was a common and communal craft activity.

Health Communication: Strategies and Skills for a New Era Claudia Parvanta,Sarah Bass,2018-08-27 *Health Communication: Strategies and Skills for a New Era* provides a practical process model for developing a health communication intervention. The book also explores exposure to media and how it shapes our conceptions of health and illness. Using a life stages and environments approach, the book touches on the patient role and how we 'hear' information from health care providers as well as guidance on how to be a thoughtful consumer of health information.

The Art of Ethnography David Michael Deal,Laura Hostetler,2006 *The Art of Ethnography* is a fully illustrated translation of a Miao album -- a Chinese genre originating in the eighteenth century that used prose, poetry, and detailed illustrations to represent minority ethnic groups living in frontier regions under imperial Chinese control. These bound collections of hand-painted illustrations and handwritten text reveal how imperial China

viewed culturally other frontier populations. They also contain valuable information for anthropologists, geographers, and historians, and are coveted by art collectors for their beautiful imagery. Miao in this context refers not just to groups that called themselves Miao (Hmong) or were classified as such by the majority Han culture, but generally to the many minority peoples in China's southwest. This lovely volume reproduces each of the eighty-two illustrations from the original album and the corresponding Chinese calligraphic text, along with an annotated English translation. Each entry depicts a different ethnic group residing in Guizhou. The album is anonymous and dates from sometime after 1797. Laura Hostetler's Introduction discusses the genesis and evolution of the Miao album genre and the sociopolitical context in which the albums were first made, the ethnographic content of the texts, the composition of the illustrations, and the albums' authorship and production. She situates the albums within the context of early modern imperial expansion internationally by introducing comparative examples of Japanese and Ottoman ethnography. Color illustrations from other Miao albums and comparable works from other cultures give the reader a sense of the chromatic richness of Miao album illustrations and of their place in world ethnography.

The International status of education about the Holocaust Carrier, Peter,Fuchs, Eckhardt,Messinger, Torben,Georg Eckert Institute for International Textbook Research (Germany),2015-01-14 How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy.

Multisensor Data Fusion and Machine Learning for Environmental Remote Sensing Ni-Bin Chang,Kaixu Bai,2018-02-21 In the last few years the scientific community has realized that obtaining a better understanding of interactions between natural systems and the man-made environment across different scales demands more research efforts in remote sensing. An integrated Earth system observatory that merges surface-based, air-borne, space-borne, and even underground sensors with comprehensive and predictive capabilities indicates promise for revolutionizing the study of global water, energy, and carbon cycles as well as land use and land cover changes. The aim of this book is to present a suite of relevant concepts, tools, and methods of integrated multisensor data fusion and machine learning technologies to promote environmental sustainability. The process of machine learning for intelligent feature extraction consists of regular, deep, and fast learning algorithms. The niche for integrating data fusion and machine learning for remote sensing rests upon the creation of a new scientific architecture in remote sensing science that is designed to support numerical as well as symbolic feature extraction managed by several cognitively oriented machine learning tasks at finer scales. By grouping a suite of satellites with similar nature in platform design, data merging may come to help for cloudy pixel reconstruction over the space domain or concatenation of time series images over the time domain, or even both simultaneously. Organized in 5 parts, from Fundamental Principles of Remote Sensing; Feature Extraction for Remote Sensing; Image and Data Fusion for Remote Sensing; Integrated Data Merging, Data Reconstruction, Data Fusion, and Machine Learning; to Remote Sensing for Environmental Decision Analysis, the book will be a useful reference for graduate students, academic scholars, and working professionals who are involved in the study of Earth systems and the environment for a sustainable future. The new knowledge in this book can be applied successfully in many areas of environmental science and engineering.

Quantum Fluids and Solids S. Trickey,2012-12-06 The second International Symposium on Quantum Fluids and Solids came to pass during 23-27 Jan. 1977 as the fourth and concluding part of the seventeenth consecutive running of the Sanibel Symposium Series. With approximately 120 participants from eleven countries (including, for the first time, the USSR), we found it easy to obtain a selection of papers which was fairly comprehensive. Indeed, our problem was an embarrassment of riches; in spite of our solemn vows not to crowd the schedule, we ended up with an intense program! By far, the majority of the papers presented are represented in this volume. We are indebted to many persons and organizations for their contributions to the Symposia. First, we thank Prof. Per-Olov Lowdin, Director of the Quantum Theory Project and originator of the Sanibel Symposia. Without his patient, indulgent cooperation our task would have been vastly more difficult. We are grateful to Prof. F. Eugene Dunnam, Chairman of the Dept. of Physics and Astronomy, for providing Departmental support of our initial or ganizational expenses. Approximately one-half of the total cost of the Symposium was borne by a joint grant from the National Science Foundation and the U. S. Air Force Office of Scientific Research. We thank the program officers, Dr. C. Satterthwaite and Dr. D.

Object-Based Image Analysis Thomas Blaschke,Stefan Lang,Geoffrey Hay,2008-08-09 This book brings together a collection of invited interdisciplinary perspectives on the recent topic of Object-based Image Analysis (OBIA). Its content is based on select papers from the 1 OBIA International Conference held in Salzburg in July 2006, and is enriched by several invited chapters. All submissions have passed through a blind peer-review process resulting in what we believe is a timely volume of the highest scientific, theoretical and technical standards. The concept of OBIA first gained widespread interest within the GIScience (Geographic Information Science) community circa 2000, with the advent of the first commercial software for what was then termed 'object-oriented image analysis'. However, it is widely agreed that OBIA builds on older segmentation, edge-detection and classification concepts that have been used in remote sensing image analysis for several decades. Nevertheless, its emergence has provided a new critical bridge to spatial concepts applied in multiscale landscape analysis, Geographic Information Systems (GIS) and the synergy between image-objects and their radiometric characteristics and analyses in Earth Observation data (EO).
