Planning and Installing Solar Thermal Systems Deutsche Gesellschaft Fur Sonnenenergie Dgs,2013-09-13 Solar thermal systems available today offer efficiency and reliability. They can be applied in different conditions to meet space- and water-heating requirements in the residential, commercial and industrial building sectors. The potential for this technology and the associated environmental benefits are significant. This book offers clear guidance on planning and installing a solar thermal system, crucial to the successful uptake of this technology. All major topics for successful project implementation are included. Beginning with resource assessment and an outline of core components, this guide details solar thermal system design, installation, operation and maintenance for single households, large systems, swimming pool heaters, solar air and solar cooling applications. Details on how to market solar thermal technologies, a review of relevant simulation tools and data on selected regional, national and international renewable energy programmes are also provided. In short, the book offers comprehensive guidance for professionals who wish to install solar thermal technology and will be a cherished resource for architects and engineers alike who are working on new projects, electricians, roofers and other installers, craftsmen undertaking vocational training and anyone with a specialized and practical interest in this field. Critical Mineral Resources of the United States K. J. Schulz,2017 As the importance and dependence of specific mineral commodities increase, so does concern about their supply. The United States is currently 100 percent reliant on foreign sources for 20 mineral commodities and imports the majority of its supply of more than 50 mineral commodities. Mineral commodities that have important uses and face potential supply disruption are critical to American economic and national security. However, a mineral commodity's importance and the nature of its supply chain can change with time; a mineral commodity that may not have been considered critical 25 years ago may be critical today, and one considered critical today may not be so in the future. The U.S. Geological Survey has produced this volume to describe a select group of mineral commodities currently critical to our economy and security. For each mineral commodity covered, the authors provide a comprehensive look at (1) the commodity's use; (2) the geology and global distribution of the mineral deposit types that account for the present and possible future supply of the commodity; (3) the current status of production, reserves, and resources in the United States and globally; and (4) environmental considerations related to the commodity's production from different types of mineral deposits. The volume describes U.S. critical mineral resources in a global context, for no country can be self-sufficient for all its mineral commodity needs, and the United States will always rely on global mineral commodity supply chains. This volume provides the scientific understanding of critical mineral resources required for informed decisionmaking by those responsible for ensuring that the United States has a secure and sustainable supply of mineral commodities.

Light Alloys Robert John Hussey,Josephine Wilson,2013-04-17 Light Alloys Directory and Databook is a world-wide directory of the properties and suppliers of light alloys used in, or proposed for, numerous engineering applications. Alloys covered will include aluminium alloys, magnesium alloys, titanium alloys, beryllium. For the metals considered each section will consist of: a short introduction; a table comparing basic data and a series of comparison sheets. The book will adopt standardised data in order to help the reader in finding and comparing different materials and identifying the required information. All comparison sheets are cross-referenced, so that the user will be able to locate data on a specific product or compare properties easily. The book is designed to complement the existing publications on high performance materials.

Environmental Barrier Coatings Kang N. Lee ,2020-12-29 The global increase in air travel will require commercial vehicles to be more efficient than ever before. Advanced engine hot section materials are a key technology required to keep fuel consumption and emission to a minimum in next-generation gas turbines. Ceramic matrix composites (CMCs) are the most promising material to revolutionize gas turbine hot section materials technology because of their excellent high-temperature properties. Rapid surface recession due to volatilization by water vapor is the Achilles heel of CMCs. Environmental barrier coatings (EBCs) is an enabling technology for CMCs, since it protects CMCs from water vapor. The first CMC component entered into service in 2016 in a commercial engine, and more CMC components are scheduled to follow within the next few years. One of the most difficult challenges to CMC components is EBC durability, because failure of EBC leads to a rapid reduction in CMC component life. Key contributors to EBC failure include recession, oxidation, degradation by calcium-aluminum-magnesium silicates (CMAS) deposits, thermal and thermo-mechanical strains, particle erosion, and foreign object damage (FOD). Novel EBC chemistries, creative EBC designs, and robust processes are required to meet EBC durability challenges. Engine-relevant testing, characterization, and lifing methods need to be developed to improve EBC reliability. The aim of this Special Issue is to present recent advances in EBC technology to address these issues. In particular, topics of interest include but are not limited to the following: • Novel EBC chemistries and designs; • Processing including plasma spray, suspension plasma spray, solution precursor plasma spray, slurry process, PS-PVD, EB-PVD, and CVD; • Testing, characterization, and modeling; • Lifing.

The Economics of Deep-Sea Mining J.B. Donges,2012-12-06 Manganese nodules lying on the ocean floor beyond national jurisdiction and containing such strategic minerals as cobalt, copper, manganese and nickel are currently considered to constitute the highest-valued deep ocean mineral resource and regarded by many as the common heritage of mankind. Not surprisingly, the exploitation of minerals from the sea bed was one of the most controversial issues discussed at the Third United Nations Conference on the Law of the Sea from 1973 to 1982, which led to the adoption of a new Convention on the Law of the Sea in Jamaica in December of 1982. However, the still ongoing international debate on the Convention I s regime to govern deep-sea mining reveals that the central economic problems involved are far from being defi nitely settled. In view of the importance of this issue, the Kiel Institute of World Economics launched in 1980 a major

research project on allocational and distributional aspects of the use of ocean resources. A comprehensive analysis and evaluation of the new Law of the Sea Convention has already been published (see Wilfried Prewé et al., *Die Neuordnung der Meere - Eine ökonomische Kritik des neuen Seerechts*. Kieler Studien No. 173. Tübingen: J.C.B. Mohr, 1982).

Comparative Homeland Security Nadav Morag, 2018-06-22 Introduces the reader to a variety of overseas Homeland Security strategies, policies, and practices in order to present approaches to addressing homeland security challenges and inform students and practitioners. This book educates those studying or involved in American Homeland Security on the policies and procedures set by other countries so that they can learn from foreign experiences and determine which overseas approaches may be applicable to improving US Homeland Security policy. The book is broken down into topical categories reflecting some of the major areas within the field of Homeland Security. Each chapter comprises a discussion of strategic policies followed by a set of countries in the context of the subset of Homeland Security addressed in that particular chapter. The book also delves into cybersecurity policy issues, an area that has been growing exponentially but was not touched on in the first edition. The new edition of *Comparative Homeland Security: Global Lessons* updates foreign laws, strategies, and policies while expanding the depth and range of the discussion to include additional overseas policies. Based on eleven countries procedures and nine homeland security dimensions, it covers: Counterterrorism Strategies, Laws and Institutions; Law Enforcement Institutions and Strategies; Immigration and Counter-Radicalization; The Role of the Military in Security and Support for Civil Authorities; Border Security, Naturalization, and Asylum Policies; Security Facilities, Cyber Networks, and Transportation; Emergency Preparedness, Emergency Response and Management and Crisis Communications; and Public Health Strategies and Institutions. New edition updates foreign strategies and policies and extends the scope of discussion of these topics. Expanded approach for a wider range of students and practitioners exploring the homeland security policies of other countries. Covers strategies and tactics to combat terrorism from a number of the world's democracies including: Great Britain, Israel, France, Germany, Canada, and Australia. Chapters are organized topically rather than by country, thus allowing students and practitioners to easily compare policies and integrate the concepts presented into practice. *Comparative Homeland Security: Global Lessons, Second Edition* is an excellent book for all scholars, students, and practitioners interested or involved in homeland security, emergency management, law enforcement, criminal justice, counter-terrorism, public health, transportation security, border security, and cybersecurity.

Making Competition Work in Electricity Sally Hunt, 2002-10-01 An expert's perspective on how competition can make this industry work. There has never been a coherent plan to restructure the electricity industry in the US until now. Power expert Sally Hunt gets down to the critical lessons learned from the California power crisis and other deregulated markets, in which competition has been introduced properly and successfully. Hunt presents sensible solutions to power market reform that have been cultivated over her twenty years of professional work in the industry. Sally Hunt (New York, NY) spent twenty years at National Economic Research Associates, where she was head of NERA's U.S. energy practice and a member of the board. Coauthor of *Competition and Choice in Electricity* with Graham Shuttleworth (0471957828), she has served as Corporate Economist at Con Edison, Deputy Director of the New York City Energy Office, and Assistant Administrator of the New York City Environmental Protection Administration. Over the years, financial professionals around the world have looked to the Wiley Finance series and its wide array of bestselling books for the knowledge, insights, and techniques that are essential to success in financial markets. As the pace of change in financial markets and instruments quickens, Wiley Finance continues to respond. With critically acclaimed books by leading thinkers on value investing, risk management, asset allocation, and many other critical subjects, the Wiley Finance series provides the financial community with information they want. Written to provide professionals and individuals with the most current thinking from the best minds in the industry, it is no wonder that the Wiley Finance series is the first and last stop for financial professionals looking to increase their financial expertise.

Manual for Courts-Martial 2012 United States Department Of Defense, 2012 The Manual for Courts-Martial (MCM), United States (2012 Edition) updates the MCM (2008 Edition). It is a complete reprinting and incorporates the MCM (2008 Edition), including all amendments to the Rules for Courts-Martial, Military Rules of Evidence (Mil. R. Evid.), and Punitive Articles made by the President in Executive Orders (EO) from 1984 to present, and specifically including EO 13468 (24 July 2008); EO 13552 (31 August 2010); and EO 13593 (13 December 2011). This edition also contains amendments to the Uniform Code of Military Justice (UCMJ) made by the National Defense Authorization Acts for Fiscal Years 2009 through 2012. Some of the significant changes are summarized and listed below. This summary is for quick reference only and should not be relied upon or cited by practitioners in lieu of the actual provisions of the MCM that have been amended. The MCM (2012 Edition) includes unique changes warranting attention.

Why the Left Loses Manwaring, Rob, Kennedy, Paul, 2018 Around the world, parties of the left and center-left have been struggling, losing ground to right-wing parties and various forms of reactionary populism. This book brings together a range of leading academics and experts on social democratic politics and policy to offer an international, comparative view of the changing political landscape. Using case studies from the United Kingdom, Germany, Spain, France, Australia and New Zealand contributors argue that despite different local and specific contexts, the mainstream center-left is beset by a range of common challenges. Analysis focuses on institutional and structural factors, the role of key individuals, and the atrophy of progressive ideas as interconnected reasons for the current struggles of the center-left.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. While EMP has been thought of as a remote possibility (who in his right mind is going to launch a nuclear weapon of any kind against the U.S.?) Advances in non-nuclear EMP, miniaturization of electronics and autonomous drones suddenly brings EMP into the role of the possible. No longer would an adversary need to risk retaliation when a drone from an unknown source attacks a vital facility.
