International Standard Classification of Occupations International Labour Office,2012 The International Standard Classification of Occupations 2008 (ISCO-08) is a four-level hierarchically structured classification that covers all jobs in the world. Developed with the benefit of accumulated national and international experience as well as the help of experts from many countries and agencies, ISCO-08 is fully supported by the international community as an accepted standard for international labour statistics. ISCO-08 classifies jobs into 436 unit groups. These unit groups are aggregated into 130 minor groups, 43 sub-major groups and 10 major groups, based on their similarity in terms of the skill level and skill specialisation required for the jobs. This allows the production of relatively detailed internationally comparable data as well as summary information for only 10 groups at the highest level of aggregation. Each group in the classification is designated by a title and code number and is associated with a definition that specifies the scope of the group. The classification is divided into two volumes: Volume I presents the structure and definitions of all groups in ISCO-08 and their correspondence with ISCO-88, which it supersedes, while Volume II provides an updated and expanded index of occupational titles and associated ISCO-08 and ISCO-88 codes.

*Popol Vuh* Dennis Tedlock,2013-02 *Popol Vuh*, the Quiché Mayan book of creation is not only the most important text in the native language of the Americas, it is also an extraordinary document of the human imagination. It begins with the deeds of Mayan Gods in the darkness of a primeval sea and ends with the radiant splendor of the Mayan Lords who founded the Quiché Kingdom in the Guatemalan highlands. Originally written in Mayan hieroglyphs, it was translated into the Roman alphabet in the 16th century. The new edition of Dennis Tedlock's unabridged, widely praised translation includes new notes and commentary, newly translated passages, newly deciphered hieroglyphs, and over 40 new illustrations.

Artistry in Bronze Jens M Daehner,Kenneth Lapatin,Ambra Spinelli,2017-11-21 The papers in this volume derive from the proceedings of the nineteenth International Bronze Congress, held at the Getty Center and Villa in October 2015 in connection with the exhibition *Power and Pathos: Bronze Sculpture of the Hellenistic World*. The study of large-scale ancient bronzes has long focused on aspects of technology and production. Analytical work of materials, processes, and techniques has significantly enriched our understanding of the medium. Most recently, the restoration history of bronzes has established itself as a distinct area of investigation. How does this scholarship bear on the understanding of bronzes within the wider history of ancient art? How do these technical data relate to our ideas of styles and development? How has the material itself affected ancient and modern perceptions of form, value, and status of works of art? **Modern Technologies and Their Influence in Fermentation Quality** Santiago Benito, 2020-05-20 During the last few years, industrial fermentation technologies have advanced in order to improve the quality of the final product. Some examples of those modern technologies are the biotechnology developments of microbial materials, such as *Saccharomyces* and non-*Saccharomyces* yeasts or lactic bacteria from different genera. Other technologies are related to the use of additives and adjuvants, such as nutrients, enzymes, fining agents, or preservatives and their management, which directly influence the quality and reduce the risks in final fermentation products. Other technologies are based on the management of thermal treatments, filtrations, pressure applications, ultrasounds, UV, and so on, which have also led to improvements in fermentation quality in recent years. The aim of the issue is to study new technologies able to improve the quality parameters of fermentation products, such as aroma, color, turbidity, acidity, or any other parameters related to improving sensory perception by the consumers. Food safety parameters are also included.
