Perryville Kenneth W. Noe, 2001-09-21 Winner of the Seaborg Award A History Book Club Selection On October 8, 1862, Union and Confederate forces clashed near Perryville, Kentucky, in what would be the largest battle ever fought on Kentucky soil. The climax of a campaign that began two months before in northern Mississippi, Perryville came to be recognized as the high water mark of the western Confederacy. Some said the hard-fought battle, forever remembered by participants for its sheer savagery and for their commanders' confusion, was the worst battle of the war, losing the last chance to bring the Commonwealth into the Confederacy and leaving Kentucky firmly under Federal control. Although Gen. Braxton Bragg's Confederates won the day, Bragg soon retreated in the face of Gen. Don Carlos Buell's overwhelming numbers. *Perryville: This Grand Havoc of Battle* is the definitive account of this important conflict. While providing all the parry and thrust one might expect from an excellent battle narrative, the book also reflects the new trends in Civil War history in its concern for ordinary soldiers and civilians caught in the slaughterhouse. The last chapter, unique among Civil War battle narratives, even discusses the battle's veterans, their families, efforts to preserve the battlefield, and the many ways Americans have remembered and commemorated Perryville.

War Photographs Taken on the Battlefields of the Civil War Mathew B. Brady, Alexander Gardner, 2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of

photography. Selected from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.

The Foundations of Japan J. W. Robertson Scott,2017-07-04 A concern arose to spend some time with them that I might feel and understand their life and the spirit they live in, if haply I might receive some instruction from them, or they might be in any degree helped forward by my following the leadings of truth among them when the troubles of War were increasing and when travelling was more difficult than usual. I looked upon it as a more favourable opportunity to season my mind and to bring me into a nearer sympathy with them.-Journal of John Woolman, 1762. I determined to commence my researches at some distance from the capital, being well aware of the erroneous ideas I must form should I judge from what I heard in a city so much subjected to foreign intercourse.-Borrow.

Would Trotsky Wear a Bluetooth? Paul R. Josephson,2009-12-09 After visiting Russia in 1921, the journalist Lincoln Steffens famously declared, I have seen the future, and it works. Steffens referred to the social experiment of technological utopianism he found in the Soviet Union, where subway cars and farm tractors would carry the worker and peasant -- figuratively and literally -- into the twentieth century. Believing that socialism and technology together created a brave new world, Boleslaw Bierut of Poland and Kim Il Sung of North Korea -- and other leaders -- joined Russia's Vladimir Lenin and Leon Trotsky in embracing big technology with a verve and conviction that rivaled the western world's. Paul R. Josephson here explores these utopian visions of technology -- and their unanticipated human and environmental costs. He examines the role of technology in communist plans and policies and the interplay between ideology and technological development. He shows that while technology was a symbol of regime legitimacy and an engine of progress, the changes it spurred were not unequivocally positive. Instead of achieving a worker's paradise, socialist technologies exposed the proletariat to dangerous machinery and deadly pollution; rather than freeing women from exploitation in family and labor, they paradoxically created for them the dual -- and exhausting -- burdens of mother and worker. The future did not work. The fall of the Soviet Union in 1991 marked the end of communism's self-proclaimed glorious quest to reach and surpass the West. Josephson's intriguing study of how technology both helped and hindered this effort asks new and important questions about the crucial issues inextricably linked with the development and diffusion of technology in any sociopolitical system.

Decision Support Systems for Weed Management Guillermo R. Chantre,José L. González-Andújar,2020-07-31 Weed management Decision Support Systems (DSS) are increasingly important computer-based tools for modern agriculture. Nowadays, extensive agriculture has become highly dependent on external inputs and both economic costs, as well the negative environmental impact of agricultural activities, demands knowledge-based technology for the

optimization and protection of non-renewable resources. In this context, weed management strategies should aim to maximize economic profit by preserving and enhancing agricultural systems. Although previous contributions focusing on weed biology and weed management provide valuable insight on many aspects of weed species ecology and practical guides for weed control, no attempts have been made to highlight the forthcoming importance of DSS in weed management. This book is a first attempt to integrate 'concepts and practice' providing a novel guide to the state-of-art of DSS and the future prospects which hopefully would be of interest to higher-level students, academics and professionals in related areas.

Climate Change-Resilient Agriculture and Agroforestry Paula Castro,Anabela Marisa Azul,Walter Leal Filho,Ulisses M. Azeiteiro,2019-01-24 This book collects wide-ranging contributions such as case studies, reviews, reports on technological developments, outputs of research/studies, and examples of successful projects, presenting current knowledge and raising awareness to help the agriculture and forestry sectors find solutions for mitigating climate variability and adapting to change. It brings the topic of ecosystem services closer to education and learning, as targeted by the Framework Convention on Climate Change and the Paris Agreement, the 2030 Agenda for Sustainable Development and the EU Biodiversity Strategy to 2020. Climate change and its impacts on agriculture and agroforestry have been observed across the world during the last 50 years. Increasing temperatures, droughts, biotic stresses and the impacts of extreme events have continuously decreased agroforestry systems' resilience to the effects of climate change. As such, there is a need to adapt farming and agroforestry systems so as to make them better able to handle ever-changing climate conditions, and to preserve habitats and ecosystems services.
