IBM Tivoli Application Dependency Discovery Manager Bart Jacob,Bhavesh Adhia,Karim Badr,Qing Chun Huang,Carol S. Lawrence,Martin Marino,Petra Unglaub-Lloyd,2008 In this IBM® Redbooks® publication, we describe the capabilities and ways to use the IBM Tivoli® Application Dependency Discovery Manager (TADDM). It is becoming critical for enterprises to track the IT resources in their environment and, more importantly, the dependencies of their business applications on various components. TADDM provides rich capabilities that discover the components of a complex infrastructure and their interdependencies. In this book, we provide insight into the TADDM capabilities and architecture. We include recommended procedures for installing and configuring TADDM, tips and techniques for populating the TADDM database and customizing its use, performance considerations, and information about how TADDM integrates with operational management programs.

Cybersecurity Framework Manufacturing Profile National Institute of Standards,2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers:* A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system* An evaluation of their ability to operate the control environment at their acceptable risk level* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid $75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than $10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly-bound, full-size books (8 ½ by 11 inches), with glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB), and is not affiliated with the National Institute of Standards and Technology.
