Wordless Prayer Tammie Southerland, 2024-06-04 Spurred to prayer by tragedy, pain, frustration, or raw hunger for God, you've felt it: the joyful-anguish, the grief-longing, the burden for mercy, reformation, revival, justice--even Christ's return. Your heart's gripped, and words cannot express all that is churning deep in your soul. It's here, says intercessory leader Tammie Southerland, in this space beyond human language, where mysteries are unveiled, authority is imparted, and the most powerful prayers are birthed--not by you, but by the Spirit within you. Through biblical insight, prophetic impartations, and fiery encouragement, she helps you navigate this holy ground, empowering you to · yield to the Spirit's perfect prayers when you have no words left · intercede with Christ according to the will of Heaven · live as a faithful witness and bold messenger who moves in the miraculous · bear eternal fruit in crisis, setbacks, and persecution You've been gripped for a purpose. It's time to step into the transformative dimension of wordless prayer and become a lightning rod for Heaven to manifest on earth.

Services for Aging Persons in China Xiaoping Shen, Shangyi Zhou, Xiulan Zhang, 2022-05-23 This volume draws upon one of the first comprehensive studies on the regional variations of services for aging persons in China to provide an empirical and theoretical understanding of the impact of China's rapidly growing aging population on the country's socioeconomic, cultural, and political systems. In three parts, the manuscript combines case-oriented comparative methods with variable-oriented statistical and GIS analyses to examine the spatial patterns and relationships between supply and demand of affordable and accessible services for aging persons in China. Part one gives a historical review of population aging in China, including the development of services for aging persons and government policies and programs geared towards elders. Part two provides an analysis of spatial variations of supply and demand for services including food, housing, health, and community services for aging persons. Part three uses case studies to analyse the regional and local dimensions of elderly services. Suggestions are made for future planning, development, and policies. This book will appeal to policy makers, city planners, service providing businesses, and advanced undergraduate and graduate students studying economic geography, planning, and regional development.

Graph-Theoretic Techniques for Web Content Mining Adam Schenker, Abraham Kandel, Horst Bunke, Mark Last, 2005-05-31 This book describes exciting new opportunities for utilizing robust graph representations of data with common machine learning algorithms. Graphs can model additional information which is often not present in commonly used data representations, such as vectors. Through the use of graph distance – a relatively new approach for determining graph similarity – the authors show how well-known algorithms, such as k-means clustering and k-nearest neighbors classification, can be easily extended to work with graphs instead of vectors. This allows for the utilization of additional information found in graph representations, while at the same time employing well-known, proven algorithms. To demonstrate and investigate these novel techniques, the authors have selected the domain of web content mining, which involves the clustering and classification of web documents based on their textual substance. Several methods of representing web document content by graphs are introduced; an interesting feature of

these representations is that they allow for a polynomial time distance computation, something which is typically an NP-complete problem when using graphs. Experimental results are reported for both clustering and classification in three web document collections using a variety of graph representations, distance measures, and algorithm parameters. In addition, this book describes several other related topics, many of which provide excellent starting points for researchers and students interested in exploring this new area of machine learning further. These topics include creating graph-based multiple classifier ensembles through random node selection and visualization of graph-based data using multidimensional scaling. Contents: Introduction to Web Mining Graph Similarity Techniques Graph Models for Web Documents Graph-Based Clustering Graph-Based Classification The Graph Hierarchy Construction Algorithm for Web Search Clustering Readership: Researchers and graduate students who are interested in computer science, specifically machine learning. Also of interest to researchers in academia or industry in disciplines such as information science or information technology who are interested in text and web documents. Keywords: Graph; Machine Learning; Web Mining; Data Mining; Clustering; Classification; Graph Distance; Maximum Common Subgraph Key Features: Opens up exciting new possibilities for utilizing graphs in common machine learning algorithms Presents experimental results comparing differing graph representations and graph distance measures Provides a review of graph-theoretic similarity techniques

Chosen Michelle McClain-Walters, 2019-09-03 MANY ARE CALLED, BUT YOU ARE CHOSEN. This book will equip you with prophetic insight and divine strategies that will jump-start you on the path toward destiny. There is a distinction between the called and the chosen, the many and the few. Who are these people? How did they get exclusive access to the favor of God? They are confident and prosperous, generous and joyful. They live in the realm of miracles and the supernatural, as if the very breath of God is on every decision they make in life. One season after the next they are catapulted to new levels in life. All they do is win and trample over challenges, disappointments, and attacks from the enemy, while others still remain at the starting line, awaiting breakthrough. In her book Michelle McClain-Walters shows readers just what this distinction is and how they can live in the fullness of their identity as God's chosen ones. Built on the words of Christ in John 15:16—"You did not choose me, but I chose you and appointed you so that you might go and bear fruit—fruit that will last—and so that whatever you ask in my name the Father will give you"—and Matthew 22:14—"Many are called but few are chosen"—Chosen is a revelation of the spiritual force behind the life of the next-level believer. Choose now and declare, "I am chosen!" and watch as the mysteries of heaven are opened to you. Issues and Cases in Law Enforcement James J. Vardalis, 2010 Law enforcement and community concerns continue to change and become more challenging for police personnel. The actions of police officers at the time of an event and their response to crime problems have a direct correlation to the successful prosecution of the offender. Law enforcement officers must use all available resources in order to develop the skills and the ability to analyze and understand complex materials and investigations. Issues and Cases in Law Enforcement presents a variety of stimulating cases and issues that provoke critical analysis of emerging issues in the field. The cases contained in this text are designed to confront difficult decision-making issues, force officers and students of criminal justice to identify essential information, analyze facts appropriately, identify mistakes, recognize alternatives, choose alternatives, and make reasonable conclusions. The text also incorporates the opportunity for open exploration of these sensitive issues, with an understanding of cultural and racial concerns, and the promotion of a productive discussion regarding critical topics. The complexities of proper case presentation, testimony, and prosecution in today's environment necessitate that law enforcement officers and students of criminal justice have a clear understanding of contemporary dilemmas. This book will enable the officer and students of criminal justice to write clear and comprehensive reports to document complicated events, to clearly articulate intricate details in a court of law, and react appropriately to people with varied problems and perceptions.
