*Antonia Augusta* Nikos Kokkinos,1992 Nikos Kokkinos presents a portrait of the most influential Roman matron of her time - the daughter of Mark Antony and the great-grandmother of Nero. In addition to being pivotal to the political shifts of the Empire, Antonia was strongly involved in many aspects of business life, and thus her career has an important bearing on contemporary perceptions of the position of Roman women. Marshalling many diverse archaeological source materials, the author has produced a book which places Antonia firmly in the social context of her day.

*Expecting Better* Emily Oster,2014-06-24 “Emily Oster is the non-judgmental girlfriend holding our hand and guiding us through pregnancy and motherhood. She has done the work to get us the hard facts in a soft, understandable way.” —Amy Schumer \*Fully Revised and Updated for 2021\* What to Expect When You're Expecting meets Freakonomics: an award-winning economist disproves standard recommendations about pregnancy to empower women while they're expecting. From the author of Cribsheet and The Family Firm, a data-driven decision making guide to the early years of parenting Pregnancy—unquestionably one of the most profound, meaningful experiences of adulthood—can reduce otherwise intelligent women to, well, babies. Pregnant women are told to avoid cold cuts, sushi, alcohol, and coffee without ever being told why these are forbidden. Rules for prenatal testing are similarly unexplained. Moms-to-be desperately want a resource that empowers them to

make their own right choices. When award-winning economist Emily Oster was a mom-to-be herself, she evaluated the data behind the accepted rules of pregnancy, and discovered that most are often misguided and some are just flat-out wrong. Debunking myths and explaining everything from the real effects of caffeine to the surprising dangers of gardening, *Expecting Better* is the book for every pregnant woman who wants to enjoy a healthy and relaxed pregnancy—and the occasional glass of wine.

**Transcranial Magnetic and Electrical Brain Stimulation for Neurological Disorders** Bahman Zohuri, Patrick J.

McDaniel, 2022-08-20 *Transcranial Magnetic and Electrical Brain Stimulation for Neurological Disorders* examines the non-invasive application of electrical stimulation of the brain to treat neurological disorders, and to enhance individual/group performance. This volume discusses emerging electro-technologies such as transcranial direct current/alternating current electric fields and pulsed magnetic fields to treat many of these common medical problems. Chapters begin by examining foundations of electromagnetic theory and wave equations that underly these technologies before discussing methods to treat disorders, the impact of technology and mental health and artificial intelligence. Discussing over 40 neurological diseases, this book presents coverage of techniques to treat stroke, epilepsy, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, depression, schizophrenia, and many other diseases of the nervous system. Compares techniques so users can select ideal methods for their experiment Provides a focused tutorial introduction to core diseases of the nervous system, including stroke, epilepsy, Alzheimer's, Parkinson's, head and spinal cord trauma, schizophrenia, and more Covers more than 40 diseases, from foundational science to the best treatment protocols Includes discussions of translational research, drug discovery, personalized medicine, ethics and neuroscience Provides walk-through boxes that guide students step-by-step through the

experiment

*Antique Boxes, Tea Caddies, & Society 1700-1880* Antigone Clarke, Joseph O'Kelly, 2003 The box represents great temptation. Open me it says. The human cannot resist it; its charm is overwhelming. So too, is the charm of this remarkable book, in which antique boxes and tea caddies - along with the people who inspired, made, and used them - dance gracefully through the pages. The reader is guided through the aesthetic, cultural, and social influences of the years covered, accumulating a deep understanding of the form, decoration, and purpose of eighteenth and nineteenth century boxes. The extensive text covers wooden, tortoiseshell, ivory, papier m<sup>m</sup>ach<sup>e</sup>, and lacquer boxes. There are chapters on Anglo Indian, Scottish, Irish, Penwork, Straw work, and Tunbridge ware boxes, as well as on boxes made for special purposes. Captions include complete descriptions, values, and circa dates for all boxes shown. The 905 images include original drawings, magnificent photographs of complete pieces, and close-ups illustrating the structure and decoration of boxes. This is an indispensable companion for box collectors and reflects fascinating information about cultural forces that shaped the eighteenth and nineteenth centuries.

### **Humanitarian Military Intervention** Taylor B.

Seybolt, 2007 Military intervention in a conflict without a reasonable prospect of success is unjustifiable, especially when it is done in the name of humanity. Couched in the debate on the responsibility to protect civilians from violence and drawing on traditional 'just war' principles, the central premise of this book is that humanitarian military intervention can be justified as a policy option only if decision makers can be reasonably sure that intervention will do more good than harm. This book asks, 'Have past humanitarian military interventions been successful?' It defines success as saving lives and sets out a methodology for estimating the number of lives saved by a particular military intervention. Analysis of 17 military operations in six conflict areas that were the defining cases of the 1990s—northern Iraq after the Gulf War, Somalia, Bosnia and Herzegovina, Rwanda, Kosovo and East Timor—shows that the majority were successful by this measure. In every conflict studied, however, some military interventions succeeded while others failed, raising the question, 'Why have some past interventions been more successful than others?' This book argues that the central factors determining whether a humanitarian intervention succeeds are the objectives of the intervention and the military strategy employed by the intervening states. Four types of humanitarian military intervention are offered: helping to deliver emergency aid, protecting aid operations, saving the victims of violence and defeating the perpetrators of violence. The focus on strategy within these four types allows an exploration of the political and military dimensions of humanitarian intervention and highlights the advantages and disadvantages of each of the four types. Humanitarian military intervention is controversial. Scepticism is always in order about the need to use military force

because the consequences can be so dire. Yet it has become equally controversial not to intervene when a government subjects its citizens to massive violation of their basic humanrights. This book recognizes the limits of humanitarian intervention but does not shy away from suggesting how military force can save lives in extreme circumstances.

**Toxic Injustice** Susanna Rankin Bohme,2015 The pesticide dibromochloropropane, known as DBCP, was developed by the chemical companies Dow and Shell in the 1950s to target wormlike, soil-dwelling creatures called nematodes. Despite signs that the chemical was dangerous, it was widely used in U.S. agriculture and on Chiquita and Dole banana plantations in Central America. In the late 1970s, DBCP was linked to male sterility, but an uneven regulatory process left many workers—especially on Dole’s banana farms—exposed for years after health risks were known. Susanna Rankin Bohme tells an intriguing, multilayered history that spans fifty years, highlighting the transnational reach of corporations and social justice movements. Toxic Injustice links health inequalities and worker struggles as it charts how people excluded from workplace and legal protections have found ways to challenge power structures and seek justice from states and transnational corporations alike.
