Antonia Augusta Nikos Kokkinos,1992 Nikos Kokkinos presents a portrait of the most influential Roman matron of her time - the daughter of Mark Antony and the great-grandmother of Nero. In addition to being pivotal to the political shifts of the Empire, Antonia was strongly involved in many aspects of business life, and thus her career has an important bearing on contemporary perceptions of the position of Roman women. Marshalling many diverse archaeological source materials, the author has produced a book which places Antonia firmly in the social context of her day.

Antique Boxes, Tea Caddies, & Society 1700-1880 Antigone Clarke,Joseph O'Kelly,2003 The box represents great temptation. Open me it says. The human cannot resist it; its charm is overwhelming. So too, is the charm of this remarkable book, in which antique boxes and tea caddies - along with the people who inspired, made, and used them - dance gracefully through the pages. The reader is guided through the aesthetic, cultural, and social influences of the years covered, accumulating a deep understanding of the form, decoration, and purpose of eighteenth and nineteenth century boxes. The extensive text covers wooden, tortoiseshell, ivory, papier m^mach^e, and lacquer boxes. There are chapters on Anglo Indian, Scottish, Irish, Penwork, Straw work, and Tunbridge ware boxes, as well as on boxes made for special purposes. Captions include complete descriptions, values, and circa dates for all boxes shown. The 905 images include original drawings, magnificent photographs of complete pieces, and close-ups illustrating the structure and decoration of boxes. This is an indispensable companion for box collectors and reflects fascinating information about cultural forces that shaped the eighteenth and nineteenth centuries.

Social Determinants of Health in Countries in Conflict World Health Organization. Regional Office for the Eastern Mediterranean,2008 Social inequality is widely recognized as an important cause of conflict and the social determinants of health in conflict settings reflect and reinforce these inequalities. This publication explores the impact of conflict and occupation on the health of people in six countries of the region, identifying loss of human rights, breaches of medical neutrality and psychosocial distress as key determinants that affect people's health in crisis settings. The publication also identifies some examples of activities and interventions that may help to mitigate the impact of these conflicts on the health and well-being of affected populations, as well as policy implications for all concerned parties.

Religious Landscapes in Contemporary Spain Ana I. Planet Contreras,Miguel Hernando de Larramendi,Julio de la Cueva,2022-06-13 Spain is no longer exclusively identified with Catholicism. This book sets out to understand the social dynamics of twenty-first century Spain through the perspective of religion and religious pluralism. Divided into three parts, Part I, Secularization in Spain, frames the analysis of this secularization process throughout the twentieth century and beyond, with particular attention to the process during the Second Republic and the quiet secularization of society that began under Franco's regime. Part II, Religious Change in Spain, establishes the broad framework of the process, addressing the changes that have taken place within Catholicism and the reaction of the Protestant minority as social mores became increasingly fast moving. Part III, Islam in Spain, addresses both its history (including colonial management) and current dynamics (how Islam is viewed by other religions; the impact of the March 11, 2004, attacks; and Islamophobic discourse). Religious Landscapes in Contemporary Spain is essential reading for scholars and students in History and Contemporary Affairs.

Humanitarian Military Intervention Taylor B. Seybolt,2007 Military intervention in a conflict without a reasonable prospect of success is unjustifiable, especially when it is done in the name of humanity. Couched in the debate on the responsibility to protect civilians from violence and drawing on traditional 'just war' principles, the central premise of this book is that humanitarian military intervention can be justified as a policy option only if decision makers can be reasonably sure that intervention will do more good than harm. This book asks, 'Have past humanitarian military interventions been successful?' It defines success as saving lives and sets out a methodology for estimating the number of lives saved by a particular military intervention. Analysis of 17 military operations in six conflict areas that were the defining cases of the 1990s-northern Iraq after the Gulf War, Somalia, Bosnia and Herzegovina, Rwanda, Kosovo and East Timor-shows that the majority were successful by this measure. In every conflict studied, however, some military interventions succeeded while others failed, raising the question, 'Why have some past interventions been more successful than others?' This book argues that the central factors determining whether a humanitarian intervention succeeds are the objectives of the intervention and the military strategy employed by the intervening states. Four types of humanitarian military intervention are offered: helping to deliver emergency aid, protecting aid operations, saving the victims of violence and defeating the perpetrators of violence. The focus on strategy within these four types allows an exploration of the political and military dimensions of humanitarian intervention and highlights the advantages and disadvantages of each of the four types. Humanitarian military intervention is controversial. Scepticism is always in order about the need to use military force because the consequences can be so dire. Yet it has become equally controversial not to intervene when a government subjects its citizens to massive violation of their basic human rights. This book recognizes the limits of humanitarian intervention but does not shy away from suggesting how military force can save lives in extreme circumstances.

Temporomandibular Disorders National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Health Care Services,Board on Health Sciences Policy,Committee on Temporomandibular Disorders (TMDs): From Research Discoveries to Clinical Treatment,2020-07-01 Temporomandibular disorders (TMDs), are a set of more than 30 health disorders associated with both the temporomandibular joints and the muscles and tissues of the jaw. TMDs have a range of causes and often co-occur with a number of overlapping medical conditions, including headaches, fibromyalgia, back pain and irritable bowel syndrome. TMDs can be transient or long-lasting and may be associated with problems that range from an occasional click of the jaw to severe chronic pain involving the entire orofacial region. Everyday activities, including eating and talking, are often difficult for people with TMDs, and many of them suffer with severe chronic pain due to this condition. Common social activities that most people take for granted, such as smiling, laughing, and kissing, can become unbearable. This dysfunction and pain, and its associated suffering, take a terrible toll on affected individuals, their families, and their friends. Individuals with TMDs often feel stigmatized and invalidated in their experiences by their family, friends, and, often, the health care community. Misjudgments and a failure to understand the nature and depths of TMDs can have severe consequences - more pain and more suffering - for individuals, their families and our society. Temporomandibular Disorders: Priorities for Research and Care calls on a number of stakeholders - across medicine, dentistry, and other fields - to improve the health and well-being of individuals with a TMD. This report addresses the current state of knowledge regarding TMD research, education and training, safety and efficacy of clinical treatments of TMDs, and burden and costs associated with TMDs. The recommendations of Temporomandibular Disorders focus on the actions that many organizations and agencies should take to improve TMD research and care and improve the overall health and well-being of individuals with a TMD.
