Field Programmable Logic and Applications Patrick Lysaght,James Irvine,Reiner Hartenstein,2004-06-22 This book contains the papers presented at the 9th International Workshop on Field Programmable Logic and Applications (FPL'99), hosted by the University of Strathclyde in Glasgow, Scotland, August 30 - September 1, 1999. FPL'99 is the ninth in the series of annual FPL workshops. The FPL'99 programme committee has been fortunate to have received a large number of high-quality papers addressing a wide range of topics. From these, 33 papers have been selected for presentation at the workshop and a further 32 papers have been accepted for the poster sessions. A total of 65 papers from 20 countries are included in this volume. FPL is a subject area that attracts researchers from both electronic engineering and computer science. Whether we are engaged in research into software or hard software seems to be primarily a question of perspective. What is unquestionable is that the interaction of groups of researchers from different backgrounds results in stimulating and productive research. As we prepare for the new millennium, the premier European forum for researchers in field programmable logic remains the FPL workshop. Next year the FPL series of workshops will celebrate its tenth anniversary. The contribution of so many overseas researchers has been a particularly attractive feature of these events, giving them a truly international perspective, while the informal and convivial atmosphere that pervades the workshops have been their hallmark. We look forward to preserving these features in the future while continuing to expand the size and quality of the events.

What Motivates Faculty to Teach in Distance Education? Ruth Gannon-Cook,2010-10-14 What Motivates Faculty to Teach in Distance Education? provides seminal data on what has been found to best motivate faculty to teach online. This information is critical to most universities because, in order to stay competitive, many will increase their online course offerings. Faculty will be needed to design and teach these programs.

New Learning Paradigms in Soft Computing Lakhmi C. Jain,Janusz Kacprzyk,2013-06-05 Learning is a key issue in the analysis and design of all kinds of intelligent systems. In recent time many new paradigms of automated (machine) learning have been proposed in the literature. Soft computing, that has proved to be an effective and efficient tool in so many areas of science and technology, seems to offer new qualities in the realm of machine learning too. The purpose of this volume is to present some new learning paradigms that have been triggered, or at least strongly influenced by soft computing tools and techniques, mainly related to neural networks, fuzzy logic, rough sets, and evolutionary computations.

The Bedrock of Opinion Göran Sundqvist,2002-02-28 The issue of nuclear waste is about managing some of the most dangerous material ever to exist. This has to be done safely, and in a way that remains safe for many thousands of years. To realize safe disposal, satisfying bedrock conditions are needed as well as people willing to accept disposal in their own community. In most countries this kind of place has been difficult to locate. This book is the first of its kind, reporting a study which analyses in detail the highly controversial decisions on how to finally dispose of nuclear waste in Sweden, a country considered a forerunner in nuclear waste management. The siting process is traced, as are its connections both back in time and to the global community. From the perspective of science and technology studies the study contributes to the understanding of regulation of controversial technical issues in modern societies.

Hazardous Decisions D. Huitema, 2006-04-11 where Jeremy Richardson, Albert Weale and Hugh Ward were excellent hosts at the Department of Government and Thomas Christiansen a very good roommate. Having included the UK as a country where decision processes were far less participatory (and thus 'worse' in my own view) than those in the Netherlands, I started doing my first interviews there, which were mainly intended to identify suitable case studies for research. But then I read a highly critical review of a book that had a similar topic as my study. The critique was that cases of hazardous waste siting cannot adequately be studied without understanding their national context. This made me decide to devote some attention to the legal context of hazardous waste siting in the three countries of interest (which is of course only a part of the national context) and its development through the years. The study of the UK system of environmental regulation and land use planning was not a simple issue, and I was warned various times (for instance by Andrew Blowers at the Open University) that the legislation was highly complex and easily misinterpreted. I felt personally touched by such warnings and decided that I should perhaps approach the UK system a bit less as an evil empire and maybe be a bit more 'objective' in my appraisals.

International Environmental Law and Policy in Africa B. Chaytor, K.R. Gray, 2003-06-30 C.O.OKID1 I welcome the opportunity to prepare a Foreword to the book on Environmental Policy and Law in Africa, edited by Kevin R. Gray and Beatrice Chaytor. It is a pleasure to do that because the book is a contribution to the cause of capacity building for development and implementation of environmental law in Africa, a goal towards which I have had an undivided focus over the last two decades. There is still some belief in and outside Africa that for developing countries in general, and Africa in particular, development and implementation of environmental law is not a priority. This belief prevails strongly in many quarters of the industrialised countries. In fact, the view is held either out of blatant ignorance or by some renegade industrialists who fail to appreciate Michael Royston's 1979 thesis that Pollution Prevention Pays.² That group, for obvious reasons, must have their correspondent counterparts in Africa to provide hope that industries rejected as derelict in the West or inoperable due to rigorous environmental regulation, can find homes to which they can escape and dump their polluting industries.

Greening Society P.J. Driessen, P. Glasbergen, 2002-06-30 This book shows how the environmental policy pursued in The Netherlands has undergone a revolutionary change: a change referred to as a paradigm shift. A new trend can be detected from top-down governance to an interactive form of governance. This new paradigm assumes that environmental policy can only be realised successfully if it is embedded in a wider balancing process in which both societal and economic interests are taken into account. Parties other than government, such as businesses, non-governmental organisations, and citizens, must become involved in the policy-making process and subsequently its implementation. The new paradigm has given a significant impetus to the debates on greening our society. The goal of this book is to offer the reader an analysis of this paradigm shift and to explain the possibilities and limitations of exploring the new method of governance. The perspective taken is from the multidisciplinary social science point of view; the developments in environmental policy are analysed on the basis of sociology, political science, and policy studies. While the analyses relate specifically to Dutch environmental policy, the lessons learned can also be of significance for the environmental policy pursued in other liberal democratic nations.

Law and Economics of International Climate Change Policy R. Schwarze, 2013-03-09 International climate change policy can be broadly divided into two periods: A first period, where a broad consensus was reached to tackle the risk of global warming in a

coordinated global effort, and a second period, where this consensus was finally framed into a concrete policy. The first period started at the Earth Summit of Rio de Janeiro in 1992, where the United Nations Framework Convention on Climate Change (UNFCCC) was opened for signature. The UNFCCC was subsequently signed and ratified by 174 countries, making it one of the most accepted international treaties ever. The second period was initiated at the 3 Conference of the Parties (COP3) to the UNFCCC in Kyoto in 1997, which produced the Kyoto Protocol (KP). Till now, eighty-four countries have signed the Kyoto Protocol, but only twelve ratified it. A major reason for this slow ratification is that most operational details of the Kyoto Protocol were not decided in Kyoto but deferred to following conferences. This deferral of the details, while probably appropriate to initially reach an agreement, is a major stepping stone for a speedy ratification of the protocol. National policy makers and their constituencies, who would ultimately bear the cost of Kyoto, are generally not prepared to ratify a treaty that could mean anything, from an unsustainable strict regime of international control of greenhouse gases (GHGs) to an L-regime of loopholes, or from a pure market-based international carbon trading to a regime of huge international carbon tax funds.

Programming Persistent Memory Steve Scargall, 2020-01-09 Beginning and experienced programmers will use this comprehensive guide to persistent memory programming. You will understand how persistent memory brings together several new software/hardware requirements, and offers great promise for better performance and faster application startup times—a huge leap forward in byte-addressable capacity compared with current DRAM offerings. This revolutionary new technology gives applications significant performance and capacity improvements over existing technologies. It requires a new way of thinking and developing, which makes this highly disruptive to the IT/computing industry. The full spectrum of industry sectors that will benefit from this technology include, but are not limited to, in-memory and traditional databases, AI, analytics, HPC, virtualization, and big data. *Programming Persistent Memory* describes the technology and why it is exciting the industry. It covers the operating system and hardware requirements as well as how to create development environments using emulated or real persistent memory hardware. The book explains fundamental concepts; provides an introduction to persistent memory programming APIs for C, C++, JavaScript, and other languages; discusses RMDA with persistent memory; reviews security features; and presents many examples. Source code and examples that you can run on your own systems are included. What You'll Learn Understand what persistent memory is, what it does, and the value it brings to the industry Become familiar with the operating system and hardware requirements to use persistent memory Know the fundamentals of persistent memory programming: why it is different from current programming methods, and what developers need to keep in mind when programming for persistence Look at persistent memory application development by example using the Persistent Memory Development Kit (PMDK) Design and optimize data structures for persistent memory Study how real-world applications are modified to leverage persistent memory Utilize the tools available for persistent memory programming, application performance profiling, and debugging Who This Book Is For C, C++, Java, and Python developers, but will also be useful to software, cloud, and hardware architects across a broad spectrum of sectors, including cloud service providers, independent software vendors, high performance compute, artificial intelligence, data analytics, big data, etc.

Aging in Sub-Saharan Africa National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on Policy Research and Data Needs to Meet the Challenge of Aging in Africa, 2006-11-10 In sub-Saharan Africa, older people make up a relatively small fraction of the total population and are supported primarily by family and other kinship

networks. They have traditionally been viewed as repositories of information and wisdom, and are critical pillars of the community but as the HIV/AIDS pandemic destroys family systems, the elderly increasingly have to deal with the loss of their own support while absorbing the additional responsibilities of caring for their orphaned grandchildren. Aging in Sub-Saharan Africa explores ways to promote U.S. research interests and to augment the sub-Saharan governments' capacity to address the many challenges posed by population aging. Five major themes are explored in the book such as the need for a basic definition of older person, the need for national governments to invest more in basic research and the coordination of data collection across countries, and the need for improved dialogue between local researchers and policy makers. This book makes three major recommendations: 1) the development of a research agenda 2) enhancing research opportunity and implementation and 3) the translation of research findings.

Winning the Long War James Jay Carafano, Paul Rosenzweig, 2005 The war on terrorism, like the Cold War will be a protracted conflict requiring a long-term strategy for victory. In this book experts on homeland security, civil liberties and economics examine current U. S. Policy and map out a strategy.

Multi-criteria Decision Making Methods Evangelos Triantaphyllou, 2013-03-09 Multi-Criteria Decision Making (MCDM) has been one of the fastest growing problem areas in many disciplines. The central problem is how to evaluate a set of alternatives in terms of a number of criteria. Although this problem is very relevant in practice, there are few methods available and their quality is hard to determine. Thus, the question 'Which is the best method for a given problem?' has become one of the most important and challenging ones. This is exactly what this book has as its focus and why it is important. The author extensively compares, both theoretically and empirically, real-life MCDM issues and makes the reader aware of quite a number of surprising 'abnormalities' with some of these methods. What makes this book so valuable and different is that even though the analyses are rigorous, the results can be understood even by the non-specialist. Audience: Researchers, practitioners, and students; it can be used as a textbook for senior undergraduate or graduate courses in business and engineering.
