How Emotions Are Made Lisa Feldman Barrett 2017-03-07 Preeminent psychologist Lisa Barrett lays out how the brain constructs emotions in a way that could revolutionize psychology, health care, the legal system, and our understanding of the human mind. "Fascinating . . . A thought-provoking journey into emotion science."—The Wall Street Journal "A singular book, remarkable for the freshness of its ideas and the boldness and clarity with which they are presented."—Scientific American "A brilliant and original book on the science of emotion, by the deepest thinker about this topic since Darwin."—Daniel Gilbert, best-selling author of *Stumbling on Happiness* The science of emotion is in the midst of a revolution on par with the discovery of relativity in physics and natural selection in biology. Leading the charge is psychologist and neuroscientist Lisa Feldman Barrett, whose research overturns the long-standing belief that emotions are automatic, universal, and hardwired in different brain regions. Instead, Barrett shows, we construct each instance of emotion through a unique interplay of brain, body, and culture. A lucid report from the cutting edge of emotion science, *How Emotions Are Made* reveals the profound real-world consequences of this breakthrough for everything from neuroscience and medicine to the legal

system and even national security, laying bare the immense implications of our latest and most intimate scientific revolution.

Applications of Biochar for Environmental Safety Ahmed Abdelhafez 2020-07-22 Biochar is a carbon-rich material produced from the pyrolysis of organic materials from agricultural and forestry biomass at a relatively low temperature in the absence of oxygen. As such, it has potential for solving many agricultural and environmental problems. This book is divided into five sections: "Introduction," "Production and Legislation of Biochar," "Applications of Biochar for Soil Fertility Improvement," "Role of Biochar for Soil Remediation and Ameliorating Salinity Effects" and "Applications of Biochar for Water Treatment." Chapters address topics such as the pros and cons of biochar, its production, and its role in remediating and treating contaminated soils and water.

Textile Terminologies from the Orient to the Mediterranean and Europe, 1000 BC to 1000 AD Salvatore Gaspa 2017 The papers in this volume derive from the conference on textile terminology held in June 2014 at the University of

Copenhagen. Around 50 experts from the fields of Ancient History, Indo-European Studies, Semitic Philology, Assyriology, Classical Archaeology, and Terminology from twelve different countries came together at the Centre for Textile Research, to discuss textile terminology, semantic fields of clothing and technology, loan words, and developments of textile terms in Antiquity. The Complete Commodore Inner Space Anthology Hildon, Karl J. H 1985

Conspicuous Compassion Patrick West 2004 "We live in an age of conspicuous compassion. We sport empathy ribbons, send flowers to recently deceased celebrities, weep in public over murdered children, apologize for historical misdemeanors, wear red noses for the starving, go on demonstrations to proclaim 'Drop the Debt' or 'Not in My Name.' We feel each other's pain. We desperately seek a common identity and new social bonds to replace those that have withered in the post-war era - the family, the church, the nation and neighborhood. Mourning sickness is a religion for the lonely crowd that no longer subscribes to orthodox churches. Its flowers and teddies are its rites, its collective minutes' silences its liturgy and mass. This book's thesis is that such displays of empathy do not change the world for the better: they do not help the poor, diseased, dispossessed or bereaved. Our culture of ostentatious caring is about projecting your ego, and informing others what a deeply caring individual you are. It is about feeling good about

doing good, and illustrates not how altruistic we have become, but how selfish. And, as Patrick West shows in this witty but incisive monograph, sometimes it can be cruel."

General Gatacre Beatrix Gatacre 2008-05 GENERAL GATACRE- THE STORY OF THE LIFE AND SERVICES OF SIR WILLIAM FORBES GATACRE, K.C.B., D.S.O, by BEATRIX GATACRE. Originally published in 1910. THE main object in laying this book before the public is to provide an authentic and accurate narrative of Sir William Gatacres work in South Africa. The first half of this story has been entirely dependent on the recollections of others, and in the latter half, the authors own personal knowledge of Gatacre and his affairs has enabled the author to seek the information from numerous sources. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Applications of Nanotechnology for Green Synthesis Inamuddin 2020-07-02 Traditional methods in synthetic chemistry produce chemical waste and byproducts, yield smaller desired products, and generate toxic chemical substances, but the past two centuries have seen consistent, greener improvements in organic synthesis and

transformations. These improvements have contributed to substance handling efficiency by using green-engineered forerunners like sustainable techniques, green processes, eco-friendly catalysis, and have minimized energy consumption, reduced potential waste, improved desired product yields, and avoided toxic organic precursors or solvents in organic synthesis. Green synthesis has the potential to have a major ecological and monetary impact on modern pharmaceutical R&D and organic chemistry fields. This book presents a broad scope of green techniques for medicinal, analytical, environmental, and organic chemistry applications. It presents an accessible overview of new innovations in the field, dissecting the highlights and green chemistry attributes of approaches to green synthesis, and provides cases to exhibit applications to pharmaceutical and organic chemistry. Although daily chemical processes are a major part of the sustainable development of pharmaceuticals and industrial products, the resulting environmental pollution of these processes is of worldwide concern. This edition discusses green chemistry techniques and sustainable processes involved in synthetic organic chemistry, natural products, drug syntheses, as well various useful industrial applications.

Wealthy But Unhealthy Mattias Helble
2018-04-30 Asia and the Pacific have recently recorded high rates of not only economic growth

but also overweight and obesity, which are important risk factors for diseases such as diabetes, cardiovascular diseases, and certain types of cancer. Both conditions reduce productivity and thus have a direct impact on economies. Both conditions are also typically chronic and often require lifelong treatment, which burdens households and governments. This book (i) summarizes the knowledge on overweight and obesity in the region; (ii) presents the main determinants of overweight and obesity across countries; (iii) evaluates the economic costs of overweight and obesity, including the negative impact on productivity and higher probability of premature death; and (iv) recommends ways to lower the incidence of overweight based on market and nonmarket-based instruments.

Parental Alienation, DSM-5, and ICD-11 William Bernet 2010 Parental alienation is an important phenomenon that mental health professionals should know about and thoroughly understand, especially those who work with children, adolescents, divorced adults, and adults whose parents divorced when they were children. In this book, the authors define parental alienation as a mental condition in which a child - usually one whose parents are engaged in a high- conflict divorce - allies himself or herself strongly with one parent (the preferred parent) and rejects a relationship with the other parent (the alienated parent) without legitimate justification. This process leads to a tragic outcome when the child and the alienated parent, who previously had a loving and mutually satisfying relationship, lose the nurture and joy of that relationship for many years and perhaps for their lifetimes. We estimate that 1 percent of children and adolescents in the U.S. experience parental alienation. ~~When the~~

phenomenon is properly recognized, this condition is preventable and treatable in many instances. The authors of this book believe that parental alienation is not simply a minor aberration in the life of a family, but a serious mental condition. Because of the false belief that the alienated parent is a dangerous or unworthy person, the child loses one of the most important relationships in his or her life. This book contains much information about the validity, reliability, and prevalence of parental alienation. It also includes a comprehensive international bibliography regarding parental alienation with more than 600 citations. In order to bring life to the definitions and the technical writing, several short clinical vignettes have been included. These vignettes are based on actual families and real events, but have been modified to protect the privacy of both the parents and children.

Mycotoxins in Food N Magan 2004-07-16 Mycotoxins, toxic compounds produced by fungi, pose a significant contamination risk in both animal feed and foods for human consumption. With its distinguished editors and international team of contributors, Mycotoxins in food summarises the wealth of recent research on how to assess the risks from mycotoxins, detect particular mycotoxins and control them at differing stages in the supply chain. Part one addresses risk assessment techniques, sampling methods, modelling and detection techniques used to measure the risk of mycotoxin contamination and the current regulations governing mycotoxin limits in food. Part two looks at how the risk of contamination may be controlled, with chapters on the use of HACCP systems and mycotoxin control at different stages in the supply chain. Two case studies demonstrate how these controls work for particular products. The final section details particular mycotoxins, from ochratoxin A and patulin to zearalenone and fumonisins. Mycotoxins in food is a standard reference for all those concerned with ensuring the safety of food. Discusses the wealth of recent research in this important area Covers risk assessment, detection of particular mycotoxins and how to control them throughout the supply chain Describes how the risk of contamination can be controlled, including the use of HACCP systems

The Incompatibility of Global Anti-money Laundering Regimes with Human and Civil Rights Michele Sciarba 2019 This monograph deals with the progressive derogation of civil and human rights in the fight against money laundering, financing terrorists and tax evasion. The marriage of anti-money laundering (AML) and counterterrorism financing legislation has systematically expanded the scope of the authorities' rights of enforcement and compliance. AML legislation has transformed from a punitive to a preventive system of enforcement that violates the principle of proportionality. This has resulted in a 'catch-all' approach that places citizens under a general blanket of suspicion without initial reasonable grounds. In addition, this monograph proposes ways and mechanisms to effectively address money laundering while maintaining fundamental human rights. It also addresses the symbiotic relationship between money laundering and political corruption based on a current analysis of the fundamental characteristics and types of AML regimes in the US, the EU, Latin America, Africa and Southeast Asia.

Digital Watermarking and Steganography Ingemar Cox 2007-11-23 Digital audio, video, images, and documents are flying through cyberspace to their respective owners. Unfortunately, along the way, individuals may choose to intervene and take this content for themselves. Digital watermarking and steganography technology greatly reduces the instances of this by limiting or eliminating the ability of third parties to decipher the content that he has taken. The many techniques of digital

watermarking (embedding a code) and steganography (hiding information) continue to evolve as applications that necessitate them do the same. The authors of this second edition provide an update on the framework for applying these techniques that they provided researchers and professionals in the first well-received edition. Steganography and steganalysis (the art of detecting hidden information) have been added to a robust treatment of digital watermarking, as many in each field research and deal with the other. New material includes watermarking with side information, QIM, and dirty-paper codes. The revision and inclusion of new material by these influential authors has created a must-own book for anyone in this profession. This new edition now contains essential information on steganalysis and steganography New concepts and new applications including QIM introduced Digital watermark embedding is given a complete update with new processes and applications
