**The Politics of Power** Denise Leith, 2002-10-31 Even as Major General Suharto consolidated his power in the bloodletting of the mid-sixties, Freeport-McMoRan, the American transnational mining company, signed a contract with the new military regime, the first foreign company to do so. Today, in the isolated jungles of West Papua, a region that is increasingly restive under Indonesian rule, Freeport lays claim to the world's largest gold mine and one of its richest and most profitable copper mines. This volume is the first major analysis of the company's presence in Indonesia. It takes a close and detailed look at the changing nature of power relations between Freeport and Suharto, the Indonesian military, the traditional landowners (the Amungme and Kamoro), and environmental and human rights groups. It examines how and why an American company, despite such rigorous home-state laws, was able to operate in West Papua with impunity for nearly thirty years and adapt to, indeed thrive in, a business culture anchored in corruption, collusion, and nepotism.

**Mass-Mediated Terrorism** Brigitte Nacos, 2016-02-05 With all new and expanded chapters, the third edition provides an in-depth look at how terrorists exploit mass media to get attention, spread fear and anxiety among the targets of this sort of violence, and threaten further attacks. The traditional news media's appetite for shocking, sensational, and tragic stories has always resulted in over-coverage of terrorist events and threats. But today, social media, such as Twitter, Facebook, and YouTube, allow terrorists to communicate directly with huge audiences around the globe spreading their propaganda, radicalizing and recruiting followers, and providing know-how to "lone wolves." On the other hand, governments in democracies, too, utilize mass media to enlist public support for counterterrorist measures. This volume will help readers to understand the centrality of media considerations in both terrorism and counterterrorism.

**I'm No Angel** Kylie Bisutti, 2013-05-14 In December 2011, 21-year-old Victoria's Secret Runway Angel Kylie Bisutti stunned the fashion industry when she chose faith over fame and fortune and made the switch from supermodel to role model. In *I'm No Angel*, Kylie shares her story—from her early years as she struggled to make it big in the cutthroat world of modeling, to her “big break” winning the Victoria's Secret Runway Angel competition, to the disillusionment and spiritual warfare that followed. After finally realizing that she could no longer reconcile her career with her Christian beliefs, she surrendered her life to God and dedicated her life to preaching a message of modesty and inner beauty. Along the way, Kylie talks about her personal struggles with inadequacy, low self-esteem, and her near-constant quest for approval in a world where you can never be thin enough, pretty enough, or sexy enough. She helps readers understand that true beauty lies within and that real fulfillment comes from knowing, loving, and serving Christ.

**Think Bayes** Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems
