George M. Siouris

"Y" Paulie The Ballie,2020-04 This play is a three-fold effort: 1. A case for reparations for 90 years of slavery for 4,000,000. 2. The need to ban assault weapons 3. A possible answer to why humanity exists and what our destiny may be. + A letter for my young readers.

Missile Guidance and Control Systems George M. Siouris,2006-05-07 Airborne Vehicle Guidance and Control Systems is a broad and wide- angled engineering and technological area for research, and continues to be important not only in military defense systems but also in industrial process control and in commercial transportation networks such as various Global Positioning Systems (GPS). The book fills a long-standing gap in the literature. The author is retired from the Air Force Institute and received the Air Force's Outstanding Civilian Career Service Award.

Modern Chinese Warplanes Andreas Rupprecht,Tom Cooper,2012-12-19 Much of the fascination that Chinese military aviation holds for the analyst and enthusiast stems from the thick veil of secrecy that surrounds it. This uniquely compact yet comprehensive directory serves as a magnificently illustrated, in-depth analysis and directory of modern Chinese air power. It is organized in three parts: the most important military aircraft and their weapons found in Chinese service today; aircraft markings and serial number systems; and orders of battle for the People's Liberation Army Air Force and Naval Air Force. The study includes the latest developments emerging from behind the 'Bamboo Curtain', including the J-20 stealth fighter program and other indigenous projects that are equipping a rapidly modernizing air arm. The centerpiece consists of almost 100 fully illustrated pages detailing the organizational structure of the Air Force and Naval Aviation, providing an easy-to-use review of all known flying units, their equipment and their markings. No other book has ever attempted to present this level of accuracy in this way: 'Modern Chinese Air Power' portrays the PLAAF and the PLANAF in a degree of detail that was previously unavailable.

Russia's Warplanes Piotr Butowski,2016-12-31 Following the success of the first offering in the series, Harpia Publishing presents the second volume of Russia's Warplanes, completing what has become a standard reference work on the subject. Once again researched and written by the acknowledged expert in the field, the book draws upon the author's unrivaled connections within the Russian aerospace industry to conclude this comprehensive directory of the country's latest military aviation hardware. The result forms an essential companion to Volume 1, which detailed tactical combat aircraft, attack and transport helicopters, reconnaissance and surveillance aircraft, and special mission aircraft including airborne command posts and relay aircraft. Between them, the two works present in full detail the fixed-wing aircraft and helicopters that equip the various Russian air arms, as well as those developed for and operated by foreign states in the post-Soviet era. Alongside technical descriptions for each military aircraft - and every significant sub-variant - currently available from Russia's aerospace industry, or otherwise in large-scale service, Piotr Butowski provides historical background and accurate data relating to production and operators around the world. Full coverage is extended to upgrades, as well as the new avionics and advanced weapons that these introduce. The second volume in the series is dedicated to long-range bombers - including the Tu-95MS and Tu-160 that recently made their combat debuts over Syria - maritime patrol and antisubmarine warfare aircraft, strategic transport and tanker aircraft, theater transports, and trainers. The work provides authoritative accounts of Russia's current and future strategic bomber programs, as well as other fascinating types including the world's largest military transport, the An-124, and the new-generation Yak-130 advanced trainer and light attack aircraft. In common with previous Harpia titles, the book contains a wealth of high-quality photographs, many of which have never previously been published.
