How to Survive a Pandemic Michael Greger, M.D., FACLM,2020-05-26 A vital, timely text on the viruses that cause pandemics and how to face them, by the New York Times bestselling author of *How Not to Die*. From tuberculosis to bird flu and HIV to coronavirus, these infectious diseases share a common origin story: human interaction with animals. Otherwise known as zoonotic diseases for their passage from animals to humans, these pathogens—both pre-existing ones and those newly identified—emerge and re-emerge throughout history, sparking epidemics and pandemics that have resulted in millions of deaths around the world. How did these diseases come about? And what—if anything—can we do to stop them and their fatal march into our countries, our homes, and our bodies? In *How to Survive a Pandemic*, Dr. Michael Greger, physician and internationally-recognized expert on public health issues, delves into the origins of some of the deadliest pathogens the world has ever seen. Tracing their evolution from the past until today, Dr. Greger spotlights emerging flu and coronaviruses as he examines where these pathogens originated, as well as the underlying conditions and significant human role that have exacerbated their lethal influence to large, and even global, levels. As the world grapples with the devastating impact of the novel coronavirus 2019, Dr. Greger reveals not only what we can do to protect ourselves and our loved ones during a pandemic, but also what human society must rectify to reduce the likelihood of even worse catastrophes in the future.

Determinants and Implications of the Growing Scale of Livestock Farms in Four Fast-growing Developing Countries Christopher L. Delgado, Clare A. Narrod, Marites M. Tiongco, Geraldo Sant'Ana de Camargo Barros, 2008-01-01 The rapid growth in consumer demand for livestock offers an opportunity to reduce poverty among smallholder livestock farmers in the developing world. These farmers' opportunity may be threatened, however, by competition from larger-scale farms. This report assesses the potential threat, examining various forms of livestock production in Brazil, India, the Philippines, and Thailand. Findings show that the competitiveness of smallholder farms depends on the opportunity cost of family labor and farmers' ability to overcome barriers to the acquisition of production- and market-related information and assets. Pro-poor livestock development depends, therefore, on the strengthening of institutions that will help smallholders overcome the disproportionately high transaction costs in securing quality inputs and obtaining market recognition for quality outputs. These and other findings make this report a useful guide for researchers and others concerned with the opportunities and risks of smallholder livestock farming.

War for Growth David Lange, Steffen Manes , 2013 The Chinese Internet market, with its countless people looking to consume innovative products, offers a huge potential for foreign Internet firms. Still, almost none of them have so far been successful in this highly competitive environment. Foreign Internet firms obviously face numerous difficulties and risks when entering China, leaving those behind that don't enter prepared. The mission of this book is to give an answer to the question of how technology companies with an online based business model can avoid the same fate as their counterparts and at the same time use the massive growth opportunities that China has to offer. The main findings in this book are based on a Master Thesis written by one of the authors as well as subsequent research on the topic. It is then supplemented with unique and valuable insights from self-conducted interviews with top European entrepreneurs. We hope you enjoy reading this book!

Creating Shared Value Asit K. Biswas, Cecilia Tortajada, Andrea Biswas-Tortajada, Yugal K. Joshi, Aishvarya Gupta, 2013-09-13 Nestlé's Moga factory was set up in 1961 and comprises of the primary milk collection area for Nestlé's operations. Since its inception in Moga, Nestlé has been working with its milk farmers and ancillary suppliers towards improving quality and productivity. The study presented in this book (carried out by the

Third World Centre for Water Management, Mexico) highlights Nestlé's way of doing business through its philosophy of Creating Shared Value (CSV) and how it contributed to the development of the region over the past 50 years through direct and indirect employment, steady income for milk and other suppliers, and technology transfer. The main objective of the study is to learn to what extent has Nestlé contributed to fulfilling the societal aspirations and expectations of the people working in and around its factory in terms of employment generation, poverty alleviation, general improvements in the community's standards of living and environmental conservation. The study also tried to determine to what extent has the company created shared value for itself, milk farmers, ancillary firms, and the community at large. This effort aims at encouraging more research to be carried out to comprehensively and authoritatively look into the impacts private sector can have on and around the area where their factories are located and that way, contribute to our understanding of social-corporate-government interdependency. An important aspect of this pioneering monograph is the methodology that could be used to study how Corporate Social Responsibility (CSR) or Creating Shared Value (CSV) of a large multinational company can be properly monitored and objectively evaluated at a region-specific scale, especially as very few studies of this nature have been carried out anywhere in the world. This definitive book is further enriched by a foreword by Prof. Michael Porter of Harvard Business School and an epilogue by Peter Brabeck-Letmathe and Paul Bulcke, Chairman of the Board and CEO of Nestlé respectively.

The Philosophy, Politics and Economics of Finance in the 21st Century Patrick O'Sullivan, Nigel F. B. Allington, Mark Esposito, 2015-04-10 Since 2008, the financial sector has been the subject of extensive criticism. Much of this criticism has focused on the morality of the actors involved in the crisis and its extended aftermath. This book analyses the key moral and political philosophical issues of the crisis and relates them to the political economy of finance. It also examines to what extent the financial sector can or should be reformed. This book is unified by the view that the financial sector had been a self-serving and self-regulating elite consumed by greed, speculation and even lawlessness, with little sense of responsibility to the wider society or common good. In light of critical analysis by authors from a variety of backgrounds and persuasions, suggestions for reform and improvement are proposed, in some cases radical reform. By placing the world of finance under a microscope, this book analyses the assumptions that have led from hubris to disgrace as it provides suggestions for an improved society. Rooted in philosophical reflection, this book invites a critical reassessment of finance and its societal role in the 21st century. This book will be of interest to academics, politicians, central bankers and financial regulators who wish to improve the morality of finance.

Re-imagining Milk Andrea S. Wiley, 2015-11-19 Milk is a fascinating food: it is produced by mothers of each mammalian species for consumption by nursing infants of that species, yet many humans drink the milk of another species (mostly cows) and they drink it throughout life. Thus we might expect that this dietary practice has some effects on human biology that are different from other foods. In *Re-imagining Milk* Wiley considers these, but also puts milk-drinking into a broader historical and cross-cultural context. In particular, she asks how dietary policies promoting milk came into being in the U.S., how they intersect with biological variation in milk digestion, how milk consumption is related to child growth, and how milk is currently undergoing globalizing processes that contribute to its status as a normative food for children (using India and China as examples). Wiley challenges the reader to re-evaluate their assumptions about cows' milk as a food for humans. Informed by

both biological and social theory and data, *Re-imagining Milk* provides a biocultural analysis of this complex food and illustrates how a focus on a single commodity can illuminate aspects of human biology and culture.

The 'Olympic and Paralympic' Effect on Public Policy Daniel Bloyce, Andy Smith, 2016-04-14 Set against the backdrop of the London 2012 Olympic and Paralympic Games, this book examines the impact on public policy from broader political decisions taken in relation to Olympic- and Paralympic-related policy. It considers the major political justifications for hosting these global sports events, evidence for their expected impacts, and topical issues including environmental protection and sustainability, the use of technology, and political protest. The book will be essential reading for anyone with an interest in sport policy and politics, and how broader political decisions come to impact on the development of Olympic and Paralympic sport. This book was published as a special issue of the *International Journal of Sport Policy and Politics*.
