*Waste Treatment in the Metal Manufacturing, Forming, Coating, and Finishing Industries* Lawrence K. Wang,Nazih K. Shamma,Yung-Tse Hung,2016-04-19 Comprehensive in its scope and directly applicable to daily waste management problems of specific industries, Waste Treatment in the Metal Manufacturing, Forming, Coating, and Finishing Industries covers hazardous industrial waste treatment, renovation, and reuse in the metal manufacturing, forming, coating, enameling, and finishing industries. It details specific hazardous and industrial wastes from metal industries, basic and advanced principals and applications, augmented by figures, tables, examples, and case histories. This book elucidates new industries and new

waste management topics and provides all of the necessary technical information on industrial and hazardous waste treatment. Focusing on new developments in innovative and alternative technologies, it offers in-depth coverage of environmental pollution sources, waste characteristics, facility innovations, design criteria, control technologies, management strategies, process alternatives, costs, and effluent standards. It also addresses the regional and global effects of important pollution control practices specific to the process industries. Since the field of industrial hazardous waste treatment is very broad and no one can claim to be an expert in all industries, the editors have collected contributions from a wide range of experts, making the information in this handbook authoritative, inclusive, and cutting-edge. It seamlessly interweaves the traditional with the novel, covering all sectors of pollution control and delineating the need for a total environmental control program and how to achieve it.

**Sustainable Nation** Douglas Farr, 2018-02-23 PROSE Award Finalist 2019 Association of American Publishers Award for Professional and Scholarly Excellence As a follow up to his widely acclaimed Sustainable Urbanism, this new book from author Douglas Farr embraces the idea that the humanitarian, population, and climate crises are three facets of one interrelated human existential challenge, one with impossibly short deadlines. The vision of Sustainable Nation is to accelerate the pace of progress of human civilization to create an equitable and sustainable world. The core strategy of Sustainable Nation is the perfection of the design and governance of all neighborhoods to make them unique exemplars of community and sustainability. The tools to achieve this vision are more than 70 patterns for rebellious change written by industry leaders of thought and practice. Each pattern represents an aspirational, future-oriented ideal for a key aspect of a neighborhood. At once an urgent call to action and a guidebook for change, Sustainable Nation is an essential resource for urban designers, planners, and architects.

**Emergency War Plan** Sean M. Maloney, 2021-02 Emergency War Plan examines the theory and practice of American nuclear deterrence and its evolution during the Cold War. Previous examinations of nuclear strategy during this time have, for the most part, categorized American efforts as “massive retaliation” and “mutually assured destruction,” blunt instruments to be casually dismissed in favor of more flexible approaches or summed up in inflammatory and judgmental terms like “MAD.” These descriptors evolved into slogans, and any nuanced discussion of the efficacy of the actual strategies withered due to a variety of political and social factors. Drawing on newly released weapons effects information along with new information about Soviet capabilities as well as risky and covert espionage missions, Emergency War Plan provides a completely new examination of American nuclear deterrence strategy during the first fifteen years of the Cold War, the first such study since the 1980s. Ultimately what emerges is a picture of a gargantuan and potentially devastating enterprise that was understood at the time by the public in only the vaguest terms but that was not as out of control as has been alleged and was more nuanced than previously understood.
