Addressing Tipping Points for a Precarious Future Timothy O'Riordan, Timothy

Lenton, 2013-08-22 Tipping points are zones or thresholds of profound changes in natural or social conditions with very considerable and largely unforecastable consequences. Tipping points may be dangerous for societies and economies, especially if the prevailing governing arrangements are not designed either to anticipate them or adapt to their arrival. Tipping points can also be transformational of cultures and behaviours so that societies can learn to adapt and to alter their outlooks and mores in favour of accommodating to more sustainable ways of living. This volume examines scientific, economic and social analyses of tipping points, and the spiritual and creative approaches to identifying and anticipating them. The authors focus on climate change, ice melt, tropical forest drying and alterations in oceanic and atmospheric circulations. They also look closely at various aspects of human use of the planet, especially food production, and at the loss of biodiversity, where alterations to natural cycles may be creating convulsive couplings of tipping points. They survey the various institutional aspects of politics, economics, culture and religion to see why such dangers persist.

Climate and Conservation Jodi A. Hilty, Charles C. Chester, Molly S. Cross, 2012-05-29 Climate and Conservation presents case studies from around the world of leading-edge projects focused on climate change adaptation-regional-scale endeavors where scientists, managers, and practitioners are working to protect biodiversity by protecting landscapes and seascapes in response to threats posed by climate change. The book begins with an introductory section that frames the issues and takes a systematic look at planning for climate change adaptation. The nineteen chapters that follow examine particular case studies in every part of the world, including landscapes and seascapes from equatorial, temperate, montane, polar, and marine and freshwater regions. Projects profiled range from North American grasslands to boreal forests to coral reefs to Alpine freshwater environments. Chapter authors have extensive experience in their respective regions and are actively engaged in working on climate-related issues. The result is a collection of geographical case studies that allows for effective cross-comparison while at the same time recognizing the uniqueness of each situation and locale. Climate and Conservation offers readers tangible, place-based examples of projects designed to protect large landscapes as a means of conserving biodiversity in the face of the looming threat of global climate change. It informs readers of how a diverse set of conservation actors have been responding to climate change at a scale that matches the problem, and is an essential contribution for anyone involved with large-scale biodiversity conservation.

Marriage, Divorce, and the Abandoned Wife in Jewish Law Michael J. Broyde, 2001 One of the most vexing problems to confront American Orthodox Jewry is where a wife is abandoned by her husband who refuses to give her a Jewish divorce. This work seeks to explain the agunah problem in the United States. It notes that the contemporary agunah problem in America is radically different than that of contemporary Israel and completely different than the talmudic agunah problem. The thesis of this book is that the agunah problem in contemporary America is part of a more general dispute in classical Jewish law as to when marriage should end. Thus, this book surveys how Jewish law seeks to respond to the consent of the other party or without a finding of fault. It concludes by noting that prenuptial agreements can successfully address the agunah problem in the United States since they provide a way for couples to create an image of marriage and divorce by which they can agree to live. Michael J. Broyde is an Associate Professor of Law at Emory University and the Academic Director of Law and Religion Program at Emory University. He is a member (dayan) in the Beth Din of America and was the director of that Beth Din while on sabbatical from Emory. In addition, he is the founding rabbi of the Young Israel synagogue in Atlanta. Professor Broyde is the author of *The Pursuit of Justice in Jewish Law* and co-author of *Human Rights in Judaism*.-- Amazon.com.

Non-University Higher Education in Europe James S. Taylor, José Brites Ferreira, Maria de Lourdes Machado, Rui Santiago, 2008-06-01 Today, a substantial portion of higher education is provided outside of the traditional universities in non-university institutions with a multitude of

varied characteristics. In recent decades, higher education systems have been subjected to many changes and reforms throughout the world. One of the most important was undoubtedly the expansion of higher education in the second half of the last century from an elite system to one for the masses. While institutions of higher learning have been in existence for approximately 1,000 years, this exponential growth has been much more recent. This movement toward mass higher education has created substantial national impacts on the development of the systems of higher education. While common denominators of change and adaptation can be identified globally, there remain important differences from country to country. There are many factors challenging higher education today and in the foreseeable future. In one form or another, these issues and trends can be seen in higher education systems throughout the world. They include chronic underfunding, marketisation and competition, alternative providers, massification, internationalisation, governance, leadership, strategic management, accountability, accreditation, and social relevance. Another key factor for many countries, especially in Europe, and the focus of this book, is the current and future status of the higher education systems that differentiate the university and non-university sectors.

Mismatch Peter Gluckman, Mark Hanson, 2008-02-14 We have built a world that no longer fits our bodies. Our genes - selected through our evolution - and the many processes by which our development is tuned within the womb, limit our capacity to adapt to the modern urban lifestyle. There is a mismatch. We are seeing the impact of this mismatch in the explosion of diabetes, heart disease and obesity. But it also has consequences in earlier puberty and old age. Bringing together the latest scientific research in evolutionary biology, development, medicine, anthropology and ecology, Peter Gluckman and Mark Hanson, both leading medical scientists, argue that many of our problems as modern-day humans can be understood in terms of this fundamental and growing mismatch. It is an insight that we ignore at our peril.

Mafia Brotherhoods Letizia Paoli, 2008-06-01 Relying on previously undisclosed confessions of former mafia members now cooperating with the police, Letizia Paoli provides a clinically accurate portrait of mafia behavior, motivations, and structure in Italy. The mafia, Paoli demonstrates, are essentially multifunctional ritual brotherhoods focused above all on retaining and consolidating their local political power base. A truly interdisciplinary work of history, politics, economics, and sociology, *Mafia Brotherhoods* reveals in dramatic detail the true face of one of the world's most mythologized criminal organizations.

Agriculture and the WTO Merlinda Ingco, John D. Nash, 2004-03-17 Developing countries have a major stake in the outcome of trade negotiations conducted under the auspices of the World Trade Organization (WTO). 'Agriculture and the WTO: Creating a Trading System for Development' explores the key issues and options in agricultural trade liberalization from the perspective of these developing countries. Leading experts in trade and agriculture from both developed and developing countries provide key research findings and policy analyses on a range of issues that includes market access, domestic support, export competition, quota administration methods, food security, biotechnology, intellectual property rights, and agricultural trade under the Uruguay Round Agreement on Agriculture. Material is covered in summary and in comprehensive detail with supporting data, a substantial bibliography, and listings of online resources. This book will be of interest to policymakers and analysts in the fields of development economics and commodities pricing and trade.

Hydrocarbon and Lipid Microbiology Protocols Terry J. McGenity, Kenneth N. Timmis, Balbina Nogales, 2016-09-07 This Volume provides protocols for the biochemical analysis of hydrocarbon- and lipid-relevant products, cell components and activities of microbes that interact with hydrophobic compounds. They include methods for the extraction, purification and characterisation of surface tension-reducing bioemulsifiers and biosurfactants that increase the

surface area and hence bioavailability of hydrophobic substrates. Protocols for the isolation and biochemical analysis of lipids and polyhydroxyalkanoates, food storage products made during nutrient abundance that represent important biotechnological products, are presented. The extraction of membrane lipid rafts, sub-organelles that fulfil important functional roles for the cell membrane, and the isolation and characterisation of membrane phospholipid biomarkers, are also described. The purification and characterisation of integral membrane hydrocarbon-oxidising enzymes are addressed. Lastly, two generic methods for the genetic analysis of catabolic pathways and analysis of ligand binding are presented. Hydrocarbon and Lipid Microbiology Protocols There are tens of thousands of structurally different hydrocarbons, hydrocarbon derivatives and lipids, and a wide array of these molecules are required for cells to function. The global hydrocarbon cycle, which is largely driven by microorganisms, has a major impact on our environment and climate. Microbes are responsible for cleaning up the environmental pollution caused by the exploitation of hydrocarbon reservoirs and will also be pivotal in reducing our reliance on fossil fuels by providing biofuels, plastics and industrial chemicals. Gaining an understanding of the relevant functions of the wide range of microbes that produce, consume and modify hydrocarbons and related compounds will be key to responding to these challenges. This comprehensive collection of current and emerging protocols will facilitate acquisition of this understanding and exploitation of useful activities of such microbes.

Revolutions that Made the Earth Tim Lenton, Andrew Watson, 2013-04-11 The Earth that sustains us today was born out of a few remarkable, near-catastrophic revolutions, started by biological innovations and marked by global environmental consequences. The revolutions have certain features in common, such as an increase in complexity, energy utilization, and information processing by life. This book describes these revolutions, showing the fundamental interdependence of the evolution of life and its non-living environment. We would not exist unless these upheavals had led eventually to 'successful' outcomes - meaning that after each one, at length, a new stable world emerged. The current planet-reshaping activities of our species may be the start of another great Earth system revolution, but there is no guarantee that this one will be successful. The book explains what a successful transition through it might look like, if we are wise enough to steer such a course. This book places humanity in context as part of the Earth system, using a new scientific synthesis to illustrate our debt to the deep past and our potential for the future.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Assessment of the Risk of Amazon Dieback Walter Vergara, Sebastian M. Scholz, 2010-11-11 The Amazon basin is a key component of the global carbon cycle. Not only is the old-growth rainforests in the basin huge carbon storage with about 120 billion metric tons of carbon in their biomass, but they also process annually twice the rate of global anthropogenic fossil fuel emissions through respiration and photosynthesis. In addition, the basin is the largest global repository of biodiversity and produces about 20 percent of the world's flow of fresh water into the oceans. Despite the large CO₂ efflux from recent deforestation, the Amazon rainforest is still considered to be a net carbon sink or reservoir because vegetation growth on average exceeds mortality. However, current climate trends and human-induced deforestation may be transforming forest structure and behavior. Amazon forest dieback would be a massive event, affecting all life-forms that rely on this diverse ecosystem, including humans, and producing ramifications for the entire planet. Clearly, with changes at a global scale at stake, there is a need to better understand the risk, and dynamics of Amazon dieback. Therefore, the purpose of the book is to assist in understanding the risk, process and dynamics of potential Amazon dieback and its implications.

The natural choice Great Britain: Department for Environment, Food and Rural Affairs, 2011-06-07 This white paper sets out proposals for a detailed programme of action to repair damage done to the environment in the past, and urges everyone to get involved in helping nature to flourish at all levels - from neighbourhoods to national parks. The plans are directly linked to the groundbreaking research in the National Ecosystem Assessment that showed the strong economic arguments for safeguarding and enhancing the natural environment. They also act on the recommendations of 'Making Space for Nature', a report into the state of England's wildlife sites, led by Professor John Lawton and published in September 2010, which showed that England's wildlife sites are fragmented and not able to respond to the pressures of climate change and other pressures we put on our land. Key measures proposed include: i) Reconnecting nature with New Nature Improvement Areas (NIAs) with a £7.5 million fund for 12 initial NIAs, biodiversity offsetting, New Local Nature Partnerships with £1 million available this year, phasing out peat, ii) Connecting people and nature for better quality of life with Green Areas Designation, better urban green spaces; more children experiencing nature by learning outdoors, strengthening local public health activities, the new environmental volunteering initiative Muck in 4 Life to improve places in towns and countryside for people and nature to enjoy and iii) Capturing and improving the value of nature with a Natural Capital Committee; an annual statement of green accounts for UK Plc, a business-led Task Force to expand the UK business opportunities from new products and services which are good for the economy and nature alike.

The Positive Deviant Sara Parkin, 2010 An economy low in carbon and high in life satisfaction will require thousands, if not millions of exceptional leaders. This book is the first to bring together sustainability knowledge with the leadership skills and tools to help you become one of those leaders. In it you will find everything you need to get started straight away, and to grow your effectiveness, even in a world that remains perversely intent on the opposite. Whether you are new to the whole idea of sustainability, or reasonably well informed but not entirely confident about what to do for the best, this guide will help you 'do' sustainability. Free of checklists and policy recommendations, the focus is on you, and on developing your capacity to identify the right thing to do wherever you are and whatever your circumstances. This is essential reading for those in or aspiring to sustainability-literate leadership, and a must for all those teaching leadership and management.

City-Region 2020 Joe Ravetz, 2016-05-13 Based on analysis of the Manchester city-region, this book offers a vision of a sustainable urban future, through integrated strategic management of the entire city-region. It translates principles into practice for achieving the necessary balance to ensure

a higher standard of living and safe environment. The text presents: a 25-year horizon for the evolution and restructuring of the urban system; a focus for linkages and synergies between economic, social and environmental sectors; technical scenarios for land use, energy and material flows; spatial scenarios for each area and settlement type; and lateral thinking on cultural, information, localization and globalization trends. Also included are practical actions, methods and tools such as sustainability indicators and appraisals that can be applied anywhere in the western world.

[Avoid Food-Drug Interactions](#) U.s. Food and Drug Administration, National Consumers League, 2014-07-05 What you eat and drink can affect the way your medicines work. Use this guide to alert you to possible food-drug interactions and to help you learn what you can do to prevent them. In this guide, a food-drug interaction is a change in how a medicine works caused by food, caffeine, or alcohol. A food-drug interaction can: prevent a medicine from working the way it should cause a side effect from a medicine to get worse or better cause a new side effect A medicine can also change the way your body uses a food. Any of these changes can be harmful. This guide covers interactions between some common prescription and over-the counter medicines and food, caffeine, and alcohol. These interactions come from medicine labels that FDA has approved. This guide uses the generic names of medicines, never brand names.
