Using IBM CICS Transaction Server Channels and Containers Steve Burghard,Peter Klein,IBM

Redbooks,2015-03-21 This IBM® Redbooks® publication describes the new channels and containers support in IBM Customer Information Control System (CICS®) Transaction Server V5.2. The book begins with an overview of the techniques used to pass data between applications running in CICS. This book describes the constraints that these data techniques might be subject to, and how a channels and containers solution can provide solid advantages alongside these techniques. These capabilities enable CICS to fully comply with emerging technology requirements in terms of sizing and flexibility. The book then goes on to describe application design, and looks at implementing channels and containers from an application programmer point of view. It provides examples to show how to evolve channels and containers from communication areas (COMMAREAs). Next, the book explains the channels and containers application programming interface (API). It also describes how this API can be used in both traditional CICS applications and a Java CICS (JCICS) applications. The business transaction services (BTS) API is considered as a similar yet recoverable alternative to channels and containers. Some authorized program analysis reports (APARs) are introduced, which enable more flexible web services features by using channels and containers. The book also presents information from a systems management point of view, describing the systems management and configuration tasks and techniques that you must consider when implementing a channels and containers solution. The book chooses a sample application in the CICS catalog manager example, and describes how you can port an existing CICS application to use channels and containers rather than using COMMAREAs.

Journey Into Dialogic Pedagogy Eugene
Matusov,2009-01-01 The author came to the decision to embark on this journey into dialogic pedagogy when he firmly realised that education is essentially dialogic. It is not that pedagogy should be dialogic -- he rather argues that it is always dialogic. This is true whether the participants in it, or outside observers of it, realise it or not -- and even when the participants are resistant to dialogue. This statement is in contrast with views that promote dialogic interaction in the classroom as a form of instruction. This conceptualisation contrasts with views that dialogic interaction or conversational instruction are more effective instructional means in comparison to, let's say, a more monologic genre of instruction such as a lecture or a demonstration. This statement is also in contrast with views that assume dialogue is a pedagogical instrument that can be turned on and off. He argues that whatever teachers and students do (or not do) whether in their classrooms or beyond it, they are locked in dialogic relations.

War Photographs Taken on the Battlefields of the Civil War Mathew B. Brady,Alexander Gardner,2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected from a collection of seven thousand

original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.

This Is Not a Program Tiqqun, 2011-05-06 An urgent critique of the biopolitical subject and omnipresent Empire. Historical conflict no longer opposes two massive molar heaps, two classes—the exploited and the exploiters, the dominant and dominated, managers and workers—between which, in each individual case, it would be possible to differentiate. The front line no longer cuts through the middle of society; it now runs through each one of us... “—from *This Is Not a Program* Traditional lines of revolutionary struggle no longer hold. Rather, it is ubiquitous cybernetics, surveillance, and terror that create the illusion of difference within hegemony. Configurations of dissent and the rhetoric of revolution are merely the other face of capital, conforming identities to empty predicates, ensuring that even “thieves,” “saboteurs,” and “terrorists” no longer exceed the totalizing space of Empire. *This Is Not a Program* offers two texts, both originally published in French by Tiqqun with Introduction to Civil War in 2001. In *This Is Not a Program*, Tiqqun

outlines a new path for resistance and struggle in the age of Empire, one that eschews the worn-out example of France's May '68 in favor of what they consider to be the still fruitful and contemporary insurrectionary movements in Italy of the 1970s. "As a Science of Apparatuses" examines the way Empire has enforced on the subject a veritable metaphysics of isolation and pacification, "apparatuses" that include chairs, desks, computers; surveillance (security guards, cameras); disease (depression); crutch (cell phone, lover, sedative); and authority. Tiqqun's critique of the biopolitical subject and omnipresent Empire is all the more urgent as we become inured to the permanent state of exception that is the War on Terror and to other, no less intimate forms of pacification. But all is not lost. In its unrelenting production of the Same, Empire itself creates the conditions necessary for the insurrection to come.

Large Asian Lakes in a Changing World Steffen Mischke, 2020-05-11 Describing the natural state of eight important lakes in Asia and the human impact on these lake ecosystems, this book offers a valuable reference guide. Over the past several decades the Aral Sea, Dead Sea, Lake Balkhash and other major lakes in Asia have undergone significant changes with regard to their size, water level, chemical composition, and flora and fauna. Most of these changes resulted from the loss of water from tributaries (now used for irrigation farming) or increasing consumption in local industries and households. However, significant human impacts may have begun as early as 2000 years ago. In addition to the three lakes mentioned above, Lake Sevan (Armenia), the Caspian Sea (Azerbaijan, Iran, Kazakhstan, Russia, Turkmenistan), Lake Issyk-Kul (Kyrgyzstan), and Lake Lop Nur (China) are discussed as the most prominent examples of changing lake ecosystems.

In contrast, an example of an almost pristine lake ecosystem is included with the report on Lake Uvs Nuur (Mongolia). For each lake, the book summarizes its origin and early geological history, and reconstructs its natural state and variability on the basis of proxy records from drilled or exposed lake sediments that have accumulated since the last ice age. The frequently observed reductions in lake level and size during most recent decades led often to significant environmental impacts in the respective lake catchments including vegetation deterioration, soil erosion and badland formation, soil salinization or the formation of sinkholes.
